

River Grove Reimagined

Construction Update

September 30, 2022

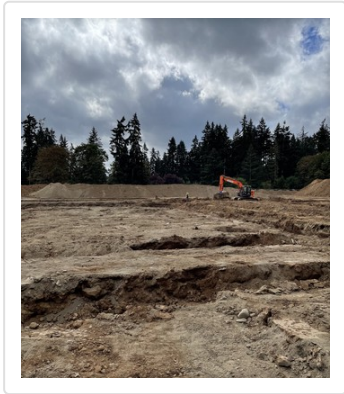

Aerial photo of River Grove site

- Contractor has been removing dirt and sand from previous building's site and stockpiling the material in preparation for the installation of compacted base material for the new building

- Contractor has also been prepping the lay down area for Phase 2. The lay down area will be used by the Phase 2 contractors to store their materials for the build
- A haul road around the building pad and a parking area will be constructed in the near future as well

Sand & Dirt Removal

Compacted rock over fabric in lay-down area

Stockpiled dirt will be reused when building the pad for the new school

Pre-bid site walk was held on Thursday

The building package for River Grove is currently out to bid. Bids are due October 19.
