

World

Geography

**Southside High School
Lucious Selmon-Instructor
2021-22 School Year**

WHAT IS WORLD GEOGRAPHY?

- This course emphasizes the interaction of humans and their physical and cultural environments.
- Students will use spatial and environmental perspectives and available geospatial technologies to analyze and interpret a variety of geographic representations.
- This type of inquiry helps students understand and appreciate their own place in the world!

THINGS YOU CAN EXPECT TO LEARN:

- How to read maps
- Different themes of geography
- How geography affects climate
- How human activity affects geography (and vice versa 😊)
- Basic information about the 7 continents and major countries within them
