

SDO Professional Development

The School District of Onalaska is committed to creating structures and professional learning content to support the roles and responsibilities of all employees. The goal of our District's learning is to foster high levels of engagement and success. A District calendar is developed annually with designated Professional Development (PD) days to create opportunities and time to learn and apply newly acquired practices and for larger learning engagement.

Daily Common Collaborative Time: All student contact days start with daily common collaborative time which is driven by the work of collaborative teams using our [Strategy Implementation Guide](#).
