

Administering Medicines to Students

(Adopted 8-4-2014)

The Jamestown Public School Board has established a program for providing medication to students that includes authorizing individuals to provide medication to a student if the individual has received education and training in medication administration and has received written consent of the student's parent or guardian. (NDCC 15.1-19-23)

Students who must depend on receiving prescription medication during school hours for medical reasons must have a written order from a physician, dentist, or other legally designated health care professional giving specific directions for taking the medication. Such written order may be the prescription label on the original pharmacy labeled container.

The administration of aspirin/Tylenol, or generic equivalents, at school is not approved without the prior consent of a parent or legal guardian. Other over-the-counter medication may be administered only with written consent of the parent or legal guardian.

Any medication, which is ordered to be administered at school, may only be given using procedures developed by the administration and approved by the board.
