School Measures for COVID Safety as of October 5, 2021

Measure	Value
# In School Transmissions:	8- 2021-2022 129- 2020-2021
% Implementation of safety protocols:	95.5
Number of current classes on distance learning:	12
Number of student positive cases:	1197- 2021-2022 1254- 2020-2021
Number of staff positive cases:	265- 2021-2022 660- 2020-2021
Certificated Staff Attendance	93.73%
Civil Service Staff Attendance	92.02%
Percent of screening testing with positive results:	Coming Soon

Cincinnati Public Schools Positive Cases

Health officials stress the importance of protection protocols in schools, including measuring the implementation of reliable protocols, maintaining protocols consistently over time, and measuring daily cases and quarantines in schools. Before September 2020, this data was not readily available for our region. However as charter, non-public, and public schools began opening for in-person learning in Hamilton County, and Ohio Department of Health created a reporting system for school COVID-19 cases, this data is now readily available to measure the amount of COVID-19 spread in schools. Early evidence is that there is little to no spread within schools in our region, however health officials are working on a system to better utilize the new data from schools that have re-opened in person.

THE FUTURE IS BRIGHT

Community Trends

City of Cincinnati Daily New Cases as of October 4, 2021

The City of Cincinnati Epidemiological Curve shows the cumulative number of new cases (dark blue line), the daily number of new COVID-19 cases in the city (light blue column), and the 7-Day moving average of daily new cases (gray dotted line). The 7-Day moving average demonstrates the level of virus in the community. Health officials recommend using the 7-Day moving average and the suggested thresholds from the Harvard Global Health Institute based on Daily New Cases per 100,000 individuals (see further explanation of these thresholds at: [Source: The Health Collaborative — https://www.cincinnati-oh.gov/health/covid-19/covid-19-measures-to-inform-school-district-decisions/](https://www.cincinnati-oh.gov/health/covid-19/covid-19-measures-to-inform-school-district-decisions/)).

Community Trends

Number of Cases as of October 4, 2021

The City of Cincinnati Number of Cases in 14-Day Period shows the daily number of new cases (dark blue line) and the 7-Day moving average (red/green dots). The 7-Day moving average dot is red if the value increased from the prior day and green if it decreased from the prior day. Health officials recommend using the 7-Day moving average suggested thresholds from the Harvard Global Health Institute AND the 7-Day moving average 14-Day trends. See further explanation of these thresholds at: Source: The Health Collaborative — <https://www.cincinnati-oh.gov/health/covid-19/covid-19-measures-to-inform-school-district-decisions/>

Community Trends

Positivity Rate as of October 3, 2021

Positivity rate and tests per 100,000 people for Hamilton County and City of Cincinnati

The positivity rate is the percent of COVID-19 tests that are positive out of all the tests administered each day. The rate is shown for the City of Cincinnati on the right, and for the county outside of the City of Cincinnati on the left. Health officials recommend a positivity rate below 5%. Source: The Health
