

PARTICIPATE IN MATH EXPO!

If you are looking for a way to enrich your child's love of math, help teach them time management and improve their communication skills, then consider registering your child for the LNE Math Expo!

To participate in the Math Expo, students will complete a math fair project and create a math expo board at home as individuals or partners (max 2 students).

On March 8, students will bring their project to school. Students will display their project and participate in an interview (5 minutes or less) with the judges.

The judges will score the projects after conducting the interviews and viewing the projects.

Winners in the K-2 division, the 3-4 division and the 5th grade division will move on to the Iredell-Statesville Schools District Math Expo.
