## A Message from our High School Principals

Dear High School Students,

Each year you will be asked to make important decisions that will have a profound impact on your future interests and career aspirations. The selection of courses should be made with considerable thought and with the input and assistance of your parents, teachers, school counselors, and the administrative staff. While we are prepared to help guide and direct you in this process, please realize that it is you, the student, who must weigh all of the options to make the most beneficial selections.

The program of studies was designed to provide students with important information pertaining to the various programs and courses offered at our high school. Your school counselor will be an important person in providing you advice, direction, and explanations necessary to enable your use of the information contained herein to the fullest personal benefit. As you begin the course selection process, we encourage you to make decisions based, not only on the factors previously mentioned, but also on your career interests. This booklet contains Career Pathways that will direct you to the optimum courses you should take in regards to the career you are most interested in. Let these pathways serve as a guide to help you along in this process of choosing your courses for the upcoming year.

Parents/guardians: Your input and guidance in assisting your child in the course selection process is greatly appreciated. We realize the decision process is sometimes difficult and confusing. Please feel free to call the Guidance Office or make an appointment at any time to discuss your son's/daughter's future.

Sincerely,

High School Administration

## A Message from our School Counselors

Dear Pleasant Valley High School Students and Families,

At Pleasant Valley High School, we want to facilitate academic success as well as foster the development of personal growth, emotional well-being, and social skills for our students. Additionally, we will assist our students in creating a post-graduation plan, such as college, trade school, workforce, or armed services, which aligns with each student's individualized interests and abilities.

As school counselors, we make ourselves available to meet with our students, to help facilitate a successful educational experience. During school counselor scheduled appointments at the beginning, middle and end of the school year, we ensure that all students are meeting their credit graduation requirements, their Act 158 graduation requirements, which are set forth by the state of Pennsylvania, and plan for their successful future. We also ensure that we are supporting our students in areas, beyond the boundaries of the classroom, by providing a variety of resources that can be found throughout the community.

We are excited to meet our new students to build new relationships and continue to support the well-being of our school community throughout the 2024-2025 school year.

Sincerely,

High School Counselors

## A Message from the Bears Academy

Welcome to Bears Academy, the innovative Kindergarten through 12th-grade cyber school program proudly offered by the Pleasant Valley School District. At Bears Academy, we redefine the educational experience by combining the flexibility of asynchronous learning with the personalized touch of live support.

Our unique approach to online education revolves around using Edgenuity, an engaging and dynamic platform that caters to individual learning styles and paces. Through Edgenuity, students at Bears Academy have the freedom to navigate their educational journey independently, allowing them to grasp concepts at their own pace while fostering self-discipline and time-management skills.

What sets Bears Academy apart is the seamless integration of asynchronous learning with synchronous support provided by our dedicated Pleasant Valley Educators. While students benefit from the flexibility of self-paced lessons, our educators bring vibrancy to the virtual classroom through interactive sessions, live discussions, and personalized support. This blend of asynchronous and synchronous learning ensures students receive a comprehensive and well-rounded education tailored to their needs.

As a part of the Bears Academy family, students experience a supportive online community that values collaboration, curiosity, and academic excellence. We take pride in offering a cyber school program that not only adapts to the modern demands of education but also ensures that each student receives the attention and guidance needed to thrive in a digital learning environment. Additionally, BA students are invited to participate in the district's extracurricular activities, including clubs, sports, intramurals, dances, and sponsored organizations, to promote a connection between our district and students.

Join us at Bears Academy, where the power of technology meets the warmth of personalized education, creating a space where students can flourish academically while enjoying the flexibility of an asynchronous learning platform. Welcome to a new era of cyber education at the Pleasant Valley School District.

For more information about PVBA, please visit our website at https://www.pvbears.org/Domain/977.

Mr. Jason Van Voorhis Pleasant Valley Bears Academy Principal

## **Important Course Information for Bears Academy**

Any student interested in our Bears Academy should see their school counselor for a list of courses that we offer.

## PLEASANT VALLEY SCHOOL DISTRICT Class of 2028 and Beyond Graduation Requirements

**For all students graduating in 2028 and beyond:** Listed below are the graduation requirements in which all students must successfully pass to be eligible for a diploma.

	ENGLISH	4	
	MATHEMATICS	3	
	SCIENCE	3	
	SOCIAL STUDIES	3	Ι.
	1 ADDITIONAL CREDIT FROM SCIENCE, SOCIAL STUDIES,	1	
0	OR MATH		- 6
	WELLNESS & HEALTH	2	
~	CAREER PLANNING & FINANCIAL LITERACY	.5	
	ELECTIVES*	7.50	
	TOTAL CREDITS REQUIRED =	24	

\*Elective courses include all of the following: Art, Music, Industrial Technologies, Family and Consumer Science, Foreign Languages, Social Studies (other than required Social Studies courses), MCTI, & Keystone Courses (required if the student is not proficient in PSSA & Keystone exam scores).

\*Students attending middle school have the ability to take advanced courses (Algebra I, Spanish I); however, these advanced courses taken during their time in middle school will not be added to their high school GPA or reflected on their transcript. This will take effect starting with the class of 2028. Please note: Students that took Spanish I in middle school in the year 23-24 will get high school credit but not GPA.

\*In addition to the required 24 credits for graduation, students must also meet the Pennsylvania Act 158 Pathway requirements. Please see page 14.

\*Any student that attends MCTI during their high school career, will need to individually meet with their school counselor to ensure they are meeting their graduation requirements. If a student is in need of required courses, they will have the opportunity to schedule online courses or in-person summer courses to ensure they will graduate on time.

## PLEASANT VALLEY SCHOOL DISTRICT Class of 2027 GRADUATION REQUIREMENTS

**For all students graduating in 2026-2027 school year:** Listed below are the graduation requirements in which all students must successfully pass to be eligible for a diploma. Credit total is the same but individual credit requirements are different due to changes in course offerings.

	ENGLISH	4	
	MATHEMATICS	3

	WELLNESS COURSE	1.5	
	ELECTIVES*	7.75	J
S	TOTAL CREDITS REQUIRED =	24	

\*Elective courses include all of the following: Art, Music, Industrial Technologies, Family and Consumer Science, Foreign Languages, Social Studies (other than required Social Studies courses), MCTI, & Keystone Courses (required if the student is not proficient in PSSA & Keystone exam scores).

\*Students attending middle school have the ability to take advanced courses(Algebra I, Honors Algebra II, Spanish I, & Honors English Prep); however, these advanced courses taken during their time in middle school will not be added to their high school GPA, but the credit will be reflected on their transcript. The only courses that will be added to the high school transcript and GPA are Algebra I if taken in 7th grade and Honors Algebra II if taken in 8th grade. If a student took Algebra I in 8th grade, the credit will be reflected on their transcript only.

\*In addition to the required 24 credits for graduation, students must also meet the Pennsylvania Act 158 Pathway requirements. Please see page 14.

\*Any student that attends MCTI during their high school career, will need to individually meet with their school counselor to ensure they are meeting their graduation requirements. If a student is in need of required courses, they will have the opportunity to schedule online courses or in-person summer courses to ensure they will graduate on time.

## PLEASANT VALLEY SCHOOL DISTRICT Class of 2026 GRADUATION REQUIREMENTS

For all students graduating in 2025-2026 school year: Listed below are the graduation requirements in which all students must successfully pass to be eligible for a diploma. Credit total is the same but students but individual credit requirements are different due to changes in course offerings.

			1
	ENGLISH	4	
	MATHEMATICS	3

Timeline for scheduling				
Projected Date	Description			
Late January/ February	<ul> <li>-Grade level presentation held at the middle school for incoming 9th graders:</li> <li>High School</li> <li>Bears Academy</li> <li>MCTI</li> </ul>			
Late January/ February	Parent/Guardian scheduling presentations for incoming 9th -12th: - High School - Bears Academy - MCTI			
February/ March	Student scheduling presentations for incoming 10th -12th: - High School - Bears Academy - MCTI			
February/ March	-Incoming 12th grade: Course selection window opens (AP course request forms are handed out).			
February/ March	-Incoming 11th grade: Course selection window opens (AP course request forms are handed out).			
February/ March	-Incoming 10th grade: Course selection window opens (AP course request forms are handed out).			
February/ March	-Incoming 9th grade: Course selection window opens (AP course request forms are handed out).			
April/May	Release of student's unofficial schedule			
July	Release of student's official schedule			

After students get their unofficial schedule, changes to student schedules will only be considered to correct scheduling errors, NOT to change a course selection.

## Statewide High School Graduation Requirement Act 158 of 2018.

Act 158 of 2018 (Act 158), which was signed into law by Governor Tom Wolf on October 24, 2018, shifts Pennsylvania's reliance on high stakes testing as a graduation requirement to provide alternatives for high school students to demonstrate readiness for postsecondary success. Formerly, Pennsylvania's statewide graduation requirement was more restrictive, requiring most students to pass the Keystone Exams — end of course exams in Algebra I, Literature, and Biology — in order to graduate. Act 158, in conjunction with Act 6 of 2017 (Act 6), expands the options for students to demonstrate postsecondary readiness through four additional pathways that more fully illustrate college, career, and community readiness. The statewide graduation requirement outlined in Act 6 and Act 158 takes effect for the **graduating class of 2023**. (*Act 158 Pathway Graphic accessible on the PVHS website home page*)

## **Pathway Criteria**

#### **CTE Concentrator**

#### **Alternative Assessment**

#### 1 Artifact

Industry-based competency certification

Likelihood of industry-based competency assessment success

Readiness for continued engagement in CTE Concentrator program of study

#### 1 Artifact

Attainment of one alternative assessment score or better: ACT (21), ASVAB AFQT (31), PSAT/NMSQT (970), or SAT (1010)

Attainment of Gold Level or better on ACT WorkKeys

Attainment of 3 or better on AP Exam(s) related to each Keystone content area in which less than Proficient

Attainment of 4 or better on IB Exam(s) related to each Keystone content area in which less than Proficient

Successful completion of concurrent enrollment course(s) related to each Keystone content area in which less than Proficient

Successful completion of a pre-apprenticeship program

Acceptance into accredited, non-profit Institution of Higher Education (IHE) 4yr program for college-level coursework

#### **Evidence-Based**

#### 3 Artifacts consistent w/student goals

ONE or more from Section One No more than TWO from Section Two

#### Section 1

Attainment of 630 or better on any SAT Subject Test

Attainment of Silver Level or better on ACT WorkKeys

Attainment of 3 or better on any AP Exam

Attainment of 3 or better on any IB Exam

Successful completion of any concurrent enrollment or postsecondary course

Industry-recognized credentialization

Acceptance into accredited, non-profit Institution of Higher Education (IHE) for college-level coursework in an other-than-4yr program

#### Section 2

Attainment of Proficient or Advanced on any Keystone Exam

Successful completion of a service-learning project

Letter guaranteeing full-time employment or military enlistment

Completion of an internship, externship, or cooperative education program

Compliance with NCAA Division II academic requirements

#### **5 ACT 158 GRADUATION PATHWAYS:**

#### **Keystone Proficiency Pathway**

- A Student must earn Proficient or Advanced on all 3 Keystone Exams: Algebra I, Literature and Biology.
- A proficient score =1500 or above on each test to meet this pathway.
- Keystone Exams are aligned to specific courses. Students must take the Keystone Exam at the end of the aligned course and could retake tests on which they do not achieve proficiency (unlimited retakes).

#### **Keystone Composite Pathway**

- Demonstration of Proficiency:
- Composite (total) score of 4452 on all three exams, also earning a Proficient or Advanced score on at least one of the three exams.
- The student may not earn a Below Basic score on either of the other two exams.
- If a student tests multiple times, the BEST SCORE is used in this calculation.

#### **Keystone Composite Pathway 1:**

- Earned a composite score of 4452 among the three Keystone Exams (Algebra I, Literature, and Biology).
- The scores must include a score of Proficient or Advanced on at least one Keystone Exam and at least Basic on the other two.

EXAMPLE :

» Student Keystone scores add up to a composite of 4513, with one proficient and no below basic scores.

```
Biology: 1484 = BASIC; Algebra 1: 1480 = BASIC; Literature: 1549 = PROFICIENT » Note: student has 3 scores; none below basic » The student has met the composite pathway.
```

#### Keystone Composite Pathway 2:

• Earn a composite score 2939 or greater for two of the three Keystone Exams (calculated using the highest numerical scores attained by the student, neither of which may be Below Basic and at least one of which must be Proficient or better).

#### **Alternate Assessment Pathway**

- Successful passing of the Keystone Course or available foundational course (Alg, Lit, Bio) on which the student did not earn a proficient/advanced score on the Keystone exam. Student must also achieve one of the following:
- Achievement of an established score on an approved alternate assessment
  - SAT/1010
  - PSAT/970
  - ACT/21
  - ASVAB/31
  - Gold Level on the ACT WorkKeys Assessment.
  - Achievement of at least a 3 on an AP Program exam in an academic content area associated with each Keystone
  - Exam on which the student did not achieve a proficient or advanced score; Successful completion of a concurrent enrollment course (ex., college-in-high school course) in an academic content area associated with each Keystone Exam in which the student did not achieve at least a proficient score; Successful completion of a pre-apprenticeship program; or Acceptance in an accredited, 4-year, nonprofit institution of higher ed and evidence of the ability to enroll in college-level coursework.

#### **Evidence Based Pathway**

- Successful completion of the Keystone course/district requirement.
- Demonstration of 3 pieces of evidence consistent with the student's goals and career plans, including:
- At least 1, but up to 3 of the following:
  - Achievement of an established score on the ACT WorkKeys assessment (Silver Level).
  - SAT/630 subject test.
  - AP Program Exam (score of 3 or above).
  - Acceptance to an accredited, nonprofit institution of higher ed other than a 4-year institution and evidence of the ability to enroll in college-level coursework.
  - Attainment of an industry-recognized credential.
  - Successful completion of a concurrent enrollment or postsecondary course.

Two (2) additional pieces of evidence, including one or more of the options listed above or:

- Satisfactory completion of a service learning project.
- Attainment of a proficient or advanced on a Keystone Exam.
- A letter guaranteeing full-time employment.
- A certificate of successful completion of an internship or cooperative education program.
- Satisfactory compliance with the NCAA's core courses for college-bound student athletes with a minimum grade point average (GPA) of 2.0.

#### **Career Technical Pathway**

- Successful completion of Keystone courses and/or foundational course option, and
- Achievement of 1 of the following:
  - An industry-based competency certification.
  - Demonstration of a high likelihood of success on an approved industry based competency assessment.
  - Readiness for continued, meaningful engagement in the CTE concentrator's program of study.

## **Grading Policy**

The following information pertains to the numerical grading policy:

- 1. Any grade average below 65% is a failing grade.
- 2. Any student who is absent on the day of a midterm, benchmark, or final exam must produce a doctor's excuse for the absence, which will allow the student an opportunity to take the exam. Students who cannot furnish a doctor's excuse or do not obtain the adminstrative's approval shall receive a grade of zero "0".
- 3. Students will not be permitted to make up work from any unexcused absence.
- 4. Each one (1) credit course final grade will be determined by averaging the four (4) marking period grades and the final exam, where the final exam represents 20% of the final average. Midterm grades are averaged into the 2nd or 3rd marking period grade. Benchmark exams are given each marking period and will be averaged into the marking period grade.
- 5. Each half (1/2) credit course will be determined by averaging the marking period grades and the final exam, where the final exam represents 20% of the final average (if the course has a final).
- 6. Each quarter (1/4) credit course will be determined by averaging the marking period grade and the final exam, where the final exam represents 20% of the final average (if the course has a final).
- 7. For clarity, Numeric and Alphabetic Equivalent grades are listed in the chart below:

Alpha Equivalent	Numeric Grades	Definition	
А	92 - 100	Excellent	
В	83 - 91	Above Average	
С	74 - 82	Average	
D	65 - 73	Below Average	
F	0 - 64	Failure	
Р		Pass	
I		Incomplete	

## NCAA Athletic Eligibility

Pleasant Valley School District makes course recommendations based on the most appropriate academic placement. All students whose future plans include enrolling in college and participating in Division I or Division II athletics must be certified by the NCAA Initial-Eligibility Clearinghouse. It is the responsibility of the student to obtain the most recent evaluation of Pleasant Valley High School's approved course list from the District Web Site, his/her counselor or the NCAA website by <u>clicking here</u>. Course modifications and new courses are submitted to the NCAA yearly. Therefore, it is very important to review yearly for any changes in course approvals and eligibility requirements.

Applications for registering with the NCAA Clearinghouse are available on the district website and are recommended to be completed by the sophomore year. The appropriate time to file this application is during the fall of the sophomore year. An official transcript from the School District must accompany the request for evaluation. If this process is not followed, the student will not be permitted to participate in college athletics during their freshman year.

