The screenshot displays the Classlink Student dashboard within a web browser. The browser's address bar shows the URL `myapps.classlink.com/home`. The dashboard header includes the LTHS logo, a search bar, and a user profile icon. The main content area is a grid of application tiles, each featuring an icon and a label. The tiles are arranged in three rows and eight columns. The first row includes Aleks, Blooket, Canvas, Infinite Campus - Student, EdPuzzle - Students, Gmail (Student), Google Docs (Students), and Google Drive (Student). The second row includes Google Keep, Google Slides (Student), K12 Streaming Resources, Kahoot - Student, LTHS Website, MeasureUp, Screencastify, and Pear Deck. The third row includes Pivot Interactives, Securly, Zoom, A and P Ppt, Adobe Creative Cloud, Edgenuity Student, YouTube, and FitnessGram (OAuth). A fourth row at the bottom contains two additional icons: a folder and a person with a magnifying glass. The background of the dashboard features a faint, stylized graphic of a person's head and shoulders.

# Parent and Student Technology Access

With more technology tools available to students and families, what tools would parents/guardians like to have more access to?

What resources do students need to be better connected and supported by technology at LT?

# Textbooks and Fees

As we continue to integrate student devices into our courses, access to digital curriculum and course materials is important. We are one of very few schools that still charges a small fee for textbook rentals rather than using a university-style purchase model. While our model is cost effective, updates to our curriculum resources take 5 or more years. An initial study of textbook costs from other schools that are using a pay-as-you-go approach has textbooks and digital fees costing \$300 to \$500 more than our current fees.

Should LT investigate a change in funding textbooks to allow for more current and interactive digital resources?
