## Quarterly Learning Report

### Winter 2024

Dear Community,

Teachers and Principals have been working hard this year to hone our practice of the 5 Step Process, which is a systematic method of using data to make decisions in the classroom. It is all about identifying and meeting individual student academic needs. This issue of the Quarterly Learning Report includes some of that overall data, as well as examples of excellent instruction.

Throughout this issue, you will see ways that career exploration opportunities are being provided to students in all three Triad buildings. Career exploration is a big part of building a foundation to help students know careers that are out there and exactly what those careers do, the training required, and much more. While many high school students have been taken on job visits and career fairs this year, we believe that exposing students PreK-12 to all of their future career options will allow all of our students to dream big for their future!

Sincerely,

*Vickie Hoffman*

# TRIAD ELEMENTARY SCHOOL

District Literacy Coach, Katie Organ, led our elementary staff in Triad's new dyslexia screening protocols. Teachers used the results of this screening to identify specific skill gaps that may be limiting students' abilities to grow as quickly in reading.

Thanks to Coach Stacy Milice and our HS Cheer Squad for a great Mini-Cheer Clinic!
