RESPECT | POSITIVE RELATIONSHIPS | TEAMWORK

Dear Students and Parents/Guardians:

The mission of Hixson Middle School is to develop confident and responsible citizens who contribute to a rapidly changing world by valuing diversity, education, and the pursuit of their personal passions. Because of this, we proudly offer challenging and interesting courses, programs, and activities that we are excited to share with you in the 2024-2025 school year!

The following *Course Description and Guide to Student Program Planning* is provided to all students to assist in planning course work for next year. Inside you will find the course descriptions offered to Hixson students. In order to take advantage of this valuable tool, it is essential that both guardians and students thoroughly review the contents. **Please read the information thoroughly and make your selections carefully. All course requests are final.** Staffing and scheduling are based on your course selections; therefore, making your choices wisely is very important. Your choices are one of the most important factors that go into our planning for the upcoming school year, so we thank you in advance for thoughtfully selecting courses and taking this process seriously.

Your counselor will be happy to answer any further questions you may have. Please feel free to contact your grade-level counselor directly.

Mrs. Emily Bardot
bardot.emily@wgmail.org
314-918-4694

The teachers, counselors, administrators, and staff at Hixson Middle School are looking forward to next school year!

Sincerely,

Dr. Shenita Mayes
Building Principal

Mr. Mike Hazelton
Grade Level Principal

******* We hire staff and build schedules based on course requests. As a result, all course requests are FINAL. *******

Schedule Planning Guidelines

The Webster Groves District secondary schools offer a balanced program of required and elective subjects designed to prepare students to satisfy their personal and social needs as well as to meet the economic, civic, and social demands of our complex world.

Some subjects are required of all students. These are subjects that provide basic understandings, knowledge, skills and attitudes that are the foundation of our social, civic, and economic life. These subjects constitute the base of the broad educational program essential for all students.

The elective subjects provide opportunities for the exploration and development of new fields of interest and for the further development of special interests and abilities already discovered in elementary school. The elective program, like the required program, contributes to the general education of students, enriching the educational experience and strengthening self-confidence and poise through satisfying academic achievement.

Sound guidance in planning your program of study is essential in both the middle and senior high schools. Among the elective subjects, select those that will contribute the most satisfaction to your personal goals.

Hixson Middle School provides special sections of some classes for the purpose of adjusting the program to the ability and interest of students. Students are assigned to these classes on the basis of examination, previous records, and staff recommendations. Teachers and counselors are available to help students plan their programs. Parents are encouraged to make an appointment to discuss any questions about program planning.

In planning a program, it is important to consider your non-academic workload when selecting your subjects. Music lessons, club activities, sports, and home responsibilities are all important factors to consider when planning your schedule.

Mathematics Course Placement

All students enrolled in Math 7 are assessed in the spring of 7th grade to determine course placement for 8th grade. Again, the majority of 7th grade students continue onto Math 8. Some 8th grade students who show proficiency of the Math 8 curriculum will be placed in Algebra 1.

