

# Quantitative Literacy

(Reading numbers or Understanding math in the real world)

Topics covered in Quantitative Literacy include paying bills, buying and selling stocks, misleading graphs and statistics, types of insurances, types of loans, retirement accounts, budgets, types of taxes, and to fill out simple tax forms. We cover all of these topics and go over in detail the differences of each type so that you can make informed decisions as an adult. The pathway for this class is for students on the career path or the college path for non-math based majors.
