

10/4/22

I exhibited collaboration when we got to make one table because each person had to have a part and not just one person have a part of the table.

The most important thing I learned in this project was that everybody need to share there on stews and give 10 percent in a group project so everyone gets a good grade.

I wish I had spent more time on the table to where I could make more rows and ideally have the table positions then make the roof for the table.

Reflection time!

- 1 I exhibited a lot of communication during this project because we need to discuss different things
- 2 The most important thing I learned new skills and I got to be with new people!
- 3 I wish I had spent more time on props because they were not as good as they would of been if I had more time. I would of also liked to spend more time on planning. It was a very rough plan. I could of got more detail on the basket maker. Also the plan only had a few big things

Improve/Reflections

sharing

* I exhibited creativity when making a unique way of making sounds.

* I exhibited communication when we had to edit our script.

* I exhibited collaboration when we had to make our idea.

* I exhibited critical thinking when I had to make part of the script.

* The most important thing I learned from this project is that space has less gravity than earth.

* I wish I had done differently is I wish I had spoken louder.

Improve/Reflection

I exhibited Communications when we tried it to speak clearer.

I exhibited collaboration when me and Layla agreed on a topic.

I exhibited Critical-thinking when I couldn't figure out how to hear it.

I exhibited Creativity when we came up with the theme song.

One important thing I learned in this project is sometimes you don't agree with your partner.

One thing I wished I did differently is the name of the podcast.