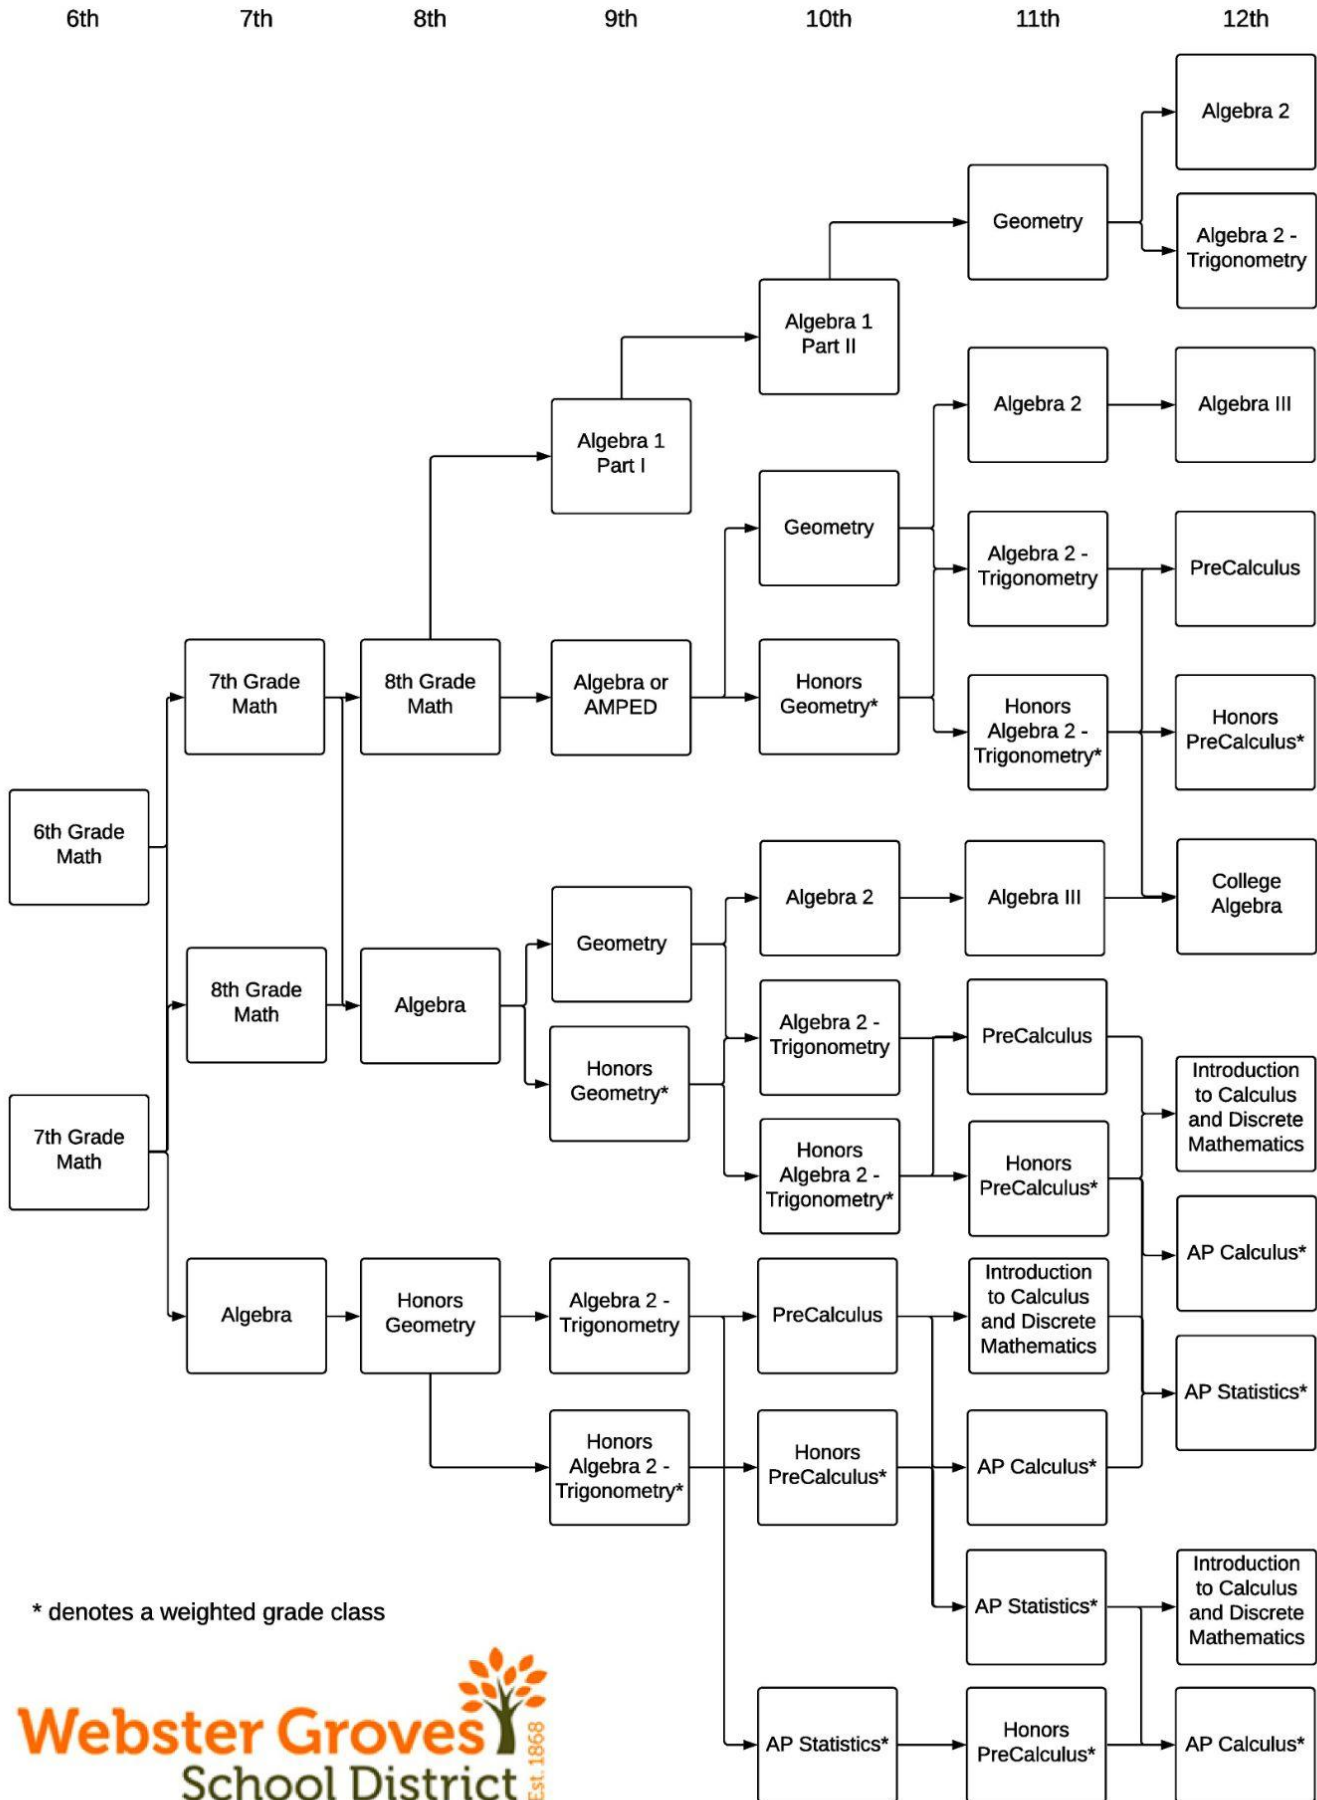

Algebra 1 is offered as an elective choice for all students in Math 8. Algebra 1 is a high school level course, typically taken as a freshman. It is an intense course that requires a lot of hard work and perseverance in problem solving. You can view the course curriculum on the High School tab to the left.

All 8th grade students taking Algebra 1 must maintain a 75% or higher average in order to remain in the course.

How are 9th grade math course placement decisions made?

Students are placed in high school classes based on their 8th grade teacher's recommendation.

Math 6th-12th Course Sequence

* denotes a weighted grade class

Eighth Grade Course Offerings

REQUIRED COURSES

The following courses are required and each make up one period of a student's seven-period schedule:

- English Language Arts 8
- Math 8, Algebra, or Geometry (based on District placement criteria)
- Science 8
- Social Studies 8 or Gifted Social Studies 8 (based on District placement criteria)
- Physical Education/Health 8, Competitive PE/Health 8, or Lifetime Fitness/Health 8

ELECTIVE COURSES

Students may choose from the following courses to complete their schedule.