To students applying for NCAA Division I and II sports: Any credits taken outside of Pleasant Valley School District for either remediation or original credit may not be approved by the

NCAA. It is the responsibility of the student to contact the educational institution to verify whether the course falls under the approved course list for the NCAA. It is also the student's responsibility to obtain a transcript from the educational institution indicating the course, grade, and credit to include in his/her application for NCAA eligibility.

See page 81 for NCAA Athletic Eligibility Information, or go to the Pleasant Valley School District Website under Athletics, or go to the Guidance Office to request a College Bound Student-Athlete Eligibility Guide.

### **Honors Course Selection**

Honors courses are designed to offer a greater depth of instruction at an accelerated pace. Placement into Honors courses is based on exceptional performance or achievement in previous course work. Note that teacher recommendation and standardized test scores also serve as key indicators of potential to meet success in courses maintaining high scholarship standards. Finally, it is also important to recognize that Honors courses place higher demands on a student's time. An ability to work with a heavier than average academic workload is essential. Honors courses will carry a weighted grade.

## Advanced Placement (AP) Courses

Advanced Placement (AP) courses are offered in various subject areas. Advanced Placement courses are college-level courses that use the College Board's approved curriculum to prepare students for the course-ending AP exams. Students must understand that success in any AP course will require extra study time and effort on their part. Most AP courses have a summer assignment that students must complete by the first day of school.

Students are expected to be able to read and understand a college-level textbook. Weekly reading assignments are 30 - 50 pages or more focusing on critical thinking and application of content. The College Board clearly identifies the concepts for mastery of the AP tests. The AP class is essentially on a college level of study as the standards reflect the curriculum taught in many colleges and universities. These objectives, and other information about AP courses, may be found at <u>www.collegeboard.com</u>.

AP Enrollment:

- Any student that wants to enroll in an Advanced Placement course must complete the Advanced Placement Course Request Sheet. This sheet can be found in the Guidance Office.
- Students must express intent to enroll in the AP course.
- Students must possess the willingness to meet the rigors of the course.
- Data Review will occur with a focus on <u>advanced</u> or <u>proficient</u> standardized test results, final course grades, attendance, teacher recommendations.
- All students that take an Advanced Placement course will be required to take the Advanced Placement examination at the end of the course in May. The district will provide financial assistance.
- Any student wishing to drop an Advanced Placement course will need approval of the high school administration.
- Before enrolling in an AP course, it is recommended that students have a minimum of 87% in the prerequisites. Please see the Advanced Placement Course Request Sheet.
- High School administration has final approval for any AP enrollment.

### Summer Work

Completion of summer work is required for all AP/Honors courses, Intro to College English, and all English 9-12 non elective courses. Summer work will be graded and included in the 1<sup>st</sup> marking period overall grade. Students that do not complete the summer work by the first day of school will receive a grade of 0 on these assignments to begin the year. Please see the High School website for the most current information on summer work.

#### **Prerequisites for Courses**

Prerequisites are important when selecting future courses. Students may only request a course if they have taken the prerequisites to get into that course. Administration & school counselors have the right to waive a prerequisite if warranted in certain student circumstances.

## **Drop/Add Procedure**

Any student that wishes to drop a course must do so by the following deadlines (excludes AP Courses):

- Quarter Credit Course: Ten school days.
- Half Credit Course: Fifteen school days.
- Full Credit Course: Twenty school days.

A course change must be based upon academic considerations, and be facilitated by a conference/plan developed by the student, teacher, parent/guardian, counselor and administrator to support student success. This plan may require tutoring, completion of all required work to date, and a sincere demonstration of effort and ability by the student prior to dropping a course or changing the level of a course for all courses.

Advanced Placement Courses:

Any student that wishes to drop an AP course for the 23-24 school year must do so by the following deadline: **June 8th.** 

### Weighted Grades

#### **Advanced Placement Courses.**

Weighted grades are used in Advanced Placement courses to give additional value to the grade earned because of the rigor of the course and the accelerated pace.

<u>Regular Grade</u>	<u>AP Weighted Calculation</u>
A = 92% - 100%	+9 added point value = 101% - 109%
B = 83% - 91%	+9 added point value = 92% - 100%
C = 74% - 82%	+9 added point value = 83% - 91%
D = 65% - 73%	+9 added point value = 74% - 82%
F = 0% - 64%	0 added point value (Students must earn at least a 65% to earn 9 points)

*Example:* A student earns 85% for quarter 1. Their grade will remain an 85% on the report card. The 9 added points will be calculated into the weighted GPA.

#### Honors Courses.

Weighted grades are used in Honors courses to give additional value to the grade earned because of the rigor of the course and the accelerated pace.

<u>Regular Grade</u>	Honors Weighted Calculation
A = 92% - 100%	+5 added point value = 101% - 105%
B = 83% - 91%	+5 added point value = $92\%$ - $97\%$
C = 74% - 82%	+5 added point value = 83% - 88%
D = 65% - 73%	+5 added point value = 74% - 79%
F = 0% - 64%	0 added point value (Students must earn at least a 65% to earn 5 points)

*Example:* A student earns 85% for quarter 1. Their grade will remain an 85% on the report card. The 5 added points will be calculated into the weighted GPA.

### **Class Rank**

Class rank is based on a student's final GPA. The top ten of the graduating class will be calculated once all senior weighted grades are complete.

### Valedictorian and Salutatorian

Eligibility for recognition of Valedictorian and Salutatorian honors will be limited to students who are continuously enrolled at the district's high school for three (3) or more school years immediately prior to the date of graduation. The Valedictorian will be the student with the highest weighted GPA as computed once senior grades are all complete. The Salutatorian will be the student with the second highest weighted GPA as calculated once senior grades are all complete.

## **Honor Roll**

The following criteria shall be used to determine eligibility for the Honor Roll: (Honor Roll is based on the students unweighted grade).

- 1. An Honor Roll student will be one whose marking period average of all grades is 87% or higher and who has not attained a grade lower than 80% in any one subject.
- 2. A Distinguished Honor Roll student will be one whose marking period average of all recorded grades is 92% or higher and who has not attained a grade lower than 85% in any one subject.

## College Credit Opportunities Dual Enrollment

PVHS offers numerous options for students to earn college credit while still in high school. Early college credit provides several benefits:

- Save money and time: by earning enough credits, students can graduate from college in fewer semesters, which saves money and gets you into the workforce or the next level of education faster
- Save stress: with enough credits, students can take fewer courses in a semester and still graduate by their projected date\*

\*College typically takes four years and 120 credits. To graduate in four years, a student needs to take 15 credits (typically 5 courses) per semester. 12 credits (4 courses) is still full time and does

not decrease financial aid. It can, however, decrease stress by providing students more time for completing work outside class, playing a sport, or having a job.

• Gain skills and experience: depending on the credit path you choose, you not only learn advanced content, but also learn time management, how to handle the rigor of postsecondary work, and a little about the scheduling process and course selection as well.

#### College Credit Options:

Concurrent Enrollment: High school courses taught at PV by PV teachers. The course is the same for everyone; students seeking college credit pay tuition (usually at a reduced rate). Concurrent courses are approved by the college and earn both college and PV credit, dependent on student performance. Credits are transferable to another institution, depending on their policies.

- <u>Delaware Valley University</u>
- Harrisburg University of Science and Technology
- Moravian University
- Northampton Community College
- <u>Seton Hall University</u>

Dual Enrollment: College courses open to high school students and taught online, on the college campus, or sometimes at PV with a teacher/coach (PV faculty member) in the classroom & a college professor teaching. Students pay tuition, and the tuition rate varies by school. DE does not earn PV credit but does earn college credit, dependent on student performance. Credits are transferable to another institution, depending on their policies.

- <u>Commonwealth University</u>
- <u>DeSales University</u>
- East Stroudsburg University
- Harrisburg University of Science and Technology
- <u>Northampton Community College</u>

#### Exams: Exams test content knowledge

<u>Advanced Placement (AP)</u>

- 14 different courses offered at PV
- Exams based on course content given annually in May

#### <u>College-Level Examination Program (CLEP)</u>

- 34 different exams offered throughout the year
- Many PV courses cover exam content
- Fills in gaps left by AP courses that don't always run

## Independent Study

An independent study is a course identified by a student in which they wish to explore an area of particular interest, while extending the classroom learning experience. This course needs to have established objectives, a description of the method of study and research to be undertaken, and a manner in which the project will be evaluated. A student interested in pursuing an independent study needs to speak to their school counselor in order to get the process started. In order to be approved for an independent study a student must show academic proficiency, maturity or judgment, strong motivation to learn and self-reliance. All independent studies must be approved by the principal, district

Superintendent, and the School Board. An independent study will be graded as a pass/fail course, and will not be calculated as part of a student's grade point average. Please see School Board policy 118 and included Administrative Regulation for additional information.

## **Course Audit**

Students may choose to enroll in a course on an audit basis under the following conditions:

1. Space is available.

2. Grading for the course will be: O=Outstanding, S=Satisfactory, or U=Unsatisfactory

3. Audited courses cannot be used for credit toward graduation.

4. Permission of the parent/guardian, teacher, school counselor, and principal is required. The teacher will inform the school counseling office.

5. Students enrolled for audit are expected to meet all course requirements.

6. Once enrolled as an audit, the course cannot be considered for credit or any grade other than O, S, U or W (Withdrawn).

7. Students may be withdrawn from an audited course by approval of administration .

## **Remediation School**

If a student plans to remediate a course, they must have earned a 50% or higher in the course they plan to remediate (*Any student under a 50% will need administrative approval*).

Students who fail a required course or are behind in credits must take action to remedy their situation. Students who have failed courses should contact the guidance office. The counselors will advise on available options for their specific situation.

 Students will be able to make up credits utilizing Edgenuity. Students will take an asynchronous cyber course(s) beyond the normal school day hours. This option needs administration approval. Cost is dependent on course credit and is the responsibility of the student.

### **PVSD Career Pathways**

Planning for one's four-year high school course sequence is an exciting and serious undertaking. Within this document, students will find many selections designed to challenge thinking, develop interests, and plan for the future. Therefore, Pleasant Valley High School is proud to offer five **Career Paths** designed to meet the college and career readiness needs of its diverse student population:

- Arts and Communication.
- Business, Finance and Information Technology.
- Engineering and Industrial Technology.
- Human Services.
- Science and Health.

Within each **Career Path**, students will find **Career Clusters**. A **Career Cluster** is a group of jobs and industries that are related by skills or products. Within each Cluster are Cluster "Pathways" that can be related to a collection of courses and training opportunities to prepare students for a given career.

## Career Path---Career Cluster---Career Pathway

The goal of the Career Path approach to learning is to provide a more relevant education for Pleasant Valley students through real world experiences, in various fields and occupations, without giving up all the activities and events that give students a true high school experience.

Raising Career Path awareness begins well before high school. Our students are introduced to Career Paths beginning in elementary school where they focus on career awareness. At the intermediate and middle levels, students explore various career opportunities and begin to complete interest inventories to identify fields of focus. Therefore, when students reach Pleasant Valley High School, they will have a better understanding of their strengths and areas of interest. When students enter the high school, they will be better prepared to choose a Career Path, as well as have the opportunity to change their minds and pursue different paths without the risk of losing credits or the foundational knowledge and skills needed for graduation.

The following Foundational Knowledge and Skills identified within the district Profile of a Graduate will permeate all five **Career Paths**:

- Resiliency.
- Critical Thinking.
- Problem Solving.
- Collaboration.
- Communication.
- Citizenship and Personal Creativity.
- Ethics and Responsibility.
- Academic and Technical Knowledge.

Using their developed career goal, students shall prepare their academic plan with parents and high school counselors. Students may consult the attached planning guide for course alignment and positioning during the four years of their high school career.

For further information on Career Pathways, please refer to the Career Pathways Guide located in the Pleasant Valley High School Guidance Office or you can view it on our website at <u>www.pvbears.org</u>.

## English

English 9 is designed to develop college and career readiness during which students will build foundational skills for effective reading, writing, speaking, listening, and research\*. Students are expected to demonstrate a thorough understanding as they read, write, and discuss both literary and informational texts and use strong, relevant textual evidence to support comprehension, interpretation, analysis, evaluation, and synthesis of texts in a variety of genres and from a variety of cultural, historical, and social perspectives. Students will demonstrate their PA Core Standards-based skills through verbal and written response to reading, the completion of papers and projects, and a variety of academic discussions. Through active engagement with learning activities, students will also develop competencies in collaboration, everyday communication, technology, critical thinking, and problem solving. \*Research will be presented in the latest version of the Modern Language Association (MLA) format.

#### Prerequisites: None

**Required Summer Work.** 

### Honors English 9: 1109 Grade 9 - Year - 1.0 credit

Honors English 9 is designed to further enhance established skills in effective reading, writing, speaking, listening, and MLA format research. Students will demonstrate a sophisticated understanding of a variety of materials via oral and written expression. Students will produce verbal and written responses to texts, several papers and projects, and numerous academic discussions. Students will utilize their skills to support higher-level thinking skills using apt, specific, and sufficient textural evidence from a selection of materials covering various perspectives. Heavy emphasis will be placed on college and career ready skills such as collaboration, communication, technology, critical thinking, and problem solving.

**Prerequisites:** A teacher recommendation from the student's 8th grade English teacher along with a recommended grade of 87% or higher.

#### Summer Work Required.

English 10 is designed to develop college and career readiness during which students will begin to develop skills for effective reading, writing, speaking, listening, and research\*. Students are expected to demonstrate a thorough understanding as they read, write, and discuss both literary and informational texts and use strong, relevant textual evidence to support comprehension, interpretation, analysis,

evaluation, and synthesis of texts in a variety of genres and from a variety of cultural, historical, and social perspectives. Students will demonstrate their PA Core Standards-based skills through verbal and written response to reading, the completion of papers and projects, and a variety of academic discussions. Through active engagement with learning activities, students will also develop competencies in collaboration, everyday communication, technology, critical thinking, and problem solving. \*Research will be presented in the latest version of the Modern Language Association (MLA) format. All 10th grade students enrolled in this course are required to take the Keystone Exam.

#### **Prerequisites:** English 9

#### **Required Summer Work.**

#### Honors English 10: 1110 Grade 10 – Year – 1.0 credit

Honors English 10 is designed for students who have completed and passed 9th grade Honors English. Completion of summer work is required, graded, and included in the 1st marking period overall grade. Students who do not submit their completed summer work by the first day of school will receive a grade of a 0 on the assignment(s). This course is designed to develop college and career readiness. Students will continue to develop skills for effective reading, writing, speaking, listening, and research\*. Students are expected to demonstrate a thorough understanding as they read, write, and discuss both literary and informational texts and use strong, relevant textual evidence to support comprehension, interpretation, analysis, evaluation, and synthesis of texts in a variety of genres and from a variety of cultural, historical, and social perspectives. Students will demonstrate their PA Core Standards-based skills through verbal and written response to reading, the completion of papers and projects, and a variety of student-led academic discussions. Through active engagement with learning activities, students will also develop competencies in collaboration, everyday communication, technology, critical thinking, and problem solving. \*Students will enhance their research skills by completing a variety of assignments in the Modern Language Association (MLA) format, using an assortment of appropriate media sources and strategies. All 10th grade students enrolled in this course are required to take the Keystone Exam.

**Prerequisites:** A teacher recommendation from Honors English 9 along with a recommended grade of 87% or better or a teacher recommendation from English 9 along with a recommended grade of 87% or better.

#### **Required Summer Work.**

English 11 is designed to develop college and career readiness during which students will further develop skills for effective reading, writing, speaking, listening, and research\*. Students are expected to demonstrate a thorough understanding as they read, write, and discuss both literary and informational texts and use strong, relevant textual evidence to support comprehension, interpretation, analysis, evaluation, and synthesis of texts in a variety of genres and from a variety of cultural, historical, and social perspectives. Students will demonstrate their PA Core Standards-based skills through verbal and written response to reading, the completion of papers and projects, and a variety of academic discussions. Through active engagement with learning activities, students will also develop competencies in collaboration, everyday communication, technology, critical thinking, and problem solving.

\*Research will be presented in the latest version of the Modern Language Association (MLA) format.

Prerequisites: English 10

#### **Required Summer Work.**

#### AP English Language and Composition: 1113 Grade 11 – Year – 1.0 credit

The AP English Language and Composition course engages students in becoming skilled readers of both fiction and non-fiction written in a variety of genres, time periods, disciplines, and rhetorical contexts and in developing writing skills for composition in a variety of modes. The course focuses on reading critically, analyzing, and evaluating the rhetorical strategies used by writers and the purposes for the rhetorical choices they make. The readings will also serve as models for student writing. Students use research skills for both projects and papers that follow the documentation format appropriate to the project's or paper's discipline. Students will also analyze and respond to visual texts such as artwork, advertising, and film as both supplements for written texts and as texts themselves. Reading selections are theme-based and address a number of topics from politics to philosophy to memoir, and were chosen based on the list of suggested authors in the AP English Course Description from The College Board.

