

FREE COLLEGE CREDIT BY ARTICULATION

Articulated credits are free college credits that high school students can earn through successful completion of Career & Technical Education programs. This is possible because the college and high school faculty/instructors have evaluated the courses to qualify them for articulated credit. By reviewing the curriculum, instructional materials, equipment and course assessments, the college instructor(s) have certified that these high school classes are equivalent to the college course(s). An agreement between the college and high school is written stating the number of credits each college will award.

The free college credit is held in escrow for high school students until they enroll in that college. Over 100 state approved Career and Technical Education classes (business, CAD, auto, medical, etc.) at GBHS offer free articulation credits. Students should see a CTE teacher and/or counselor with questions on articulation credits.
