

English Learners Program

It is the policy of the Fargo Public School District (FPS) not to discriminate against English Learners (ELs). According to the Equal Educational Opportunities Act (1974), this district must make an effort to do what is educationally appropriate to address the English and educational needs of ELs so that they can equally participate with their same-age English background peers. Qualifying students will be identified and placed in programs and services in accordance with statutory guidelines. Fargo Public Schools will strive to provide a linguistically, culturally, and academically rich learning environment. Our district plan describes the process of identifying and assessing and serving ELs. Parents or guardians will be notified upon identification, of services, and of yearly progress. It is the policy of Fargo Public Schools to comply with all federal and state laws prohibiting discrimination against students on the basis of all civil rights categories.