¢ФР

NCAA

<u>Prerequisite:</u> Admission to the AP program is based on the AP enrollment procedures and a recommended grade of 87% or above in a previous department subject. Students that do not have the recommended grade of 87% or above will need to meet with their counselor. Any student interested in this course should complete the AP Course Request Sheet located in the Guidance Office and bring it with them when they meet with their counselor for scheduling.

#### Required Summer Work.

## English 12: 1212 To Constant Strade 12 – Year – 1.0 credit

English 12 is designed to develop college and career readiness during which students will seek mastery in skills for effective reading, writing, speaking, listening, and research\*. Students are expected to demonstrate a thorough understanding as they read, write, and discuss both literary and informational texts and use strong, relevant textual evidence to support comprehension, interpretation, analysis, evaluation, and synthesis of texts in a variety of genres and from a variety of cultural, historical, and social perspectives. Students will demonstrate their PA Core Standards-based skills through verbal and written response to reading, the completion of papers and projects, and a variety of academic discussions. Through active engagement with learning activities, students will also develop competencies in collaboration, everyday communication, technology, critical thinking, and problem solving. \*Research will be presented in the latest version of the Modern Language Association (MLA) format.

#### Prerequisites: English 11

#### **Required Summer Work.**

## AP English Literature and Composition: 1114 AP 🖗 🍇 🛐 🐼 🌸 🔽 Grade 12 – Year – 1.0 credit

AP English, Literature and Composition course guides students through careful reading, analysis and evaluation of a combination of World, American and English literature encompassing prose, poetry, nonfiction and drama from both pre and post 20th century writers. Through close reading, students deepen their understanding and appreciation of how writers use language to provide meaning and pleasure to their works. The literature studied becomes the basis for developing critical and analytical reading, writing and evaluative skills. As they read, students consider a work's structure, style and themes as well as smaller-scale elements such as the use of figurative language, tone and symbolism. The material included on the AP test will also stand as a frame for the content of the class. Students will write short, analytical essays weekly and formal critical pieces bi-weekly. Students will use research and library skills to compose a formal critical paper following Modern Language Association guidelines criticizing two works from a Nobel Laureate author by the end of the course.

**Prerequisite:** Admission to the AP program is based on the AP enrollment procedures and a recommended grade of 87% or above in a previous department subject. Students that do not have the recommended grade of 87% or above will need to meet with their counselor. Any student interested in this course should complete the AP Course Request Sheet located in the Guidance Office and bring it with them when they meet with their counselor for scheduling.

#### **Required Summer Work.**

#### Introduction to College English: 1812 Grade 12 – Year – 1.0 credit

Introduction to College English is designed to prepare almost proficient students for college English by specifically identifying and addressing the prerequisites of Northampton Community College's English 101 course. Students will engage in critical thinking, reading, and writing in a supportive, collaborative environment. These writing skills include research, reaction/analysis, argumentative, theme-related, and comparison/contrast. Students will learn and apply the strategies and develop the skills needed to understand challenging academic reading and to write academic essays. The students will strengthen their literature skills, vocabulary, grammar, and sentence structure in context with the reading selections and writing. The students are required to complete a research based project and/or oral presentation. Any 11th grade student that enrolls in this class will take College English I & II for 12th grade english.

**Prerequisite:** Students will be selected by PSAT verbal scores, Keystone Literature Exam scores, and counselor/teacher recommendation.

\*This course will fulfill the graduation requirement of English 12 if taken in the high school.

#### **Required Summer Work.**

#### College English I and II: 1813 Grade 12 – Year – 1.0 credit

College English I and II is a combination of two Northampton Community College courses. Students **must** dually enroll in both NCC courses, which carry tuition charges, in order to remain in this class. This class includes college-level reading and writing assignments, study in rhetoric and literary analysis, and independent research. Candidates for this course will already possess strong skills in critical thinking, text analysis, synthesizing sources to defend, refute, or qualify an argument, strategic use of syntax and rhetorical strategy, vocabulary, and grammar. Successful completion of College English I and II, in accordance with NCC guidelines, earns students six transferable college credits. The course is taught by an NCC professor and supported by a PV English teacher who coaches students through their class assignments.

#### From the NCC course catalog: ENGL101 (English I - MP 1, 2)

This course gives close attention to the writing process in various forms of thesis-based writing. The course develops skills in logical and focused writing, through thesis development using supporting ideas and evidence. In addition, students learn to integrate and document information from sources.

#### ENGL151L (English II - MP 3, 4)

Students continue to develop the academic writing and critical reading skills begun in English I. Students may elect to work on introduction to literature (L), report writing (R), or technical writing (T).

\*This course will fulfill the graduation requirement of English 12 if taken in the high school.

**Prerequisite:** Students will be admitted based on PSAT verbal scores, Keystone Literature Exam scores, and counselor/teacher recommendation.

## **English Electives**

### Creative Writing: 1613 Grade 9, 10, 11, 12 - 90 days - .5 credit

The Creative Writing semester course is designed for students to explore the world of writing. Students will write short fiction and short stories from a variety of genres. Each assignment will focus on the importance of a writing technique and literary device and students will explore each in depth, then use them in their writing. Students will read a mentor text that aligns with the writing technique and literary device being taught. Students will analyze and discuss the mentor text and student examples. Students will participate in whole and small group brainstorming. Throughout the course students will review and edit pieces that best demonstrate their perspective as an author to create a portfolio as a final project. As the semester progresses, students will also work to create the PVHS Literary Magazine, The Scrivener. Students will learn about print and web publishing. As submissions are sent in, students will evaluate, discuss, and select pieces for publications . As well as creating a public relations campaign for the magazine's publications at the end of the semester.

Prerequisites: None

#### Film & Literature: 1213 Grade 9, 10, 11, 12 – 90 days - .5 credit

In teaching both literary and filmmaking techniques, this course will use a variety of carefully selected pieces of literature and film to gain an understanding of the relationship between the two mediums. Students will study the history and language of film, its cultural and societal influences and its relationship with literature. It will focus on artistic techniques, such as the use of lighting, camera angles, music and sound, and editing in order to better evaluate a film's success. Students will analyze and submit reviews based on the techniques and devices studied and interpreted as well as engage in collaborative discussions and activities.

Prerequisites: None

Journalism: 1612 Grade 9, 10, 11, 12 - Year – 1.0 credit

This elective is a year-long course in which students design, create, publish and distribute the school's newspaper. Students will study/review the background of newspaper production, content, coverage, layout, design, typography, copy editing, photography, advertising and meeting deadlines. They will create layouts and complete editions of the newspaper, producing an attractive and journalistically sound newspaper. All students will be expected to attend evening sessions when needed. Students must sign a contract stipulating they will act appropriately and commit their time to the creation of the newspaper.

\* BEARS ACADEMY students have the option of selecting this class as one of their electives. It is the responsibility of the family to provide transportation to and from the school. Please contact the PVHS School Counselor about the class' availability.

Application Only Course: Any student interested in taking this course should complete an application located in the Guidance Office and bring it with them when they meet with their counselor for scheduling.

Prerequisites: None

Public Speaking provides instruction and experience in planning and delivering speeches within a public setting. Emphasis is on developing verbal and nonverbal communication skills, preparation, delivery, and evaluation of informative, persuasive, and special occasion speeches. Upon completion, students should be able to prepare and deliver well-organized speeches while also demonstrating the speaking, listening, and interpersonal skills necessary to be effective communicators in academic settings, in the workplace, and in the community.

Prerequisites: None

#### Theater: 1713 Grade 9, 10, 11, 12 – 90 days – .50 credit

Theater focuses on the development of creative skills with an emphasis on speaking and listening through an integration of public speaking and dramatic presentations designed to enhance self-esteem, self-awareness, and self-confidence. Performance in improvisational activities, group activities, scenarios, and team-building games is a major requirement of the course. Further emphasis will be placed on theater in historical context, theater vocabulary, and the basic essentials of acting. Evaluations will consist of assessments of student work as it relates to the improvement of skills.

#### Prerequisites: None

#### Video Production: 1711 Grade 9, 10, 11, 12 – 90 days – .50 credit

The purpose of this course is to give students the opportunity to learn the techniques of video and audio production. The use of production equipment as well as editing software is an integral part of the course. Emphasis, however, is placed on the creation of student generated projects. Students will learn a variety of skills such as script writing, interviewing, production layout techniques, photographic principles, and program planning utilizing a hands-on approach.

#### Prerequisites: None

#### Advanced Video Production 1718 Grade 10, 11, 12- 90 days .50 credit

Advanced Video Production is a follow-up to Video Production where students will build on the skills developed in the prerequisite course. Students will explore techniques to gain a more in-depth understanding of the video production and editing processes through project creation. Each student will learn and develop the skills necessary to plan, organize, write, direct, produce, and evaluate a video program. Emphasis is placed on advancing the pre production process, camera operation, audio techniques, lighting, and editing skills.

Prerequisites: Video Production

#### PVTV: 1719 Grade 10, 11, 12 – Year 1 credit

This class is a follow-up to Video Production where students will build on the skills developed in the prerequisite course to create the daily PVTV broadcast. Students will gain an in-depth understanding of the television production process using studio and television control room equipment, including the video switcher, teleprompter, graphics, audio mixer, and video playback, as well as producing feature news stories.

#### Prerequisites: Video Production

**Application Only Course:** Any student interested in taking this course should complete an application located in the Guidance Office and bring it with them when they meet with their counselor for scheduling.

## Social Studies

American Studies: 2209 🚩 🌌 重 Grade 9 - Year - 1.0 credit

The 9th Grade American Studies course is a social, political, cultural, and intellectual inquiry of United States history. The primary goal is for the students to gain a comprehensive understanding of our national history in relation to the entire world. Students will be exposed to the pageant of history through a variety of teaching-learning methods and activities that include the utilization of technology and the investigation of primary historical documents, images, and artifacts. Students will build logic and reasoning skills, research and information gathering skills, presentation and debate skills, and an understanding of the pluralistic nature of society, as well as our common American heritage.

NCAA

#### Prerequisites: None

## AP United States History: 2109 AP Grade 11, 12 – Year – 1.0 credit

In AP U.S. History, students investigate significant events, individuals, developments, and processes in nine historical periods from approximately 1491 to the present. Students develop and use the same skills and methods employed by historians: analyzing primary and secondary sources; developing historical arguments; making historical connections; and utilizing reasoning about comparison, causation, and continuity and change. The course also provides eight themes that students explore throughout the course in order to make connections among historical developments in different times and places: American and national identity; work, exchange, and technology; geography and the environment; migration and settlement; politics and power; America in the world; American and regional culture; and social structures.

**Prerequisite:** Admission to the AP program is based on the AP enrollment procedures and a recommended grade of 87% or above in a previous department subject. Students that do not have the recommended grade of 87% or above will need to meet with their counselor. Any student interested in this course should complete the AP Course Request Sheet located in the Guidance Office and bring it with them when they meet with their counselor for scheduling.

#### **Required Summer Work**.

### World Studies: 2210 AP Grade 10 – Year– 1.0 credit

World Studies is a course in which students examine world history from the beginning of time through the French Revolution. Students will examine the major events, movements, people, and issues which have shaped the world. Included are an analysis of Prehistory, Fertile River Valley Civilizations, Ancient Civilizations, Ancient Greece, Ancient Rome, The Byzantine Empires, the Middle Ages, Global Exploration, the Renaissance, the Protestant Reformation, the Enlightenment, and the French Revolution. Students will acquire an understanding of the forces shaping the world in which they live. Students use reading and writing strategies, analyze primary and secondary source material, use research and information skills, and actively engage in evaluation, analysis, and synthesis of historical event

#### **Prerequisites:** None

### AP World History: Modern: 2110 Grade 10 – Year – 1.0 credit

In AP World History: Modern, students investigate significant events, individuals, developments, and processes from 1200 to the present. Students develop and use the same skills, practices, and methods employed by historians: analyzing primary and secondary sources; developing historical arguments; making historical connections; and utilizing reasoning about comparison, causation, and continuity and change over time. The course provides six themes that students explore throughout the course in order to make connections among historical developments in different times and places: humans and the environment, cultural developments and interactions, governance, economic systems, social interactions and organization, and technology and innovation.

**Prerequisite:** Admission to the AP program is based on the AP enrollment procedures and a recommended grade of 87% or above in a previous department subject. Students that do not have the recommended grade of 87% or above will need to meet with their counselor. Any student interested in this course should complete the AP Course Request Sheet located in the Guidance Office and bring it with them when they meet with their counselor for scheduling.

\*This course will fulfill the graduation requirement of World Studies.

#### **Required Summer Work.**

American Government: 2211 Grade 11, 12 –90 days - .50 credit

The primary goal of the American government course is for the students to gain a comprehensive understanding of the structure, function, and relevance of American Government and politics. Students will explore the American Government through a variety of teaching-learning methods and activities that include the utilization of technology and the investigation of primary historical documents, and images. Students will build logic and reasoning skills, research and information gathering skills, and presentation and debate skills. Students will gain an understanding of the origins, philosophy, structure, functions and processes of the American political and legal systems that are necessary for productive citizenship.

\*This course is required to graduate. This course can be replaced by AP United States Government and Politics.

Prerequisites: None

AP United States Government and Politics: 2111 AP Grade 11, 12 – Year – 1.0 credit

AP U.S. Government and Politics provides a college-level, nonpartisan introduction to key political concepts, ideas, institutions, policies, interactions, roles, and behaviors that characterize the constitutional system and political culture of the United States. The concepts of constitutionalism, federalism, civil liberties, and civil rights will be emphasized. Students will study U.S. foundational

documents, Supreme Court decisions and other texts and visuals to gain an understanding of the relationships and interactions among political institutions, processes, and behaviors. Students will also engage in disciplinary practices that require them to read and interpret data and primary documents, make comparisons and applications, and develop evidence-based arguments.

\*This course will fulfill the graduation requirement of American Government.

Prerequisite: Admission to the AP program is based on the AP enrollment procedures and a recommended grade of 87% or above in a previous department subject. Students that do not have the recommended grade of 87% or above will need to meet with their counselor. Any student interested in this course should complete the AP Course Request Sheet located in the Guidance Office and bring it with them when they meet with their counselor for scheduling.

# **Required Summer Work.**

# Economics: 2212 T NC44 Grade 11, 12 – 90 days - .50 credit

Economics is designed to introduce the students to the basic economic principles and theories. Emphasis will be placed on American capitalism and how it functions. Some of the selected topics will be: cost analysis, supply and demand in price setting, business organizations and their structures, and an in-depth analysis of competition, monopoly, monopolistic competition, and oligopoly. Students will be expected to interpret and construct graphs, charts, and tables and to analyze statistical information to formulate a conclusion.

# \*This course is required to graduate. This course can be replaced by AP Microeconomics or AP Macroeconomics.

Prerequisites: None

# AP Microeconomics: 2112 AP Grade 11, 12 – Year – 1.0 credit

AP Microeconomics is a college-level course that introduces students to the principles of economics that apply to the functions of individual economic decision-makers. The course also develops students' familiarity with the operation of product and factor markets, distributions of income, market failure, and the role of government in promoting greater efficiency and equity in the economy. Students learn to use graphs, charts, and data to analyze, describe, and explain economic concepts.

\*This course will fulfill the graduation requirement of Economics.

**Prerequisite:** Admission to the AP program is based on the AP enrollment procedures and a recommended grade of 87% or above in a previous department subject. Students that do not have the recommended grade of 87% or above will need to meet with their counselor. Any student interested in this course should complete the AP Course Request Sheet located in the Guidance Office and bring it with them when they meet with their counselor for scheduling.

### **Required Summer Work.**

# AP Macroeconomics: 2114 AP Grade 11, 12 – Year – 1.0 credit

AP Macroeconomics is a college-level course that introduces students to the principles that apply to an economic system as a whole. The course places particular emphasis on the study of national income and price-level determination. It also develops students' familiarity with economic performance measures, the financial sector, stabilization policies, economic growth, and international economics. Students learn to use graphs, charts, and data to analyze, describe, and explain economic concepts.

\*This course will fulfill the graduation requirement of Economics.

**Prerequisite:** Admission to the AP program is based on the AP enrollment procedures and a recommended grade of 87% or above in a previous department subject. Students that do not have the recommended grade of 87% or above will need to meet with their counselor. Any student interested in this course should complete the AP Course Request Sheet located in the Guidance Office and bring it with them when they meet with their counselor for scheduling.

# **Required Summer Work.**

# **Social Studies Electives**

# Criminal Justice: 2414 Grade 11, 12 - 90 days - .5 credit

Criminal Justice is designed to teach students the foundations and processes of the American criminal justice system by providing them with a practical understanding of their legal rights and corresponding responsibilities. Topics covered in this course include elements of crimes, policing, criminal trials, landmark Supreme Court cases and the rights of the accused, and the corrections and juvenile justice systems. At the conclusion of this course, students will be able to interpret and apply the law to their daily lives as well as analyze and evaluate legal disputes.

#### Prerequisites: None

Current Issues is the study of current social, economic and political topics. This course is designed to provide the student with knowledge of contemporary issues that impact the United States and the world. Due to the dynamic nature of the subject matter, this course is characterized by a flexible set of learning outcomes.

