Alignment to New Jersey Student Learning Standards:

The New Jersey Student Learning Standards include Preschool Teaching and Learning Standards, as well as nine K-12 standards for the following content areas. These areas include: 21st Century Life and Careers, Comprehensive Health and Physical Education, English Language Arts, Mathematics, Science, Social Studies, Technology, Visual and Performing Arts and World Languages. The standard for language learning in New Jersey reinforces the reading, writing, speaking and listening skills that are targeted across the standards for each content area.

The 2014 New Jersey Student Learning Standard for World Languages is as follows:

7.1 All students will be able to use a world language in addition to English to engage in meaningful conversation, to understand and interpret spoken and written language, and to present information, concepts, and ideas, while also gaining an understanding of the perspectives of other cultures. Through language study, they will make connections with other content areas, compare the language and culture studied with their own, and participate in home and global communities.

This standard is further divided into proficiency levels and three strands, one for each mode of communication. The proficiency levels are in line with the national performance descriptors as released by the American Council on the Teaching of Foreign languages. These guidelines indicate six different levels of proficiency that can be expected at the K-12 level of language learning. Throughout the course, students will be working to demonstrate proficiency at the Novice Mid level in all three modes of communication including: interpretive communication, interpersonal communication and presentational communication. The specific standards for this course are outlined below within in each mode of communication.
