

INSTRUCTION

Mathematics

The School Board believes ~~that~~ the Mathematics instruction program should provide instruction commensurate with the goals, interests, and abilities of all students. Because the goals of each student vary, the program should be flexible enough to provide for individual interests and abilities through appropriate instruction. Mathematics instruction is designed to develop ~~the student's base of~~ students' mathematical knowledge and skills and strengthen students' abilities to think and reason mathematically. All students should have the opportunity and the support necessary to learn ~~significant~~ mathematics with depth and understanding.