# AP Human Geography: 2115 AP NCM Grade 9, 10, 11, 12 – Year – 1.0 credit

AP Human Geography introduces high school students to college-level introductory human geography or cultural geography. The content is presented thematically rather than regionally and is organized around the discipline's main subfields: economic geography, cultural geography, political geography, and urban geography. Culture is firmly embedded into each chapter of the class. Students will learn why people move from place to place, analyze different religions that are practiced throughout the world, discover how food is made and consumed throughout the planet, and explore how, why, and where homes are constructed on our diverse planet. The approach is spatial and problem oriented. Case studies are drawn from all world regions, with an emphasis on understanding the world in which we live today. This will better prepare students to become productive citizens in a growing and complex society. Historical information serves to enrich analysis of the impacts of phenomena such as globalization, colonialism, and human–environment relationships on places, regions, cultural and scapes, and patterns of interaction.

**Prerequisite:** Admission to the AP program is based on the AP enrollment procedures and a recommended grade of 87% or above in a previous department subject. Students that do not have the recommended grade of 87% or above will need to meet with their counselor. Any student interested in this course should complete the AP Course Request Sheet located in the Guidance Office and bring it with them when they meet with their counselor for scheduling.

#### **Required Summer Work.**

# Modern US & World History: 2314 Grade 11, 12 - 90 days - .50 credit

The Modern US & World history course is an in-depth investigation of recent United States and world history from 1960 to the present. The course will trace the social, political, and economic progression of the United States as a global power. Special emphasis will be placed on the events of the Cold War, the successes and failures of various human rights movements, the foreign and domestic policies of presidential administrations from John F. Kennedy to the present, the context and the emergence of the ongoing War on Terror, as well as the evolution of American culture and society. The course will emphasize the relevance of historical events as a means to provide context for a critical analysis of contemporary issues and events.

## Prerequisites: None

Psychology introduces students to the systematic and scientific study of human behavior and mental processes. While considering the psychologists and studies that have shaped the field, students explore and apply psychological theories, key concepts, and phenomena associated with such topics as the biological bases of behavior, sensation and perception, consciousness, emotion and motivation, stress, personality, cognition, learning, and memory. Throughout the course, students employ psychological

research methods, including ethical considerations, as they use the scientific method, evaluate claims and evidence, and effectively communicate ideas.

Prerequisites: None

AP Psychology introduces students to the systematic and scientific study of human behavior and mental processes. While considering the psychologists and studies that have shaped the field, students explore and apply psychological theories, key concepts, and phenomena associated with such topics as the biological bases of behavior, sensation and perception, learning and cognition, motivation, developmental psychology, testing and individual differences, treatment of abnormal behavior, and social psychology. Throughout the course, students employ psychological research methods, including ethical considerations, as they use the scientific method, analyze bias, evaluate claims and evidence, and effectively communicate ideas.

**Prerequisite:** Admission to the AP program is based on the AP enrollment procedures and a recommended grade of 87% or above in a previous department subject. Students that do not have the recommended grade of 87% or above will need to meet with their counselor. Any student interested in this course should complete the AP Course Request Sheet located in the Guidance Office and bring it with them when they meet with their counselor for scheduling.

## **Required Summer Work.**

Sociology: 2412 Grade 11, 12 – 90 days - .5 credit

Sociology introduces students to the systematic and scientific study of social behavior and the structure and development of society based on the critical analysis of contemporary social issues. This course examines basic sociological principles, concepts, and theories, including an investigation of human culture, the socialization process, social institutions, various types of stratification including class, racial/ethnic, gender, and other cultural issues, as well as the presence of deviance, crime, and violence within society. The course places a heavy emphasis on the causes, consequences, and possible solutions to problems associated with families, schools, workplaces, communities, and the environment. Students will not only learn how to approach the human world from a sociological perspective, but also how to take action and achieve social change.

## Prerequisites: None

## Introduction to College Economics: 2213 Grades 11, 12 - - Year - 1.0 credit

This course will explore fundamental principles of economics, various concepts and tools in economic analysis, and the thought process and reasoning of economics. Emphasis will be placed on theory, practice, history, and policy foundations concerning contemporary economic issues. The course will be conducted on the basis of lectures, classroom discussions, outside readings, and thoughtful analysis of students. Upon successful completion of this course with at least a C average, students will be awarded three credits at Seton Hall University per the Articulation Agreement between the Pleasant Valley School District and Seton Hall University.

Prerequisites: None

# The United States to 1865: 2310 Grades 11, 12 - - Year - 1.0 credit

This course covers the colonization of North America and the first century of the United States. Important themes will include the establishment of colonies and imperial competition; cultural exchange among diverse Europeans, Natives, and Africans; the role of dispossession and slavery in colonial and later national expansion; the American Revolution and the creation of republican institutions; the development of democracy and capitalism amid the early nineteenth century; and the significance of slavery and westward expansion (including Indian removal and the United States-Mexican War) in creating national divisions that culminated in the Civil War and, ultimately, the abolition of slavery. Upon successful completion of this course with at least a C average, students will be awarded three credits at Seton Hall University per the Articulation Agreement between the Pleasant Valley School District and Seton Hall University.

## Prerequisites: None

# Mathematics

# Algebra I: 3209 🗭 🚾 Grade 9, 10, 11 – Year – 1.0 credit

Algebra I consists of a study of the real number system, sets, variables, open sentences, axioms, negative numbers, equations, sentences in two variables, factoring, rational and irrational numbers and problem-solving using variables. The emphasis is on the structure of real numbers, algebraic concepts, deductive reasoning, and precision of language.\**Note: All students enrolled in this course are required to take the Keystone Exam.* 

## Prerequisites: None

# Algebra IA: 3309 T Grade 9 – Year – 1.0 credit

Algebra IA will begin with a review of basic mathematical operations with real numbers and a review of certain Pre-Algebra topics. The course will then move to the study of patterns in Algebra, operations in Algebra, writing and solving equations, inequalities, and absolute value functions, proportional reasoning, and linear functions, Applications of real-world problems will be emphasized. (Course requirements include: tests, quizzes, projects, presentations, notebook, daily homework, and usage of calculators.) It is highly recommended that each student have a calculator. The pacing of this course will provide time to review and cement fundamental skills and spiral the algebraic concepts learned.

# Algebra IB: 3310 🔽 Grade 10, 11 – Year – 1.0 credit

Algebra IB will begin with a basic review of Algebra 1A with topics such as writing and solving equations and inequalities. Applications of real-world problems will be emphasized. The course will then move to the study of graphing linear equations, factoring, systems of equations, and data analysis. (Course requirements include: tests, quizzes, projects, presentations, notebook, daily homework, and usage of calculators.) It is highly recommended that each student have a calculator. The pacing of this course will provide time to review and cement fundamental skills and spiral the algebraic concepts learned. **\*Note: All students enrolled in this course are required to take the Keystone Exam.** 

Prerequisites: Algebra 1A

Algebra Foundations: 3415 Grade 10, 11, 12 – 90 days – .5 credit

Students are placed in this course by considering multiple data points. The aim of the course is to prepare students to be more successful on the SAT, PSAT & Keystone Exams. In addition, it will assist students with academic success. Students in this course will take the Keystone Exam for accountability purposes.

**Prerequisites:** Students have previously taken either Algebra I or Algebra 1B and are placed in the Algebra Foundations course to ensure student success with the graduation pathways.

# Algebra II: 3210 🚩

#### Grade 10, 11 - Year - 1.0 credit

NC44

Algebra II is primarily an extension of Algebra I. However, a more rigorous approach is taken in the study of the real number system. The first part of the course involves real number concepts and skills, the solution of linear equations and inequalities, solving verbal problems, properties of polynomials, and rational expressions. The second part of the course deals with relations and functions, irrational numbers and quadratic relations.

Prerequisites: Algebra I or Algebra IB.

Honors Algebra II: 3110 Grade 9, 10 – Year – 1.0 credit

The Honors Algebra II course is both accelerated and enriched. In addition to the topics delineated in Algebra II 3210, the students will be challenged by higher-order thinking problems, equations and graphs, conic sections and logarithms.

Prerequisites: A teacher recommendation from the student's Algebra I teacher along with a recommended grade of 87% or higher.

## **Required Summer Work.**

Geometry is a course that emphasizes logical reasoning, spatial visualization skills, and their application to problem solving. Students are expected to write two column deductive formal proofs, and use algebraic skills to set up and solve problems based on geometric representation. Additionally, students will solve problems related to plane, solid and coordinate geometry.

Prerequisites: Algebra I, Algebra 1B.

# Honors Geometry: 3111/3111V Grade 9, 10, 11 – Year – 1.0 credit

The Honors Geometry course accelerates the pace and enhances the depth of the regular Geometry curriculum. Geometry is a course that emphasizes logical reasoning, spatial visualization skills, and their application to problem solving. Students are expected to write two column deductive formal proofs, and use algebraic skills to set up and solve problems based on geometric representation. Additionally, students will solve problems related to plane, solid and coordinate geometry. Students enrolled in Honors Geometry must have a final average of 87% or above in Algebra I & an Algebra I teacher recommendation.

**Prerequisites:** A teacher recommendation from the student's Math teacher along with a recommended grade of 87% or higher.

**Required Summer Work.** 

Probability & Statistics: 3214 Grade 11, 12 – Year – 1.0 credit

Probability & Statistics poses a challenge to the analytic mind. Students will learn topics such as descriptive statistics, normal distributions, sampling, confidence intervals, hypothesis testing, correlation, regression, and probability. Students should have adequate reading comprehension skills.

Prerequisites: Algebra I or Algebra 1B

AP Statistics: 3113 AP Statistics: 3113 AP Statistics: 3113

The purpose of this college level course is to introduce students to the major concepts and tools for collecting, analyzing, and writing extensive conclusions from various, real world, word problems. Students are exposed to four broad conceptual themes: Exploring Data: Describing patterns and a departure from patterns; Sampling and Experimentation: Planning and conducting a study; Anticipating Patterns: Exploring random phenomena using probability and simulation; Statistical Inference: Estimating population parameters and testing hypotheses.

**Prerequisite:** Admission to the AP program is based on the AP enrollment procedures and a recommended grade of 87% or above in a previous department subject. Students that do not have the

recommended grade of 87% or above will need to meet with their counselor. Any student interested in this course should complete the AP Course Request Sheet located in the Guidance Office and bring it with them when they meet with their counselor for scheduling.

# **Required Summer Work.**

Trigonometry: 3215 Grade 11, 12-Year – 1.0 credit

Trigonometry is designed to reinforce Algebra and Geometry skills/concepts while introducing students to more advanced mathematical topics. Students will learn about circular functions, trigonometric functions, fundamental identities, trigonometric equations, solutions of triangles, and applications of trigonometry.

Prerequisites: Algebra II & Geometry.

Honors-Pre-Calculus: 3112 Grade 11, 12 – Year – 1.0 credit

Pre-Calculus introduces and reinforces many of the ideas basic to success in calculus. Some of the topics studied are equation solving, functions and graphing, trigonometry, logarithms, sequence and series, and limits

**Prerequisites:** A teacher recommendation from the student's Math teacher along with a recommended grade of 87% or higher in Algebra II.

## **Required Summer Work.**

This course is intended to be on a level with a typical college calculus class. The topics covered are those typically found in the first semester and some of the second semester of a college level calculus course. This includes functions, graphs, limits, rate of change, differentiation, applications of the derivative, integration, applications of integration, and transcendental functions. A calculator from the TI-84 family of calculators is recommended for this course. Students are expected to have a strong background (minimum grade of a "B") in Honors Algebra 2, Honors Geometry, and Honors-Pre-Calculus. This course consists of a full academic year of work in calculus and topics covered in courses at the college level.

Prerequisite: Admission to the AP program is based on the AP enrollment procedures and a recommended grade of 87% or above in a previous department subject. Students that do not have the recommended grade of 87% or above will need to meet with their counselor. Any student interested in this course should complete the AP Course Request Sheet located in the Guidance Office and bring it with them when they meet with their counselor for scheduling.

# **Required Summer Work.**

This course is intended to be on a level with a typical college calculus class. The topics covered are those typically found in the first two and one half semesters of college level calculus courses. Topics include a review of all AB topics as well as advanced methods of integration, additional applications of integration, transcendental functions, differential equations, convergence and divergence of sequences and series, Taylor polynomials, polar equations, vectors and parametric equations. Students are expected to have a strong background (minimum grade of a "B") in Honors Algebra 2, Honors Geometry, Honors Pre-Calculus and AP Calculus AB. Graphing calculators will be used extensively in the course and are required on the Advanced Placement examination. A calculator from the TI-84 family of calculators is recommended for this course.

**Prerequisite:** Admission to the AP program is based on the AP enrollment procedures and a recommended grade of 87% or above in a previous department subject. Students that do not have the recommended grade of 87% or above will need to meet with their counselor. Any student interested in this course should complete the AP Course Request Sheet located in the Guidance Office and bring it with them when they meet with their counselor for scheduling.

#### **Required Summer Work.**

#### Introduction to College Mathematics: 3512 Grade 12 – Year – 1.0 credit

Students will complete mathematics coursework to prepare for the transition from PVSD to college. Students will use real numbers to explore the following topics: solving linear, polynomial, ratios, absolute value, and radical equations, inequalities, graphing functions, problem solving, solving systems of linear equations, operations using and simplifying exponents, factoring polynomials, simplifying rational and radical expressions. Note: Students will complete the curriculum of Northampton Community College courses: MATH 022 (Elementary Algebra) and MATH 026 (Intermediate Algebra). NCC will acknowledge completion of the MATH 022 course for PVSD students who earn a score of 73% or higher on the MATH 022 final exam. NCC will acknowledge completion of the MATH 026 final exam.

Prerequisite: Successful completion of Algebra I & II.

#### AP Computer Science Principles: 7115 Grades 11, 12 – Year – 1.0 credit

Computer Science Principles offers a multidisciplinary approach to teaching the underlying principles of computation design. The course will introduce students to the creative aspects of programming, abstractions, algorithms, large data sets, the Internet, cyber security concerns, virtual reality and computing impacts. AP Computer Science Principles also gives students the opportunity to use current technologies to create computational artifacts for both self-expression and problem solving. Together, these aspects of the course make up a rigorous and rich curriculum that aims to broaden participation in the art of computer science.

Prerequisite: Admission to the AP program is based on the AP enrollment procedures and a recommended grade of 87% or above in a previous department subject. Students that do not have the recommended grade of 87% or above will need to meet with their counselor. Any student interested in this

course should complete the AP Course Request Sheet located in the Guidance Office and bring it with them when they meet with their counselor for scheduling.

## **Required Summer Work**.

# Science

Biology is a required science course for high school graduation. It will focus on basic biological concepts. The course will explore the nature of science, biochemistry, bioenergetics, cellular transport, cell biology, and genetics, ecological principles, and evolution. This course aligns with the recommended biology curriculum standards outlined through the PA Department of Education, as well as the outlined standards for the Biology Keystone Exam. Successful completion of this course ensures students are prepared to take the Keystone Assessment in Biology.

\*Note: All students enrolled in this course are required to take the Keystone Exam.

Prerequisite: None

# Honors Biology: 4100 Grade 9, 10 – Year – 1.0 credit

Honors Biology is a first year Biology course that will emphasize important content in preparation of the Biology Keystone Exam, while meeting the needs of advanced learners. Students will develop a deep body of knowledge about the structures, functions, and changes that differentiate living organisms from non-living systems. Students will develop an understanding of cell structure and function, genetics, ecology, and the embedded evolutionary evidence that explains biological relationships. \*Note: All students enrolled in this course are required to take the Keystone Exam.

**Prerequisite:** A teacher recommendation from the student's 8th grade science teacher along with a recommended grade of 87% or higher.

#### **Required Summer Work.**

# Biology Foundations: 4200 Grade 10, 11, 12 – 90 days – .5 credit

Students are placed in this course by considering multiple data points. The aim of the course is to prepare students to be more successful on the SAT, PSAT & Keystone Exams. In addition, it will assist students with academic success. Students in this course will take the Keystone Exam for accountability purposes.

Prerequisites: Students have previously taken Biology and are placed in the Biology Foundations course to ensure student success with the graduation pathways.

AP Biology is offered to highly motivated academic students who are college bound. Students are assessed primarily through the required laboratory work and examinations similar to the College Board AP Exam. The primary emphasis of AP Biology is focused on developing a deep understanding of biological concepts, understanding and application of the scientific process, integration of the major themes of biology, and critical thinking about environmental and societal issues. Candidates for the course should have successfully completed both Biology and Chemistry. All accepted students must complete summer assignments. Failure to complete summer work, results in a zero for those assignments. Students may not drop or transfer into another course due to failing to complete the summer work. Students are required to take the advanced placement examination in May.

