

How to Register for Two Factor Authentication – Google

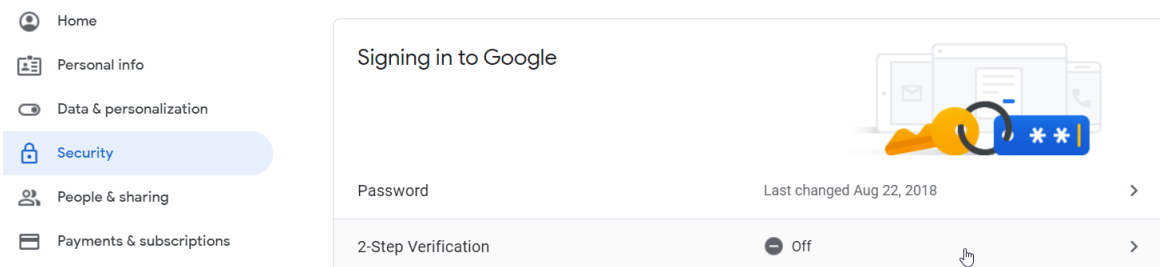

1. Open Google Chrome and click on your account icon in the upper right-hand corner, then click **Manage your Google Account**. This requires you to be signed into your Chrome browser.

2. Click **Security**.

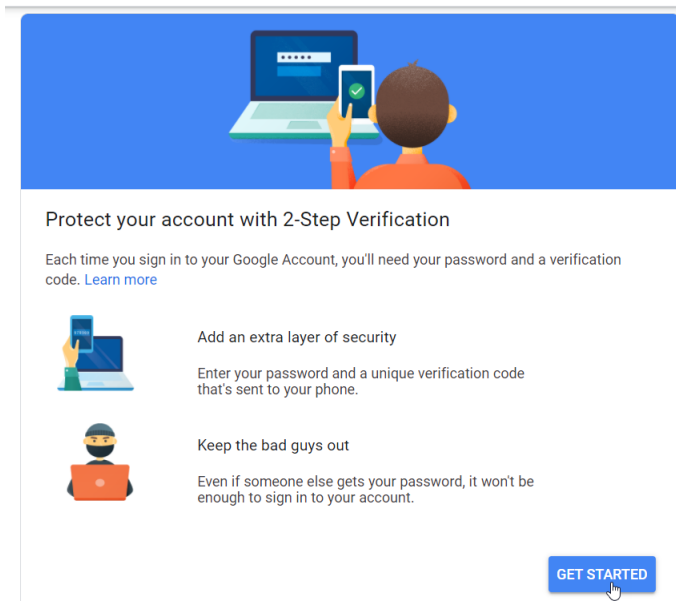

3. Scroll down and click on **2-Step Verification**.

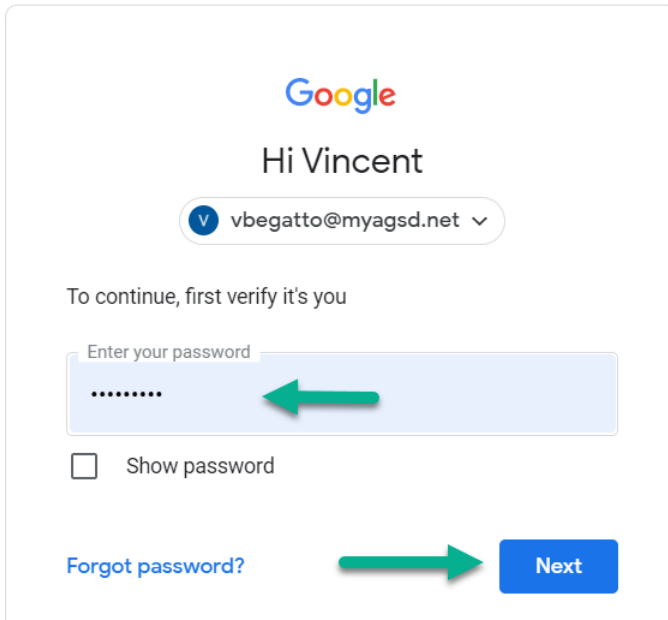

4. Click **Get Started**.

← 2-Step Verification

5. Enter password and click **Next**.

6. If you see your device click **Continue** (Skip to step 9). If you do not see your device click **Show more options**.

Use your phone as your second step to sign in

After you enter your password, Google prompts are securely sent to every phone where you're signed in. Just tap the notification to review and sign in.

These devices can get prompts

 Samsung Galaxy S10

[Don't see your device?](#)

[Show more options](#)

 [CONTINUE](#)

7. Once you have clicked **Show more options**, then click **Text message or voice call**.
← 2-Step Verification

8. Follow the steps to set up your phone to authenticate your Google account.

Get your device ready for 2-Step Verification

Make sure you're signed in to your Google Account on an Android phone or iPhone.

If you have an Android phone

1. Open the **Settings** app on your phone
2. Tap **Accounts**, then **Add Account**
3. Select **Google** and sign in

If you have an iPhone

1. Get the **Google app** from the App Store
2. Sign in with your Google Account

[CLOSE](#) [TRY AGAIN](#)

9. Add a backup option. This is used in case you do not have your phone. You have 2 options, to use another phone, or use backup codes. If you want to use another phone then enter the phone number. If you want to use backup codes click **USE ANOTHER BACKUP OPTION**.

Almost there! Add a backup option

If you lose your phone or your second step is unavailable, you'll need a backup option to help you get in to your account.

  610-555-5555 

Google will only use this number for account security.
Don't use a Google Voice number.
Message and data rates may apply.

How do you want to get codes?

☒ Text message ☐ Phone call

[USE ANOTHER BACKUP OPTION](#)  [SEND](#)

10. If you choose to **USE ANOTHER BACKUP OPTION** you will see the following screen. **Download** and save the codes to a safe and secure location. Then click **Next**. Again, these are used when you are unable to authenticate with your phone.

Save your backup codes so you'll always have account access

Backup codes are one-time passcodes that you can use to sign in when you're away from your phone. Each code can only be used once.

11. Click **Turn On**.

Turn on 2-Step Verification?

Second step: **Google prompt (default)**

Backup option: **Backup codes**

You'll stay signed in to **vbegatto@myagsd.net** on these devices: **Samsung Galaxy S10, Google Intel Gemini Lake Chromebook, and Chrome OS.**

You might be signed out of your other devices. To sign back in, you'll need your password and second step.

 **TURN ON**

You are now set up for Google Two Factor Authentication! Below is an example of the screen you will see on your phone then you log into your Google account.
