

Margate City School District

2024-2030

Six Year Curriculum Review and Textbook Replacement Plan

Process: Gap analysis of state or national standards to be completed and district curriculum documents revised, as appropriate, by the Content Area Curriculum Committees. Following the gap analysis and coinciding with the curriculum document revisions, the Content Area Committees will evaluate textbooks and related instructional materials. If new materials are needed, the Committee will then determine the best products and provide recommendations for new materials to support the curriculum.

School Year	<u>Content Areas Under Review</u>	<u>Implementation Timeline</u>