**Prerequisite:** Biology & Chemistry. Admission to the AP program is based on the AP enrollment procedures and a recommended grade of 87% or above in a previous department subject. Students that do not have the recommended grade of 87% or above will need to meet with their counselor. Any student interested in this course should complete the AP Course Request Sheet located in the Guidance Office and bring it with them when they meet with their counselor for scheduling.

#### **Required Summer Work.**

# Elements of Chemistry: 4117 Grade 10, 11, 12 – Year – 1.0 credit

This course introduces the basic concepts of chemistry and their application in the everyday world to prepare students with the knowledge necessary to safely use and choose products for use at home and on the job, and focuses on qualitative and descriptive chemistry as well as the practical use of chemistry in our daily lives. Students will learn concepts in class through lab experiences, projects, tests, and common applications. Topics covered will include subjects that students can expect to encounter in daily life such as chemistry related to the human body, diet and nutrition, health and fitness, drugs, beauty products, fireworks, the environment, household products, lawn and garden care, and the basic background information needed to understand each.

## Prerequisites: Algebra I

This is a college preparatory course designed to prepare students to meet the challenges of college-level Chemistry successfully. Students planning to major in science in college should choose Honors Chemistry. Topics such as classification of matter, atomic structure, nomenclature, stoichiometry, bonding, kinetics, and equilibrium will be explored in the course.

## Prerequisite: Algebra I & Biology

# Honors Chemistry: 4116 Grade 10, 11, 12 – Year – 1.0 Credit

This is an elective course designed to meet the needs of the academically superior student who intends to pursue a science or math related degree in college. This class is a required prerequisite for AP Chemistry (Chemistry cannot replace Honors Chemistry to meet this criteria). Much emphasis is placed on the quantitative aspects of chemistry and the ongoing development of the ability to think critically and logically. This course is rapid-paced and demands that the student has well developed independent study skills. Students are expected to spend a minimum of five hours per week in individual study outside of the classroom. Students are required to produce computer generated lab reports and writing assignments throughout the duration of the course. Topics such as quantum theory, chemical formulas, equations, and reactions, stoichiometry, gasses, and bonding are explored. Candidates for Chemistry

**Prerequisite:** A teacher recommendation from the students Honors Biology teacher along with a recommended grade of 87% or better in Honors Biology & Honors Algebra II or a teacher recommendation from the students Biology teacher along with a recommended grade of 87% or better in Biology & Algebra I.

**Required Summer Work.** 

# **Science Electives**

# AP Chemistry: 4111 AP Chemistry:

AP Chemistry is a college level chemistry course. This course is rapid-paced and demands that the student has well developed independent study skills. Students are expected to spend a minimum of five hours per week in individual study outside of the classroom. Students are required to produce computer generated lab reports and writing assignments throughout the duration of the course.

**Prerequisite:** Algebra II. Admission to the AP program is based on the AP enrollment procedures and a recommended grade of 87% or above in a previous department subject. Students that do not have the recommended grade of 87% or above will need to meet with their counselor. Any student interested in this course should complete the AP Course Request Sheet located in the Guidance Office and bring it with them when they meet with their counselor for scheduling.

## **Required Summer Work.**

## Agriculture & Organic Farming: 4421 Grade 11, 12 – 90 days – .50 credit

This course is designed to introduce students to the world of agricultural science and the foods we eat. Students will learn the principles of farming and how increasing world population influences the production of food. There will be an emphasis on topics such as; the growing organic food movement, genetically modified organisms, hydro-culture and aquaculture. Other biological principles will include the history and effects of pesticides and herbicides, the structure and function of plants and animals, genetics, physiology, ecological relationships, and animal behavior. A large portion of the course will be spent performing hands-on laboratories, projects and growing and utilizing plants in the high school greenhouse.

Prerequisite: Biology.

Honors Anatomy/Physiology: 4113 Grade 11, 12 – Year – 1.0 credit

Honors Anatomy/Physiology is organized around the basic structure and function of the human body. The course will cover an introduction to human anatomy and physiology, an overview of tissues, and an in-depth study of the eleven systems of the body. Laboratories and dissections will illustrate the concepts presented during lectures. During the course, students will complete projects. Laboratory reports and writing/analysis assignments.

**Prerequisites:** Teacher recommendation and a recommended grade of 87% or higher in Biology or Chemistry.

## **Required Summer Work.**

Earth and Space Explorations: 4321 Grade 9, 10, 11, 12 – 90 days - .50 credit

This class focuses on life science, physical science and earth/space science. Within these areas topics include learning about the physical structure and chemical development of the Earth, its spheres, and its environment over time including the formation of the universe and Earth's place in space, and how they influence life on the planet. Topics will include physical, chemical and biological nature of the geosphere, biogeochemical cycles, geologic time, formation of the universe and solar system, interactions between the Earth, Moon and Sun and how they affect life on the planet. This lab based course is taught in an investigative manner by teachers in the science department using hands-on laboratory experiences and students should expect to participate in lab design, data analysis, and student-led research and to become familiar with data analysis techniques.

Prerequisite: None

Grade 10, 11, 12 - Year - 1.0 credit

Ecology is designed for students interested in learning more about their local environment. The material will focus primarily on the flora and fauna of Pennsylvania's diverse ecosystems. Topics covered throughout the semester include ecological relationships, ecosystem structure and function, the ecology of

natural systems, and issues. Four major units will be discussed: forestry, raptors, mammals, and aquatics.

#### Prerequisite: Biology

# Grade 11, 12 - Year - (1.0 credit Brick & Mortar, .5 credit Bear's Academy)

Environmental Science is a college preparatory course designed for students intending to pursue a college career. The course will cover topics relevant to students pursuing a wide variety of college majors, including: the sciences, engineering, law, politics, economics, writing, and business. This course will focus on topics covered in the PA State standards for environment and ecology, and will include sustainability, water management and pollution, atmosphere management and pollution, renewable and nonrenewable energy resources, environmental health, agriculture and society, ecosystems and their interactions, biodiversity, humans and the environment, and environmental laws and regulations.

Prerequisite: Biology and Chemistry

# AP Environmental Science: 4114 AP NC44 Grade 11, 12 – Year – 1.0 credit

AP environmental Science is a college level introductory environmental science course. This course uses an interdisciplinary approach and information from the natural sciences (geology, biology, chemistry, geography, meteorology, ecology and environmental science, etc.) the social sciences (civics, political science, economics, ethics, etc.) and the humanities (literature) to study the Earth's systems and the role humans have in those systems. Topics of study include: sustainability, biodiversity, conservation, population management, natural resources (food, soil, water, atmosphere, geological, energy), environmental quality (species stability, human health, water and atmosphere pollution waste). This is a laboratory science class where students can expect to become proficient in various field techniques, data analysis, and lab report writing skills. Students are required to take the Advanced Placement examination in May.

**Prerequisite:** Completion of Biology & Chemistry. Admission to the AP program is based on the AP enrollment procedures and a recommended grade of 87% or above in a previous department subject. Students that do not have the recommended grade of 87% or above will need to meet with their counselor. Any student interested in this course should complete the AP Course Request Sheet located in the Guidance Office and bring it with them when they meet with their counselor for scheduling.

#### **Required Summer Work.**

Forensic Science: 4422 Grade 11, 12 – 90 days - .50 credit

Forensic Science is an introduction to the methods and principles guiding crime scene investigation and forensic analysis. It will focus on the collection, identification and laboratory techniques of crime scene

evidence. Emphasis will be placed on the methods that link the suspect, victim, and crime scene. Laboratory exercises and topics will include: fingerprint and handwriting analysis, firearms and ballistics, blood typing, glass analysis, hair and fiber examination, and DNA analysis. Other topics will include: current events, entomology, anthropology, the history of forensic science and case studies involving the psychology of serial murderers. When available, the Pennsylvania State Police Forensics Department will visit and collaborate with students. Students with career interests in Law Enforcement, Criminology or Criminal Justice are recommended to take this course.

#### Prerequisite: Biology and Chemistry

#### Exploring Oceanography & Meteorology: 4322 Grades 9, 10, 11, 12 -90 days - .5 credits

This class focuses on life science, physical science and earth/space science. This course is designed to study fundamental physical, chemical and biological principles related to the oceans and atmosphere. This lab based class taught by our science teachers will provide a basic understanding of fluid dynamics of the hydrosphere, cryosphere, and atmosphere and their interactions with the biosphere. Topics will include oceanography, marine biology, factors that influence climate and weather, with a focus on how these concepts influence life on Earth. Students should expect to participate in lab design, data analysis, and student led research and to become familiar with data analysis techniques.

Prerequisites: None

# Physics: 4212 Grade 11, 12 - Year – 1.0 Credit

The physics elective is a college preparatory course consisting of introductory consideration of mechanics, properties of matter, waves, and electricity/magnetism. Due to the emphasis on quantitative study, students should have successfully completed or be concurrently enrolled in trigonometry to elect this course.

**Prerequisite:** Currently enrolled in or past completion of Trigonometry.

# AP Physics 1: Algebra Based: 4115 AP Grade 11, 12 - Year – 1.0 Credit

This course is equivalent to a first-semester college course in *algebra-based* physics. It covers Newtonian mechanics (including rotational dynamics and angular momentum); work, energy, and power; mechanical waves and sound. This course will prepare students for the AP Physics 1 exam in May. Due to the emphasis on quantitative study, students should have successfully completed or be concurrently enrolled in pre-calculus to elect this course.

**Prerequisite:** Currently enrolled in or past completion of pre-calculus. Admission to the AP program is based on the AP enrollment procedures and a recommended grade of 87% or above in a previous department subject. Students that do not have the recommended grade of 87% or above will need to meet with their counselor. Any student interested in this course should complete the AP Course Request Sheet located in the Guidance Office and bring it with them when they meet with their counselor for scheduling.

# **Business, Computer, & Information Technology**

# Accounting I: 6310 Grade 9, 10, 11, 12 – 90 days – .5 credit

"Show me the money!" Accounting, the "language of business", is highly recommended for any student planning on pursuing a career in the business world. Accounting I students will acquire a working knowledge of financial statements, their analysis, and the accounting cycle for various types and sizes of business organizations. The Aplia website will be easily used for students to complete their working papers from home or on the go.

Prerequisites: None

# Accounting II: 6311 Grade 10, 11, 12 – 90 days – .5 credit

This intermediate accounting course builds on the foundations students created in Accounting I and expands students' understanding of more complex accounting concepts. Accounting for corporations and departmentalized businesses are major components of this course. Students will continue to use both manual and automated accounting systems. Any student who plans on majoring in a business related field in college would find this course an excellent background for their college study of accounting.

Prerequisites: Accounting I

## Entrepreneurship: 6414 Grade 9, 10, 11, 12 – 90 days - .5 credit

Have you ever wanted to have your own business or run a business for someone else? This course will take a student step-by step through the process of starting and running a business. Students will learn what it takes for a business to survive in today's world through simulations, mentor guest speakers, and current trends in the business market. Leadership styles of successful entrepreneurs will be discussed and analyzed. The course will conclude with each student creating a business plan and "Shark Tank" competition. The course will utilize an on-line simulation to enhance the Entrepreneurship experience.

## Prerequisites: None

# Introduction to Business: 6409 Grade 9, 10, 11, 12 – 90 days - .5 credit

How does the world of money, being a consumer, our economic system, career awareness, and business stock market influence the global economy? This course will enhance your skills sets to investment, money management, basic understanding of economic systems, basics of organizing your personal finances, plan for the future, and create projects applying the role of business concepts and how social media impacts our world. Online Simulations enhance this course.

# Introduction to Law for Business and Personal Use: 6411 Grade 10, 11, 12 – 90 days – .5 credit

This half credit course provides students with an understanding of the legal framework of our society. The topics covered include the history, development and classification of laws, personal and business law related to everyday life, contract law, the court system and courtroom procedures, legal terminology, constitutional rights, ethics, technology law, intellectual property, and social responsibility. Students will also explore various mock trials and their outcomes. Students planning on majoring in business or law should take this course.

Prerequisites: None

Personal Finances: 6511 Grade, 10, 11, 12 - 90 days - .5 credit

YOU GOT MONEY? This course is designed to reveal money skills sets, enhancing your awareness opportunities in our financial systems. You will investigate banking, stock market skills, investments, credit, budgets, savings, taxes, renting and buying property. Projects will encourage students to handle future finances and outstanding financial planning for the future needs and wants. It is a course that is ESSENTIAL FOR ALL STUDENTS. Online simulations will accompany this course.

**Prerequisites:** Introduction to Business

Marketing In Today's Society: 6614 Grade 9, 10, 11, 12 - 90 days - .5 credit

Marketing is an essential part of business! It is all around us and ever changing. This course is designed to show the students the essentials of marketing in today's society including social media. This course is introducing the students to how marketing plays a role in today's society including the marketing mix, promotional concepts and displays. This will be introduced through hands-on activities in a variety of subject areas such as sports and entertainment as well as a business format.

#### Prerequisites: None

#### Computer Programming: 6209 Grade 9, 10, 11, 12 90 days - .5 credit

Learn a new valuable skill for the workforce. Computer Science is where the new potential jobs in the future are going to be. Learn the beginning and intermediate skills needed to enter the programming field. It's your turn to write commands to enable the computer to create a program! In this course you will use SCRATCH and Code HS to program creative games. You will learn the basics of C++ Loops, Booleans, if statements, conditions, and more advanced features.

# Advanced Computer Programming: 6213 Grade 11, 12 – 90 days – .5 credit

This course will reinforce the techniques of structured sequential, selection, prepetition, functional-based programming, but will teach advanced techniques of class-based programming features. Microsoft Visual C++ and other basic programming languages will be used to learn the coding structures and program flow of a computer program. Students will create a comprehensive programming project throughout the marking period and a digital portfolio. Successful completion of Computer Programming is required for enrollment in this course. A strong background in math is highly recommended.

#### Prerequisites: Computer Programming

# Career Planning and Financial Literacy: 6512 Grade 9– 90 days – .5 credit

This course provides instruction in two vital areas to meet state requirements for both Career Education and Work readiness as well as Personal Finance skills. Students will hone valuable skills in everyday communication, effective study habits, and time management. They will create, follow, and refine a post-high school plan and curate artifacts that meet graduation requirements. Additionally, through the personal finance component of the course, students will learn money skills and enhance awareness of opportunities in our financial systems. They will investigate the stock market, investments, credit, and taxes. Projects will encourage students to handle future finances including basic banking, budgets, and bill paying as well as renting/buying property.

## Prerequisites: None

# **Physical Education and Health**

# Wellness & Health I: 0309 T Grade 9, 10– 90 days – .5 credit

The main objective of the physical education program is to motivate students to engage in physical activity in a manner that promotes health and physical well-being over one's lifetime. Individual student performances are evaluated in the five fitness components, personal goals are set, and responsible decision-making is encouraged. Activity selections include individual and team sports, personal fitness and leisure activities. Students who are physically capable to participate in regular and adapted programs are required to successfully complete the four year program.

The second part of this course is designed, through a conceptual approach, to provide a wide scope of health related issues to be examined, analyzed, and evaluated through concepts of health: impact of growth and development during adulthood, impact of body systems and applying protective/prevention strategies, adult nutritional choices, issues relating to use/non-use of drugs, factors that influence the prevention and control of health problems.

## Prerequisites: None

# Wellness & Health II: 0310 T Grade 9, 10– 90 days – .5 credit

The main objective of the physical education program is to motivate students to engage in physical activity in a manner that promotes health and physical well-being over one's lifetime. Individual student performances are evaluated in the five fitness components, personal goals are set, and responsible decision-making is encouraged. Activity selections include individual and team sports, personal fitness and leisure activities. Students who are physically capable to participate in regular and adapted programs are required to successfully complete the four year program.

The second part of this course is designed, through a conceptual approach, to provide a wide scope of health related issues to be examined, analyzed, and evaluated through the aspects of healthy living and safety and injury prevention: health care products and services, adult health consumer choices, media's effects on adult personal health and safety, decision making process for short and long term health goals, interrelationship between environmental factors and community health, personal and legal consequences of unsafe practices in home, school and community, injury management, violence on the victim and surrounding community, benefits, risks and safety factors associated with self-selected life-long physical activities.

Prerequisites: None

11th & 12th grade students are required to take two of the following courses to graduate. Physical Education class (Advanced Wellness) that includes one of the following: Responding to Emergencies, Aerobic Cardio Fitness, Weightlifting, or Exercise Physiology/Nutrition.

Advanced Wellness & Responding to Emergencies: 0311 Grade 11/12– 90 days – .5 credit

The main objective of the physical education program is to motivate students to engage in physical activity in a manner that promotes health and physical well-being over one's lifetime. Individual student performances are evaluated in the five fitness components, personal goals are set, and responsible decision-making is encouraged. Activity selections include individual and team sports, personal fitness and leisure activities. Students who are physically capable to participate in regular and adapted programs are required to successfully complete the four year program.

