

## 3505 - Concussion Protocol

Many students within the Middleton School District participate in extra-curricular activities of a nature whereby physical injury may result. Though the District takes care to ensure all extracurricular activities are as safe as practicable, it is not possible to remove all danger from such activities, and the District acknowledges that concussions may result. The purpose of this policy is to prepare a procedure for addressing situations in which student concussions have occurred, or are suspected to have occurred.

This policy only applies to organized athletic league or sport in which any District middle school, junior high school, or high school student participates as a an athlete or youth athlete. For the purposes of this policy, athlete or youth athlete means an individual who is 18 years of age or younger and who is a participant in any middle school, junior high school, or high school athletic league or sport. A school athletic league or sport shall not include participation in a physical education class.

### Pre-Season Education

The administration and coaches will work to ensure that athletes, youth athletes, parents, volunteers, and assistant coaches are educated about concussions. Prior to being allowed to engage or participate in any school athletic league or sport, as discussed above:

1. Each student desiring to participate in such school athletic league or sport, and the student's parents/guardians, shall be provided notice of or copies of any concussion guidelines.
2. Each student desiring to participate in such school athletic league or sport, and the student's parents or guardians, shall acknowledge that they have been provided the guidelines and have had the opportunity to review and have reviewed such information. Further, each student and the student's parents/guardians shall sign an applicable waiver for participating in such school athletic league or sport.
3. The signed waiver and acknowledgment of review of the appropriate information shall be returned to the District.
4. The athlete will be required to obtain a pre-season baseline concussion (or similar) test before being allowed to participate in a school athletic league or team. Such test must be performed at least once annually, and shall be at the student's expense. The District must be provided with written confirmation that the test was completed by a qualified and trained health care professional, though the results of the testing shall not be provided to the District.

Athletes will not be allowed to participate in school athletic leagues or sports until the above steps are accomplished.

Coaches, referees, game officials, game judges, and athletic trainers shall review any concussion guidelines or information available from the State Department of Education and the Idaho High School Activities Association and information upon employment and biannually thereafter.

### Protocol on Suspected Concussion

If, during any school athletic league or sport practice, game, or competition, an athlete exhibits signs or symptoms of a concussion, makes any complaint indicative of a possible concussion, or a coach, assistant coach, volunteer coach, or other School District employee has reason to believe a concussion has occurred, such student shall be removed from play or participation in the practice, game, or competition. According to the Centers for Disease Control and Prevention, and for the purposes of this policy, signs observed by coaching staff which could be indicative of a concussion include if the student:

1. Appears dazed or stunned;
2. Is confused about assignment or position;
3. Forgets an instruction;
4. Is unsure of game, score, or opponent;
5. Moves clumsily;
6. Answers questions slowly;
7. Loses consciousness (even briefly);
8. Shows mood, behavior, or personality changes;
9. Can't recall events prior to the hit or fall; or
10. Can't recall events after the hit or fall.

According to the Centers for Disease Control and Prevention, and for the purposes of this policy, symptoms reported by the athlete which could be indicative of a concussion include:

1. Headache or "pressure" in head;
2. Nausea or vomiting;
3. Balance problems or dizziness;
4. Double or blurry vision;
5. Sensitivity to light;
6. Sensitivity to noise;
7. Feeling sluggish, hazy, foggy, or groggy;
8. Concentration or memory problems;
9. Confusion; or
10. Does not "feel right" or is "feeling down".

Coaches should not try to judge the severity of the injury themselves. Health care professionals have a number of methods that they can use to assess the severity of concussions. Coaches should record the following information, if possible, to help health care professionals in assessing the athlete after the injury:

1. Cause of the injury and force of the hit or blow to the head or body;
2. Was there any loss of consciousness (passed out/knocked out) and if so, for how long;
3. Was there any memory loss immediately following the injury;
4. Were there any seizures immediately following the injury; and
5. The number of previous concussions (if any).

Under the direction of school principals, the athletic director shall ensure that a health record is maintained for each student.
