THE PROGRAMME

WHAT TO EXPECT

Performance Programme: Athletes on a performance pathway and/or scholarship from Year 9 upwards are able to access 1:1 weekly coaching. The Senior first team have their own programme and in addition to the weekly 1:1 court sessions, they can access 1:1 strength and conditioning sessions, video analysis, nutritional advice and physio support. This consists of being full-time for two terms and part-time in the summer.

Full time Programme: For those in Years 11 - Upper Sixth, netball is played across both the autumn and the spring term with a full programme of training, strength and conditioning provision and competitive fixtures. Year 10s that are in the performance pathway can also opt to do netball across two terms.

Part-time netballers: Those that compete in other sports can still access netball in club, squad and MAP sessions allowing them the flexibility to compete across an array of sports all year round.

Game of the term: The spring term is the busiest period with netball being played across all age groups and abilities. Each team has its own suitably experienced and qualified coach with regular training and weekly fixtures. Fixtures are matched according to the needs of the team and this includes an internal league, schools, clubs, colleges, franchises and universities.

WHO CAN DO IT?

Millfield netball has 11 teams in total and is accessible to all years at participation, competition, and performance levels. Netball is played all year round and therefore caters for everyone, including boys who can now participate in a netball MAP. The boys netball team train weekly and compete in the National England Mens and Mixed Netball Association (EMMNA) competition. We also run an internal league in term two as part of the netball programme which runs alongside external fixtures.

Teams enter county tournaments with the aim to progress through regional rounds to the National School Finals, plus the Independent Schools Netball Cup and the Sisters in Sport National Cup.