The second part of this course is an American Red Cross comprehensive First Aid/CPR/AED program that is designed to help students recognize and respond appropriately to cardiac, breathing and first aid emergencies. This course will teach students the knowledge and skills needed to give immediate care to an injured or ill person and to decide whether advanced medical care is needed. Students will become certified in First Aid, AED, and CPR for infants, children, and adults. Included in the framework of the course will be classroom and practical experiences. Students are responsible for the cost of the certification card, related reference materials they keep and course supplies.

# Prerequisites: Completion of Wellness & Health I and Wellness & Health II

# Advanced Wellness & Weightlifting: 0312 T Grade 11/12– 90 days – .5 credit

The main objective of the physical education program is to motivate students to engage in physical activity in a manner that promotes health and physical well-being over one's lifetime. Individual student performances are evaluated in the five fitness components, personal goals are set, and responsible decision-making is encouraged. Activity selections include individual and team sports, personal fitness and leisure activities. Students who are physically capable to participate in regular and adapted programs are required to successfully complete the four year program.

The second part of this course is weight training and will give the student the opportunity for regular, supervised workouts while learning lifting techniques and safety. Muscle structure and movement will be taught along with specific lifts, which develop each muscle group. Health related fitness activities will be done to include cardiorespiratory endurance, muscular strength and endurance, flexibility and body composition. Students have the opportunity to design and develop an appropriate personal fitness program that enables them to achieve a desired level of fitness. Ongoing assessment includes both written and performance-based skill elevations. This course can replace a student's 11th or 12th grade physical education requirement.

Prerequisites: Completion of Wellness & Health I and Wellness & Health II

Advanced Wellness & Aerobic Cardio Fitness: 0313 Grade 11/12– 90 days – .5 credit

The main objective of the physical education program is to motivate students to engage in physical activity in a manner that promotes health and physical well-being over one's lifetime. Individual student performances are evaluated in the five fitness components, personal goals are set, and responsible decision-making is encouraged. Activity selections include individual and team sports, personal fitness and leisure activities. Students who are physically capable to participate in regular and adapted programs are required to successfully complete the four year program.

The second part of this course is Aerobic/Cardio Fitness and will provide the student with regular workouts as well as knowledge about aerobic exercise. A variety of workout types will be explored in keeping with current fitness trends. Nutrition and calorie awareness will be discussed. The student will learn how to develop a personal workout program. Ongoing assessment includes both written and performance-based skill evaluations. This course can replace a student's 11th or 12th grade physical education requirement.

Prerequisites: Completion of Wellness & Health I and Wellness & Health II

# Advanced Wellness & Exercise Physiology/Nutrition: 0314 T Grade 11/12– 90 days – .5 credit

The main objective of the physical education program is to motivate students to engage in physical activity in a manner that promotes health and physical well-being over one's lifetime. Individual student performances are evaluated in the five fitness components, personal goals are set, and responsible decision-making is encouraged. Activity selections include individual and team sports, personal fitness and leisure activities. Students who are physically capable to participate in regular and adapted programs are required to successfully complete the four year program.

The second part of this course is Exercise Physiology/Nutrition and will incorporate weight training and conditioning techniques that implement various training principles and theories of exercise science. Students will become cognizant of the scientific aspect as well as "use" progressive resistance exercise, flexibility training, plyometric techniques, and aerobic conditioning. Participation in this class will aid student performance in lifelong activities and athletics while encouraging physical fitness throughout the year. Students will be evaluated through testing in strength and fitness, journal logs, completion of required assignments and knowledge of principles being studied. The student must keep in mind that they will be re-evaluated by the teacher each year in order to be considered for continuation of this class. Due to the physical requirements of this class, it is strongly recommended that student-athletes taking this course enroll for the class in their off-season.

Prerequisites: Completion of Wellness & Health I and Wellness & Health II

# World Languages

The skills of listening, speaking, reading and writing foreign language, and the appreciation of various cultures are developed in the following world language courses. A minimum of a two-year sequence of the same world language is recommended for all students planning to continue with post-secondary education. Also, before beginning or continuing with foreign language study, it is recommended that the student is reading at or above grade level in English.

# German I: 5209

Grade 9, 10, 11, 12 - Year - 1.0 credit

German I is designed to provide a foundation in the study of the German language and its culture. Students will learn vocabulary and various grammatical concepts as the year progresses, as well as German culture. The four goals emphasized in this course are listening, reading, speaking, and writing. German Exploratory is highly recommended prior to enrollment in this course.

This course continues the study of the German language. A review of German I vocabulary, grammar, and cultural concepts will be addressed. The four goals of listening, reading, writing, and speaking will continue to be emphasized.

#### Prerequisites: German I

Grade 10, 11, 12 – Year– 1.0 credit

German III is an elective course designed to provide a basis in language proficiency and cultural awareness. It is strongly suggested for higher learning/college preparatory students and wholeheartedly recommended for career-comprehensive students for their personal enrichment as well as for practical preparation for various vocational fields. The course emphasizes vocabulary relating to everyday life situations, timely pronunciation via the study of phonetics, the various grammatical components needed to build a complete and correct sentence, and the cultural entities involved in the countries where the target language is spoken. Daily lessons will encompass the aspects of listening, speaking, reading, and writing the language.

Prerequisites: German II

German IV is an elective course designed to provide a basis in language proficiency and cultural awareness. It is strongly suggested for higher learning/college preparatory students and wholeheartedly recommended for career-comprehensive students for their personal enrichment as well as for practical preparation for various vocational fields. The course emphasizes vocabulary relating to everyday life situations, timely pronunciation via the study of phonetics, the various grammatical components needed to build a complete and correct sentence, and the cultural entities involved in the countries where the target language is spoken. A genuine attempt will be made to encompass the aspects of listening, speaking, reading, and writing the language.

Prerequisites: German III

# AP German Language & Culture: 5213 AP Grade 12 – Year – 1.0 credit

The German Advanced Placement Program is intended for students who want to develop their foreign language proficiency and is predominantly taught in German. Students who enroll should have a strong knowledge of the language and culture, and should have attained proficiency in listening comprehension, speaking, and writing. All accepted students must complete required summer reading, projects, analysis, and writing assignments. **Prerequisite:** Admission to the AP program is based on the AP enrollment procedures and a recommended grade of 87% or above in a previous department subject. Students that do not have the recommended grade of 87% or above will need to meet with their counselor. Any student interested in this course should complete the AP Course Request Sheet located in the Guidance Office and bring it with them when they meet with their counselor for scheduling

#### **Required Summer Work.**

#### Grade 9, 10, 11, 12 - Year - 1.0 credit

Spanish I is designed to provide a basis in language proficiency and cultural enrichment by completing the first half of the textbook, Paso a Paso. Basic vocabulary from the Spanish Exploratory class will be reviewed. As the course progresses, students will learn grammar structures (such as verb tenses) in addition to gaining new vocabulary to achieve a basic understanding of the Spanish Language and Culture. The class emphasizes everyday life vocabulary, pronunciation via the study of phonetics, and various grammatical and cultural components. An enhanced linguistic fluency and appreciation for diverse cultures will prepare students well beyond their high school years. Spanish Exploratory is highly recommended prior to enrollment in this course.

Prerequisites: None

# Spanish II: 5110

Grade 9, 10, 11, 12 - Year - 1.0 credit

This course will further the study of the Spanish language by completing the second half of the Paso a Paso I textbook. Initially, Spanish I concepts such as present tense and thematic vocabulary will be reviewed. As the course progresses, the student will learn more complex grammar structures (such as preterit and imperfect tenses) in addition to gaining new vocabulary related to each chapter.

Prerequisites: Spanish I

Spanish III: 5111 Grade 10, 11, 12 – Year – 1.0 credit

This course is an intermediate level language class which will further the study of the Spanish language by expanding vocabulary and cultural knowledge. Basic vocabulary will be reviewed as well as significant grammar structures from Spanish I and II. As the course progresses, the student will learn more complex grammar structures (such as present subjunctive mood, imperative, preterit tense, imperfect tense, future tense and conditional tense), as well as add new vocabulary.

Prerequisites: Spanish II

Spanish IV: 5112 Grade 11, 12 – Year – 1.0 credit This course has been designed to give students the opportunity to review several grammar concepts learned in Spanish III and to learn new verb conjugations and vocabulary through reading, writing, and oral activities. The textbook that is required for this course is Paso a Paso (second section); the topics included in the textbook relate to real-life situations. Many of the activities allow the students to express their own views on topics and questions of interest through dialogues and role playing.

Prerequisites: Spanish III

# AP Spanish Language & Culture: 5113 AP Grade 12 – Year – 1.0 credit

The Spanish Advanced Placement Program is intended for students who want to develop their foreign language proficiency and is predominantly taught in Spanish. Students who enroll should have a strong knowledge of the language and culture, and should have attained proficiency in listening comprehension, speaking, and writing. All accepted students must complete required summer reading, projects, analysis, and writing assignments.

NCAA

**Prerequisite:** Admission to the AP program is based on the AP enrollment procedures and a recommended grade of 87% or above in a previous department subject. Students that do not have the recommended grade of 87% or above will need to meet with their counselor. Any student interested in this course should complete the AP Course Request Sheet located in the Guidance Office and bring it with them when they meet with their counselor for scheduling

#### **Required Summer Work.**

# **Visual** Arts

Students interested in any art-related career should schedule the **Foundations in Art** courses early, so that they have ample time to schedule the Advanced Arts, and the Advanced Placement Studio Art Honors courses. Students need to develop a quality portfolio for most college admissions evaluations. The other art courses are complementary to this art track and can be taken at any grade level. You may not gain admittance to the National Art Honor Society without first successfully completing Foundations in Art.

#### Foundations in Art: 7116 Grade 9, 10, 11, 12 – 90 days - .5 credits

Students will receive a comprehensive introduction to art through this course which includes both studio art work and art history. Students will learn how to apply the design elements and principles to create realistic artworks. This foundational course will teach hands-on drawing techniques and color theory, including observation methods to render images. Students will also use a more mechanical method using compasses and rulers through mathematical constructions to illustrate objects realistically. An exploration of linear perspective demonstrates how to create the illusion of depth in architectural drawings.Students will also research, evaluate, and respond to art techniques, styles, and periods throughout the Western World. A thorough investigation of civilization's art will provide links to current trends. Students will learn to appreciate the social importance of art found throughout history.

# Advanced Drawing & Painting: 7111 Grade 10, 11, 12 – Year – 1.0 credit

Students will build upon the Color and Design and Freehand Drawing courses. This program emphasizes strengthening technical and creative skills and providing exposure to even more types of drawings and paintings that span different periods of art history from around the globe. This course is intended to enhance student's abilities in drawing and painting through experimentation in a variety of media. Students will be encouraged to develop their own personal creative vision, while working on refining their artistic skills through traditional studies. Students' experience will include some of the following: pencil, marker, pen and ink, chalk pastels, oil pastels, charcoals, scratchboards, watercolors, acrylics, and mixed media. Emphasis on drawing from observation will be used in developing all artwork whether it involves design, realistic pictures or imaginary work. Strong composition and quality craftsmanship in personal solutions to project lessons will determine the major portion of the student's grade.

#### Prerequisite: Foundations in Art, and/or Color and Design with Freehand Drawing

#### Graphic Design: 6114 Grade 9, 10, 11, 12 – 90 days – .5 credit

Students will be taught the basic concepts behind advertising and print documents. Students will use photo editing software to create media used in marketing products. Students will learn basic concepts needed to create a well-balanced document. Students will create flyers, brochures, invitations, posters, calendars, logos, announcements, and much more. Students will learn how to create effects that will catch the eye of the consumer to create an effective advertisement. Students will have a chance to use the digital camera in order to create digital media that they will then manipulate for the purpose of advertisement and print documents.

#### **Prerequisites:** None

## Advanced Mixed Media: 7112 Grade 10, 11, 12 – 90 Days – .50 credit

This course will focus on learning the art of Glass cutting and forming through kiln work techniques. Students will explore the historical, cultural and conceptual aspects of glass media. Using a variety of methods students will learn how glass can have both textural and sculptural qualities that extend beyond the flat surface.

## **Prerequisite:** None

# AP Art & Design Program: 7113 AP Grade 11, 12 – Year – 1.0 credit

The advanced placement program in Studio Art enables students to perform on the college level manipulating every 2-D and 3-D medium available, earning the additional 9 honors points. Students are offered the encouragement to create as well as investigate the formal and conceptual avenues in art production. It emphasizes making art as an ongoing process to focus on three areas: quality and craftsmanship, concentration, and breadth. Students will have completed a body of art work suitable for

submission to any art college or university. Students will be eligible and are required to take the advanced placement examination in May.

Prerequisite: Students must have completed two of the following: Foundations in Art, Color and Design, Freehand Drawing, or Advanced Drawing and Painting, and/or show proficiency in Ceramics, Sculpture or Photography. Admission to the AP program is based on the AP enrollment procedures and a recommended grade of 87% or above in a previous department subject. Students that do not have the recommended grade of 87% or above will need to meet with their counselor. Any student interested in this course should complete the AP Course Request Sheet located in the Guidance Office and bring it with them when they meet with their counselor for scheduling

#### **Required Summer Work.**

# AP Art History: 7114 AP Grade 11, 12 - Year – 1.0 credit

The AP Art History course should engage students at the same level as an introductory college art history survey. Such a course involves critical thinking and should develop an understanding and knowledge of diverse historical and cultural contexts of architecture, sculpture, painting and other media. It also provides an opportunity for schools to strengthen an area neglected in most curricula. In this course, students examine and critically analyze major forms of artistic expression from the past and the present from a variety of cultures. While visual analysis is a fundamental tool of the art historian, art history emphasizes understanding how and why works of art function in context, considering such issues as patronage, gender, and the functions and effects of works of art. Many colleges and universities offer advanced placement and/or credit to students who perform successfully on the AP Art History Exam.

**Prerequisite:** Admission to the AP program is based on the AP enrollment procedures and a recommended grade of 87% or above in a previous department subject. Students that do not have the recommended grade of 87% or above will need to meet with their counselor. Any student interested in this course should complete the AP Course Request Sheet located in the Guidance Office and bring it with them when they meet with their counselor for scheduling

#### **Required Summer Work.**

#### Digital Photography: 7209 Grade 9, 10, 11, 12 – 90 days - .5 credit

This course is an introduction of digital photography, image editing, and photographic techniques. During this eighteen week course an understanding of the processes and concepts that take place in the digital lab will be developed. Creating interesting and strong compositional images with the camera will be stressed. The student photographer will expand their knowledge and vocabulary as it relates to both traditional and contemporary photography. As studio work and the study of master photographers come together, awareness as to the role of photography in the world of visual arts will be acquired. High quality cameras, tripods, studio lighting, and Photoshop will enhance the digital experience.

## Color and Design: 7211 Grade 9, 10, 11, 12 – 90 days - .5 credit

Students will apply color theory to create two-dimensional compositions by manipulating images to develop patterns, designs and abstractions. Various mediums, such as colored pencils, markers, pastels and paint, will be explored throughout the course. Color psychology will be studied and applied to understand how color can dramatize a design or artwork. The final project will be a painting that demonstrates good use of color mixing.

#### Prerequisites: None

#### Computer Animation & 3D Design: 7117 Grade 9, 10, 11, 12– 90 Days - .5 credits

This course is designed to bring together storytelling, character and environment design to create digital animations. Students will learn animation skills with the same technology that is used by professionals in the media and entertainment industry. Students will design in three-dimensional, virtual space and build a working knowledge of the basic tools used in computer modeling and rendering. Students will use many different digital tools within these programs to manipulate virtual images to build volumetric objects. Finished projects may then be rendered through either two-dimensional digital or printed images, or three-dimensional models using a 3-D printer.

Prerequisites: None

Freehand Drawing: 7213 Grade 9, 10, 11, 12 – 90 days - .5 credit

Any person can draw! This course provides the basic skills for art students and non-art students to draw successfully. Students will learn a natural sequence of drawing techniques, mostly from life sources. Some emphasis will be placed on inventive and imaginative artworks.

## **Prerequisites:** None

Introduction to Ceramics: 7310 Grade 9, 10, 11, 12 – 90 days - .5 credit

This course provides an introductory exposure to the history of ceramics and a beginning level experience in the use of clay as a fine art medium. The emphasis of the course is the understanding and manipulation of clay through hand building with experiences in glazing, surface development, and basic kiln operations. Both the functional and sculptural ceramic traditions will be explored.

Prerequisites: None

Yearbook Production: 1512 Grade 10, 11, 12 – Year – 1.0 credit

Students in the course will create our printed yearbook. In this course, students will gain skills in page design, copywriting, editing, photography, record keeping, time management, teamwork, marketing, and

leadership skills. This includes the basics of photography, camera usage, and compositional skills. We will also focus on layout and page design. Writing assignments will include interviewing techniques, caption writing, and printed story methods, including polls, surveys, feature stories, and headline construction. In addition, we will focus on ethics in journalism, including libel, copyright, and proper use of trademarked materials. A special emphasis will be on staying organized, teamwork, critiquing, editing, and meeting authentic deadlines. Assignments will be within the school and extend into the community. Editors will take a larger role in theme selection, page layout and creation, decision-making, and developing teamwork amongst their fellow students.

