We have enough funding for 3 carts with 30 chromebooks each. This will remove the barrier of students coming to school without chromebooks or with them uncharged. We are going to choose two different areas of desired improvement. There has been discussion and interest among students for bottle filling stations. Two other possibilities are improving pick up

		<p>procedures as well as campus signage (ex. Directional arrows within heavy traffic areas on campus) The team is favoring signage and bottle filling stations.</p> <p>3:54 - We are reviewing last year's areas of desired improvement for the School Climate Plan. The implementation of permanent lunch areas for 6th, 7th, and 8th grade areas is highly likely. There have been suggestions for opening spaces such as the field or the library as well as supplying balls, equipment, and games. Movement could not be made but it is highly likely that the team will vote in favor of this.</p> <p>We reviewed the diagnostic test data together. There has been an improvement from years past.</p>