**Prerequisites:** Successful completion of Digital Photography, Journalism, or Creative Writing, as well as a minimum GPA of 87.

**Application Only Course:** Any student interested in taking this course should complete an application located in the Guidance Office and bring it with them when they meet with their counselor for scheduling.

#### Advanced Ceramics: 7311 Grade 9, 10, 11, 12 – 90 days - .5 credit

This course provides students with the opportunity to use their prior knowledge and experience for deeper and broader understanding of clay. Students will continue to develop technical skills and will be challenged as artists creatively.Students will produce clay works in response to a personal investigation in technique, form and function. Mastery of hand building will complement proficiency on the potter's wheel. Research in contemporary trends will provide motivation for students to develop a personal style in three-dimensional form.

## Prerequisite: Introduction to Ceramics.

# Introduction to Sculpture: 7312 Grade 9, 10, 11, 12 – 90 days - .5 credit

Students will experience and control a variety of sculpture media, including current arts related technologies. Students will evaluate, interpret, and analyze sculpture based on historical content, construction techniques, effective use of elements and principles, and aesthetic significance. Students will analyze the expressive potential of sculpture media, techniques and processes. Students will practice safe and responsible use of art media, equipment, and studio space. Students will analyze and compare sculptures using a variety of aesthetic approaches.

# Music

Acceptance into the music program is based upon student and parent understanding that evening performances are required as well as special uniforms, costumes, make-up, etc. Students are expected to comply with these course requirements.

#### Concert Band: 7520 Grade 9, 10, 11, 12 - Year - 1.0 credit

The high school concert band is composed of students from the 9<sup>th</sup>, 10<sup>th</sup>, 11<sup>th</sup>, and 12<sup>th</sup> grades who have had previous instrumental training at the elementary or middle school level, and are musically and emotionally prepared for intermediate and advanced musical training and development. The expectation of this class is to have everyone participate in a culminating successful evening performance at both the winter and spring concerts. Band students receive approximately one weekly 45-minute lesson on a rotating basis.

\* BEARS ACADEMY students have the option of selecting this class as one of their electives. It is the responsibility of the family to provide transportation to and from the school. Please contact your PVH School Counselor about this class' availability.

#### Prerequisites: None

Piano Lab: 7513 Grade 9, 10, 11, 12 – 90 days – .5 credit

Piano Lab is a hands-on method for learning about music. Students will learn to interpret and perform music notation, signs, and symbols through class song literature. Students will play on classroom keyboards. No prior musical skills are necessary to be successful in this course. Students who already play piano will be given challenging supplemental solos to perform.

Prerequisites: None

AP Music Theory: 7515 AP Grade 10, 11, 12 - Year – 1.0 credit

The AP Music Theory course introduces students to musicianship, theory, musical materials and procedures. The course integrates aspects of melody, harmony, texture, rhythm, form, musical analysis, elementary composition and , to some extent, history and style. Musicianship skills such as dictation and other listening skills, sight-singing, and keyboard harmony are considered an important part of this theory course. The student's ability to read and write musical notation is fundamental to such a course. It is also strongly recommended that the student will have acquired at least basic performance skills in voice or on an instrument.

**Prerequisite**: Admission to the AP program is based on the AP enrollment procedures and a recommended grade of 87% or above in a previous department subject. Students that do not have the recommended grade of 87% or above will need to meet with their counselor. Any student interested in this course should complete the AP Course Request Sheet located in the Guidance Office and bring it with them when they meet with their counselor for scheduling

#### **Required Summer Work.**

#### Acoustic Guitar: 7615 Grade 9, 10, 11, 12 – 90 days - .5 credit

This course provides students with the history and fundamentals of music and acoustic guitar playing. Students will have the opportunity to study and perform various genres of guitar music, including rock and music of today. Topics covered include music history, parts of the guitar, care of the instrument, tuning, note reading, strum techniques, chord and tablature reading, and guitar performance. Instruments are provided in class and are not required for home. No prior guitar experience is necessary.

Prerequisites: None

Concert Chorus: 7620 Grade 9, 10, 11, 12 – Year – 1.0 credit

The student enrolled in Chorus will learn to interpret music notation, signs and symbols, perform choral music of various styles and periods of music, and perform in public concerts. Students will also learn how to develop good vocal tone through choral exercises. No audition is required, just a desire to sing. \* BEARS ACADEMY students have the option of selecting this class as one of their electives. It is the responsibility of the family to provide transportation to and from the school. Please contact your PVH School Counselor about this class' availability.

Prerequisites: None

Basic Music Theory: 7616 Grade 9, 10, 11, 12 – 90 days – .5 credit

Students in this class will learn all the basics of music theory which include reading notes on the musical staff, rhythms, scales, and chords. This course is recommended for students who want to learn more about how to read music and play songs. It is recommended that you play an instrument or be able to sing prior to taking this course. This course is a great introduction to AP Music Theory.

#### Prerequisites: None

#### Vocal Techniques (Sing Like an Idol): 7713 Grade 9, 10, 11, 12 – 90 days – .5 credit

This course is designed for group instruction for the voice. Students will interpret music notation, signs and symbols through vocal performance. They will develop healthy vocal tone habits and expand their vocal range. They will also sing vocal solos from a variety of styles and periods of music including classical music, folk songs, jazz, and Broadway. Students will develop performance skills by performing for others in class.

#### Prerequisites: None

#### Music Appreciation (From Bach to Rock): 7714 Grade 9, 10, 11, 12 – 90 days – .5 credit

Students will trace the evolution of music from Gregorian chant to modernism to late 20<sup>th</sup> century music. Students will recognize what constitutes music as opposed to mere sound and identify the principal

instruments for making music. Students will interpret the characteristics of the leading styles in the history of western music, in which the major musical forms have developed. Students will relate historical events with musical events and their effect upon composers and their compositions.

Prerequisites: None

# Family and Consumer Science

#### Foods - Baking: 5510 Grade 9, 10, 11, 12 – 90 days – .5 credit

In this course students will gain hands-on experience in baking things such as breads, rolls, and various pies and pastries. Food safety, nutrition, proper measuring techniques, and mixing methods are also addressed. Students will gain experience in planning and preparing by identifying the necessary ingredients and proper equipment needed to prepare a dish.

#### Prerequisites: None

Foods and Nutrition: 5511 Grade 9, 10, 11, 12 – 90 days – .5 credit

Foods & Nutrition is designed to introduce the student to the world of food. Many areas of foods are studied such as fruits, vegetables, meats, and poultry. Students select recipes to prepare from each of these types of foods. Food safety, nutrition, proper measuring techniques, and mixing methods are also addressed. Students will gain experience in planning and preparing by identifying the necessary ingredients and proper equipment needed to prepare a dish.

Prerequisites: None

Home and Interior Design: 5512 Grade 9, 10, 11, 12 – 90 days - .5 credit

Students will be provided with a basic knowledge of how to choose a place to live, basic home planning and construction details, individual room plans with furniture arrangement and color selection. Cultural and historical influences on today's homes will be considered. The main focus of this course is the creation of a student portfolio which will contain scaled drawings, furniture selection, color selections, painting techniques, and finishes. A basic knowledge of math is needed.

#### Prerequisites: None

#### Child Development: 5513 Grade 10, 11, 12 – 90 days – .5 credit

The Child Development course intends to help students evaluate their attitudes toward children and understand the responsibilities of becoming a parent and/or caregivers of children. The course includes the study of pregnancy through childbirth. Students will also study the emotional, social, intellectual, and physical development stages of children from infancy through the preschool years.

Prerequisites: None

#### Early Childhood Development and Learning: 5514

# Grade 11, 12 - 1 Year - 1 credit PV/3 Credits NCC

This course provides an introduction to child development theories and milestones from prenatal to age 9 in the context of cultural and developmental variations. Students learn inclusive teaching skills and strategies including English Language Learners (ELL). Students identify the value of developing respectful, reciprocal relationships with families and community partners to support learning. Art as a Way of Learning® (AWL) as a curriculum framework is introduced. Professional conduct in the context of the NAEYC Code of Ethics are also explored. Observational field experience hours outside of class are required. Early childhood majors must complete and submit clearance paperwork as required by the Pennsylvania Department of Education.

This course corresponds to Northampton Community College's EARL106 course, and is part of a new Early Childhood Education pathway for high school students who are possibly interested in teaching young children to begin coursework and earning college credits while still in high school.

#### Prerequisites: None

Consumer Resource Management: 5520 Grade 9, 10, 11, 12 – 90 days – .5 credit

Consumer Resource Management prepares individuals to understand the values, needs, wants, goals, and resources that enable youths and adults to make rational decisions that contribute to family stability and quality of life. It includes instruction in budgeting and spending plans, use or credit, savings, investment, taxes, consumer buying, and consumer rights and responsibilities.

#### Prerequisites: None

Creative Sewing: 5620 Grade 9, 10, 11, 12 – 90 days - .5 credit

Sewing skills taught in this course include various sewing applications, the use of patterns, sewing machines, and hand sewing techniques. Students will have the opportunity to select and complete projects for personal use, decorating and home interior design.

#### Prerequisites: None

#### Family Living 5621 - Grade 9, 10, 11, 12 – 90 days – .5 credit

Family Living provides students the opportunity to discuss topics such as the role of families in society, cultural similarities and differences, values and goals, dating and relationships. Students will learn how to improve communication skills, resolve conflicts, cope with stress, adapt to change and handle crisis situations.

# Industrial Technology Education

#### Wood I: 8109

#### Grade 9, 10, 11, 12 - 90 days - .5 credit

The purpose of this course is to emphasize the safe operation of woodworking machines, equipment and hand tools. Processes such as the manufacturing of construction and cabinet lumber, coated abrasives and finishing products are also discussed in detail. Selected projects built are designed toward the technical processes involved rather than the complexity of the project. Students enrolling in Wood I do not need prior experience in woodworking. Please note that students are responsible for the cost of project materials and other associated costs (about \$20-30 depending on the project).

Prerequisites: None

#### Wood II: 8110 Grade 10, 11, 12 – 90 days– .5 credit

Wood II is designed to emphasize furniture and cabinet making through advanced machine, portable equipment and hand tool use. Woodworking and technology related careers are discussed throughout the course. Furniture processes such as frame and panel door construction and cabinet-drawer construction are discussed in detail. Student projects are selected and designed to meet criteria in each of the areas discussed. The students will be responsible for the cost of the project materials and other associated costs. Note: You will be highly encouraged to source your own materials from local "Lumber Yards" and / or other vendors. Students are responsible for the cost of project materials and any other associated costs. Projects can range in price from about \$20 - \$50 to well over \$100.

#### Prerequisite: Wood I

## Wood Mastery: <mark>8112</mark> Grade 11, 12 - Year – 1.0 credit

Wood Mastery is intended to provide the student with the opportunity to expand upon their wood working skills by emphasizing precision and creativity. Students will have the option to produce a lathe turning, inlay multi colors of wood and carve or shape wood. Wood Mastery will incorporate the use of various materials, such as plastics, metals and laminates. This course will provide knowledge and craftsmanship required in producing various historical furniture and other forms of woodwork. Qualified candidates must also be willing and able to source, pick up and transport their own materials for their projects. A valuable part of the woodworking experience is going to the "Lumber Yard" and selecting your own materials. (You will no longer be able to simply use the lumber in the storage closet.) Students are responsible for the cost of project materials and any other associated costs. Projects can range in price from about \$20 - \$50 to well over \$100.

#### Prerequisite: Wood I and II

#### Electricity: 8116 Grades 9, 10, 11, 12 - 90 days – .5 credit

Electricity introduces students to the basics of electricity, how it is produced and how it is utilized in our everyday lives. Students will need a strong understanding of algebra and some scientific principles to apply to electricity. They will understand and apply the laws in electricity such as Ohm's Law and

Kirkoff's law while learning and creating different types of circuits. Throughout the course, they will be introduced to influential people and careers such as engineering (aeronautical, industrial, and electronic), auto mechanics, diesel mechanics, aviation mechanics, heating, and refrigeration. This class is especially helpful to students who are planning to study physics. Students will also learn various basic home wiring skills, components of electronics, basic soldering skills and apply basic theories as they construct small electronic - 51 - projects. Students will be responsible for the cost of these projects that they build.

#### Prerequisites: None

# Metal I: 8209 Grade 9, 10, 11, 12 - 90 days- .50 credit

Metal I will help students develop a knowledge of the physical and chemical properties of common metals found in consumer products. Students will perform basic operations in the areas of sheet metal fabrication and welding, with an emphasis on applied math and science. This course provides the basic knowledge essential to many occupations such as sheet metal fabrication, welding, mechanics (auto, diesel, and aviation), engineering (mechanical, metallurgical, industrial, and aeronautical), industrial design, and heating and plumbing. Students will construct a sheet metal project that emphasizes craftsmanship and problem-solving skills. Students will be responsible for the cost of project materials and other associated supplies (about \$10-15).

#### Prerequisites: None

# Metal II: 8210 Grade 9, 10, 11, 12 – 90 days – .50 credit

The Metal II curriculum will help students develop knowledge of the foundry, heat treating, lathe & milling machine, with an emphasis on applied math and science. This course also provides the basic knowledge essential to many occupations such as welding, tool and die making, mechanics (auto, diesel, and aviation), engineering (mechanical, metallurgical, industrial, and aeronautical), industrial design, and heating and plumbing. Students will machine a small project. They will also design & construct a project of their own choice that emphasizes craftsmanship and problem-solving skills. Students will be responsible for the cost of project materials and other associated supplies (about \$10-15).

Prerequisite: Metal I

#### Metal III: 8211 Grades 10, 11, 12 – 90 days - .50 credit

Metal III will allow students to further enhance their knowledge of the physical and chemical properties of common metals found in consumer products. Students will be introduced to oxy-acetylene welding and heating, brazing and soldering and learn how to create a sand mold and produce aluminum castings while emphasizing applied math and science. This course will provide the students an opportunity to then create individualized projects based on their interest essential to many occupations such as sheet metal fabrication, welding, mechanics (auto, diesel, and aviation), engineering (mechanical, metallurgical, industrial, and aeronautical), industrial design, and heating and plumbing. Students will construct projects that emphasize craftsmanship and problem-solving skills. NOTE: Students must also be willing to source and pick up their own materials for this class.

#### Prerequisite: Metal I and II

#### Principles of Architecture: 8117 Grades 9, 10, 11, 12 - 90 days - .5 credit

Throughout Principles of Architecture, students will be challenged daily through the lens of architectural history. Students will study architectural styles from the prehistoric times through the Classical Era continuing to the present day. Students will be introduced to the design process and will identify how inventions and innovations throughout history are utilized to enhance technology we have today. The students will work hands-on through the construction of physical projects as well as generating various presentations. Finally, the course will introduce students to construction principles and how various systems of a home are designed to work effectively and efficiently.

#### Prerequisites: None

Introduction to Robotics: 8218 Grade 9, 10, 11, 12 – 90 - .5 credit

Combining the best parts of science, math, and technology; students will control LED's, sensors, and motors through coding. The curriculum walks students through the design and building of their robots while presenting them with relevant STEM and coding principles. The class is coding centered while students also design and build circuits and robots. The class will include the basics of various robots and present the student with challenges that their programming will help complete. Students will need adequate computer skills as well as math ability to be successful in this class.

Prerequisites: None

#### Advanced Robotics: 8220 Grade 9, 10, 11, 12 – 90 - .5 credit

After successful completion of Introduction to Robotics, students will dive further into the world and abilities of robotics. They will continue to apply concepts and skills learned from Introduction to Robotics to develop more detailed and specific programs that the robots will perform. The class will include the Vex robot, One-Bot mobile robot, and a programmable drone. Robots will compete in sumo-bot, sweeper-bot, maze, line following, and other challenges.

**Prerequisites:** Introduction to Robotics & recommended that students possess a strong understanding of computer skills and programming.

# **Special Education Services and Programs**

In the Commonwealth of Pennsylvania, special education regulations are found in Chapter 14 & Chapter 16 of the State School Code, as well as within the federal law, Individuals with Disabilities Education Act (IDEA). A student who meets the eligibility requirements for special education services has the right to participate in the general education curriculum in the regular education classroom in the Least Restrictive Environment (LRE) to the maximum extent possible. The program of support and services is described in a student's Individualized Education Plan (IEP) and/or Gifted Individualized Education Plan (GIEP). Providing a Free and Appropriate Public Education (FAPE) for a student with a disability begins with the consideration of services in the LRE. The organization and delivery of special education services are planned as a student centered team in a flexible and responsive manner to accommodate the student's

special needs of eligibility without removing the student, unnecessarily, from the general education curriculum in the regular education classroom. Supplementary aids and services received by the student are dependent on his/her individual needs and identified within their IEP or GIEP. The Pleasant Valley School District supports and seeks to provide inclusive opportunities for all students following state and federal guidelines.

Students shall participate in the general education curriculum in the regular education classroom to the maximum extent appropriate. Instruction may be accommodated, adapted, or modified. To this end, the Pleasant Valley School District provides a full continuum of services and programs. Eligible students may be provided instruction through supplemental curricula and services. Service/program options may be considered when the program of study must be intensified in order to meet the student's overall needs.

As students look to the future, Transition planning for students holding an IEP begins at age 14. The IEP team will decide what courses will best prepare the student for life after high school through the transition planning process. The IEP team, including the student and parent will plan transition activities to prepare the student for post-high school experiences. Discussions during transition planning may include: college or post-high school planning; employment exploration; and independent living, including recreation or leisure activities. The transition planning encourages a coordinated effort between present and future goals of the student. Students are encouraged to prepare for a post-high school education, whether it is college or a trade/technical school. Students who are considering college are encouraged to take both the PSAT and SAT assessments, with or without accommodations. Some students may elect a vocational curriculum and attend the Monroe Career & Technical Institute (MCTI) which offers a wide range of programs and industry based certifications.

All students receiving special education services are guaranteed the right for the opportunity to earn a high school diploma. The IEP and/or GIEP Team determines how a student will be awarded a diploma. Most pointedly, the eligible student must successfully complete all required courses and credits, as well as meet performance standards on curriculum based assessments or through the IEP transition goals.

# **Co-Taught Courses**

Co-teaching is a research-based philosophy for helping students in need of academic intervention and designed to assist students in meeting the increased literacy demands required for career and college readiness. Co-taught classes have two teachers who share responsibility for the teaching of all students assigned to the classroom. For example, a content area certified teacher, such as in English or mathematics, and a special education certified teacher.

The purpose of a PV High School Co-Teaching classroom is to provide quality instruction to academically at-risk students (those not currently showing proficiency) in a high expectations-high supports environment. The program is designed to deliver standards-based instruction aligned to the PA academic standards and district graduation requirements, with high levels of support in place to meet those requirements. High levels of support include adaptations such as a concept-oriented focus, alternative methods of instruction and assessment, and more intensive student/teacher contact time.

Students will be supported in their Core Learning courses while developing personal skills in an engaging setting. Classroom roles and responsibilities are defined, targeted individualized support is provided to students, curriculum is delivered on grade level with appropriate adaptations and modifications and the pervasive belief that effort produces achievement.

As aforementioned, there are two teachers in the co-taught classes. Each teacher has a different but equally important role, as they work together with the students to promote academic growth and success. These teachers have equal responsibility for planning and instruction. All students are held to high expectations and are given high levels of support from both teachers.

# **Gifted Support**

### Gifted Support: 9509 Grade 9, 10, 11, 12, 90 days - .5 credit

Gifted support will be scheduled by the school counselor upon completion of student schedules. Courses are specifically designed for those that have been evaluated by the district's Multidisciplinary Team (MDT) identified as mentally gifted and in need of specially designed instruction.

\*BEARS ACADEMY students have the option of selecting this class as one of their electives. It is the responsibility of the family to provide transportation to and from the school. Please contact your PVH School Counselor about this class' availability.

**Prerequisites:** Students must have a Gifted Individualized Educational Plan (GIEP) with a consented, signed and dated Notice of Recommended Assignment (NORA) prior to enrollment.

# Learning Support

### Learning Support: 9409 Grade 9, 10, 11, 12 - 45 days - Year -1.0 credit

Learning support will be scheduled by the school counselor upon completion of student schedules. Courses are specifically designed for those that have been evaluated by the district's Multidisciplinary Team (MDT), identified with an exceptionality and in need of specially designed instruction. Each student must have an Individualized Educational Plan (IEP) with a consented, signed and dated Notice of Recommended Education Placement (NOREP) prior to enrollment. At times, a student may require that instruction be delivered through different materials or levels than their chronological peers. Some of our students with disabilities may even participate in regular education environments with different goals than their peers. These environments can provide opportunities for communication and socialization which may be designated in the student's IEP. Because we strive to develop programs and plans to meet the individual needs of students, there are some students whose goals have a life skills focus. The special education teacher is responsible for the delivery of the services as they work collaboratively with general education staff to provide programs for students within our school community.

\* BEARS ACADEMY students have the option of selecting this class as one of their electives. It is the responsibility of the family to provide transportation to and from the school. Please contact your PVH School Counselor about this class' availability.

**Prerequisites:** Each student must have an Individualized Educational Plan (IEP) with a consented, signed and dated Notice of Recommended Education Placement (NOREP) prior to enrollment.

### Supplemental Math: 9113 Grade 9, 10, 11, 12 Year – 1.0 credit

This course is designed to help students understand Algebra, Geometry, and Statistics in the real world. Reading and interpreting equations, applying problem solving strategies, using formulas, finances and time management are some of the concepts taught in this course. Students that meet certain criteria will be placed into this course.

### Supplemental Reading: 9320 Grade 9, 10, 11, 12 - Year – 1.0 credit

This course is designed to provide students with instruction using various literature to gain knowledge through content assignments and activities. Concepts will be taught through fiction and non-fiction text, vocabulary, writing, and research information. This course will increase students' understanding of English by analyzing, applying, and making their own predictions of text. Students that meet the criteria will be placed into this course.

## PAES® Lab: 9322 Grades 9, 10, 11, 12 – Year – 1 credit

The Practical Assessment Exploration System Program (PAES®) Lab is a research based, age appropriate transition assessment of employability skills, functional skills, work behaviors, and interests. The program is designed for high school students as well as special populations. There are a total of 264 hands-on tasks giving students the opportunity to solve problems and complete projects that simulate entry level tasks in five components. PAES® identifies: 1) aptitude for community based employment, 2) functional skills,3) interests, 4) work behavior strengths and 5) barriers to success. PAES® is conducted in a simulated work environment within a classroom setting where students work on simulations of actual tasks performed in community based jobs.

## Adapted Physical Education Grades 9, 10, 11, 12 - 90 days - .5 credit

Adapted Physical Education is an individualized physical education program developed to meet the needs of students in one or more of the following areas: physical and motor fitness, fundamental motor patterns and skills and/or individual, lifetime, and team sports skills. General and adapted physical education have similar goals and objectives; however, an adapted physical education program makes modifications to general physical education activities for safe and successful participation by the student with a disability.

## **English as Second Language ESL** Grade 9,10,11,12

English Language Development (ELD) is designed for students whose first or home language is other than English. Instruction focuses on developing fluency to interact socially and engage academic content in English. The four skills of reading, writing, speaking, and listening are practiced contextually using materials from all classes and disciplines as well as real-world sources. Time is devoted to building cultural and social competence to increase individual participation and exercise of agency in the community and post-graduation plans. Admittance into the class is determined by the Home Language Survey, the ESL Program Specialist, and the WIDA Screener.

# School-To-Work Program

### Diversified Occupations.Sending School Program Option: 8813/8814 Grade 12 – Year – 3 credits Grade 12 – 90 days - 1.5 credits

The Diversified Occupations (DO) program is a direct relationship/partnership between a local business/industry and the school. Career competencies and manipulative aspects of skills are developed at the job training station site. Diversified Occupations serves heterogeneous groups of 12<sup>th</sup> grade students from more than one vocational education area of instruction and/or those students having a vocational objective that cannot be met by any of the existing in-school vocational programs. Enrollment is limited to seniors who are good standing with their graduation requirements. Any courses that are needed for graduation take priority over DO. Prior to the start of the school year, all enrolled students must have an approved work site to continue enrollment in the program. If students are requesting DO for the school year, for scheduling purposes. Failure to do so would prevent them from participating in DO. Students enrolled in DO must meet with the program teacher on Thursdays and Fridays during 6th period, before leaving for their jobsite. DO students are required to take the NOCTI examination during the spring of their senior year. More information will be given by the program teacher.

Eligibility Requirements: Minimum GPA of 75% or higher and no classes that need credit recovery.

\*Bears Academy students participating in Diversified Occupations MUST come to the building Thursdays and Fridays for Period 6.

# DIVISION I ACADEMIC REQUIREMENTS

College-bound student-athletes will need to meet the following academic requirements to practice, receive athletic scholarships, and/or compete during their first year.

# Full Qualifier

Complete 16 core courses.

- Ten of the 16 core courses must be completed before the seventh semester (senior year) of high school.
- Seven of the 10 core courses must be in English, math or science.
- Earn a core-course GPA of at least 2.300.
- Earn the ACT/SAT score matching your core-course GPA on the Division I sliding scale (see back page).
- Graduate high school.

## Academic Redshirt

- Complete 16 core courses.
- Earn a core-course GPA of at least 2.000.
- Earn the ACT/SAT score matching your core-course GPA on the Division I sliding scale (see back page).
- Graduate high school.

#### Full Qualifier:

College-bound student-athletes may practice, compete and receive athletics scholarships during their first year of enrollment at an NCAA Division I school.

#### Academic Redshirt:

College-bound student-athletes may receive athletics scholarships during their first year of enrollment and may practice during their first regular academic term, but may NOT compete during their first year of enrollment.

#### Nonqualifier:

College-bound student-athletes cannot practice, receive athletics scholarships or compete during their first year of enrollment at an NCAA Division I school.

# **Test Scores**

When a student registers for the SAT or ACT, he or she can use the NCAA Eligibility Center code of **9999** so his or her scores are sent directly to the NCAA Eligibility Center from the testing agency. Test scores on transcripts will **NOT** be used in his or her academic certification.

A combined SAT score is calculated by adding reading and math subscores. An ACT sum score is calculated by adding English, math, reading and science subscores. A student may take the SAT or ACT an unlimited number of times before he or she enrolls full time in college. If a student takes either test more than once, the best subscore from different tests are used to meet initial-eligibility requirements.

If a student took the SAT before March 2016 and then took the redesigned SAT at a later date, the NCAA Eligibility Center will not combine section scores from the former and redesigned SAT when determining his or her initial eligibility. The NCAA Eligibility Center will only combine section scores from the same version of the test. Because the redesigned SAT varies in design and measures different academic concepts than the former SAT, the Eligibility Center will apply the College Board's concordance tables when performing academic certifications for students with redesigned SAT scores.

\*To compare SAT scores, click here for a comparison table, or click here to visit the College Board's website.

# **2018 DIVISION II NEW ACADEMIC REQUIREMENTS**

College-bound student-athletes first enrolling at an NCAA Division II school on or after August 1, 2018, need to meet new academic rules to practice, compete and receive athletics scholarships during their first year.

## Full Qualifier

- Complete 16 core courses.
- Earn a core-course GPA of at least 2.200.
- Earn the ACT/SAT score matching your core-course GPA on the Division II full qualifier sliding scale (see back page).
- Graduate high school.

## Partial Qualifier

- Complete 16 core courses.
- · Earn a core-course GPA of at least 2.000.
- Earn the ACT/SAT score matching your core-course GPA on the Division II partial qualifier sliding scale (see back page).
- Graduate high school.

#### Full Qualifier:

College-bound student-athletes may practice, compete and receive athletics scholarships during their first year of enrollment at an NCAA Division II school.

#### Partial Qualifier:

College-bound student-athletes may receive athletics scholarships during their first year of enrollment and may practice during their first regular academic term, but may NOT compete during their first year of enrollment.

#### Nonqualifier:

College-bound student-athletes may not practice, compete or receive athletics scholarships during their first year of enrollment at an NCAA Division II school.

# **Test Scores**

If a student took the SAT before March 2016 and then took the redesigned SAT at a later date, the NCAA Eligibility Center will not combine section scores from the former and redesigned SAT at a fater date, the NCAA Eligibility Center will not combine section scores from the former and redesigned SAT when determining his or her initial eligibility. The NCAA Eligibility Center will only combine section scores from the same version of the test. Because the redesigned SAT varies in design and measures different academic concepts than the former SAT, the Eligibility Center will apply the College Board's concordance tables when performing academic certifications for students with redesigned SAT scores.

\*To compare SAT scores, click here for a comparison table, or click here to visit the College Board's website.

# Monroe Career & Technical Institute

# PROFESSIONAL EXCELLENCE IN CAREER AND TECHNICAL

MCTI is an extension of the four school districts of Monroe County and provides tuition-free career and technical education for high school students. Students in grades 10 - 12 attend a half-day at MCTI and a half-day at their sending high school. MCTI also offers a full-day program for 9th grade students.

An MCTI education provides students with more opportunities to learn practical skills using state-of-the-art equipment, develop leadership skills, obtain industry credentials, and earn college credits all while gaining real-world experiences.

# SENDING SCHOOL DISTRICTS

East Stroudsburg Area School District

**Stroudsburg Area School District** 

**Pleasant Valley School District** 

Pocono Mountain School District

# **MCTI PROGRAMS**

MCTI offers students 23 Pennsylvania Department of Education (PDE) approved programs that articulate a secondary career and technical education to a postsecondary degree, diploma, or certificate programs. These programs align the secondary courses to a postsecondary program to complete a degree or certificate. Our programs are divided into the following five Career Clusters:

### TRANSPORTATION

Automotive Collision Repair Automotive Technology Diesel Technology Outdoor Power Equipment Technology Plumbing

### **ENGINEERING TECHNOLOGY**

Drafting & Design Technology Electronics Technology Precision Machining Welding Technology

#### SERVICE

Business and Hospitality Management Cosmetology Criminal Justice Culinary Arts Health Professions Horticulture Diversified Occupations

### CONSTRUCTION

Carpentry Electrical Technology HVAC Technology Masonry

### **COMMUNICATIONS**

Computer Information Science Computer Networking & Security Graphic Communications

For further information/descriptions regarding MCTI programs, please visit our website at <u>www.pvbears.org</u> to find the MCTI program of studies. Physical hard copies are also available in the Pleasant Valley Guidance Office. If any student is interested in MCTI, please contact your counselor.

## MCTI

## Pleasant Valley High School Credit Tracking Worksheet 2023-2024 School Year

Students will find this worksheet helpful in planning their high school program. Subjects listed are required for graduation. Elective courses should be selected with your career goal in mind.

9th grade	10th grade	11th grade	12th grade
<ul> <li>English 9 (1 credit)</li> <li>Math (1 credit)</li> <li>Science (1 credit)</li> <li>Social Studies (1 credit)</li> <li>MCTI Program (3 credits)</li> <li>*Wellness Log (.5 credits)</li> </ul>	<ul> <li>English 10 (1 credit)</li> <li>Math (1 credit)</li> <li>Biology (1 credit)</li> <li>MCTI Program (3.5 Credits)</li> </ul>	<ul> <li>English 11 (1 credit)</li> <li>Economics (.5 credit)</li> <li>American Government (.5 credit)</li> <li>Wellness &amp; Health I (.5)</li> <li>Wellness &amp; Health H (.5)</li> <li>MCTI Program (3.5 credits)</li> </ul>	<ul> <li>English 12 (1 credit))</li> <li>Math/Science /Social Studies (1.5 credit)</li> <li>Advanced Wellness (.5)</li> <li>MCTI Program (3.5 credits)</li> </ul>

## 9th Grade Full Time MCTI Pathway

\*Wellness log: 9th grade full time MCTI students will be required to complete a wellness log. Students will meet with their school counselors for more information.

10th-12th Grade MCTI Pathway

9th grade	10th grade	11th grade	12th grade
<ul> <li>English 9 (1 credit)</li> <li>Math (1 credit)</li> <li>Biology (1 credit)</li> <li>Social Studies (1 credit)</li> <li>Wellness &amp; Health I (.5)</li> <li>Career Planning and Financial Literacy (.5)</li> <li>Electives (2. credits)</li> </ul>	<ul> <li>English 10 (1 credit)</li> <li>Math (1 credit)</li> <li>Wellness &amp; Health II (.5)</li> <li>Science/Social Studies (.5)</li> <li>MCTI Program (3.5 credits)</li> </ul>	<ul> <li>English 11 (1 credit)</li> <li>American Government (.5 credit)</li> <li>Math (1 credit)</li> <li>Advanced Wellness (.5)</li> <li>MCTI Program (3.5 credits)</li> </ul>	<ul> <li>English 12 (1 credit)</li> <li>Chemistry (1 credit)</li> <li>Economics (.5 credit)</li> <li>Advanced Wellness (.5)</li> <li>MCTI Program (3.5 credits)</li> </ul>
Total Credits: 7	Total Credits: 6.5	Total Credits: 6.5	Total Credits: 6.5

\*Any student that attends MCTI during their high school career, will need to individually meet with their school counselor to ensure that all graduation requirements are met. If a student is in need of required courses, they will have the opportunity to schedule online courses or in-person summer courses to ensure they will graduate on time.

- Students enrolled in MCTI may, if necessary, replace up to one required credit each in Social Studies, Science, and/or Mathematics with a course aligned to their career goals. Eligibility for pursuing such a credit replacement toward graduation will be determined by the principal in consultation with the student, parent, guidance counselor, and the MCTI administration (or his or her designee).
- If you attend MCTI and complete your program, you are not required to take Career Planning and Financial Literacy (Full time 9th grade students).