Fine Arts - Semester Courses

- Art 1
- Art 2
- Art 3
- Drama 1
- Drama 2

Music - Full-Year Courses

- Beginning Band
- Band 8
- Choir
- Beginner, Intermediate, or Advanced Orchestra (based on District placement criteria)

Practical Arts - Semester Courses

- Family and Consumer Science 1
- Family and Consumer Science 2
- Digital Multimedia Arts
- Thrive Jr.
- Computer Science 1
- Computer Science 2
- Gateway to Engineering
- Sustainability
- Shop 1
- Shop 2
- Introduction to Robotics

World Languages - Full-Year Courses

These classes are high school level courses. Therefore, these classes are for students who are able to manage the pace and workload of high school courses.

- French 1
- French 2
- German 1
- German 2
- Spanish 1
- Spanish 2

Gifted Fine Arts

Students who met district criteria for GFA may take this class as a semester or full-year elective.

Algebra - Full-Year Course

(Students who did not meet the placement criteria to enroll in Algebra may take it as an elective course.)

Course Descriptions

REQUIRED COURSES

M4100 English Language Arts 8

Prerequisite: English Language Arts 7

The eighth grade English Language Arts class continues to develop the reading, writing, listening and speaking skills of students through the workshop model. Over the course of the year, students engage in the writing process to produce narrative, informational and argumentative writing pieces. In addition, students cultivate a reading identity and share their thinking with peers in a variety of ways. Targeted mini lessons aim to lift the level of students' reading and writing skills. Students use class time to independently apply skills and strategies in their reading and writing. Teachers actively confer with students about their individualized goals, which furthers students' growth as lifelong readers and writers.

M4220 Math 8

Prerequisite: Math 7

Instructional time will focus on three critical areas: (1) formulating and reasoning about expressions and equations, including modeling an association in bivariate data with a linear equation, and solving linear equations and systems of linear equations; (2) grasping the concept of a function and using functions to describe quantitative relationships and (3) analyzing two- and three-dimensional space and figures using distance, angle, similarity, and congruence, and understanding and applying the Pythagorean Theorem.

M7220 Algebra

Prerequisite: District Placement Criteria

This is the beginning course in a sequence of college preparatory courses. Topics covered include solving formulas, graphing functions, analysis of linear functions, analysis of quadratic functions, analysis of basic exponential functions, solving equations and inequalities, solving systems of equations, and sequences. At the end of first semester of Algebra, students who are performing at a 75% or below will be moved out of Algebra and will be placed in Math 8.

M5221 Honors Geometry

Prerequisite: Algebra and District Placement Criteria

This is the second course in a sequence of courses preparing a student for college admission eligibility and leading toward Advanced Placement Calculus. In this course a student acquires knowledge about geometric objects in two and three dimensions and an opportunity to apply this knowledge to discovering relations among geometric objects. There will be heavy emphasis on mathematical proof as well as an introduction to other geometric topics such as transformational geometry. **Please note: this is a high school level class and is for students who are able to manage the pace and workload of a high school class.**

M4300 Science 8

Prerequisite: Science 7

Eighth grade Physical Science students will participate in hands-on, problem based investigations that focus on physical science topics. Students will explore the properties and changes in matter and energy, interactions of forces, and investigations into wave energy. The exploration of the scientific process is embedded in all

units of study. Examining historical events and current issues will help students understand the nature of science and the interaction between science and society.

M4400 Social Studies 8

Prerequisite: Social Studies 7

Eighth Grade World Civilizations and Global Issues expands the understanding of students from a national view to a world view. The course examines several world civilizations and global issues through seven thematic units. The first theme, Foundations, sets the stage for the study of history by reviewing and understanding historical thinking. The remaining six thematic units are Geography, Religion, Achievements, Politics, Economics, and Social Structure (GRAPES). These themes are designed to allow students to analyze the similarities and differences of world civilizations and how they connect to current global issues. Students will explore these world regions through compare/contrast analysis, identifying patterns (movement of people, goods, services, geography), cause and effect relationships (people, government systems, environment). Students will learn through multiple modalities including inquiry learning, investigations of primary sources, and interpreting charts, graphs and maps.

M0020 Gifted Social Studies 8

Prerequisite: District Placement Criteria

This course is for students who participate in the district's gifted program. Learning goals and targets for the class have been developed by incorporating the WGSD Social Studies and Gifted curricula, creating a unique class with content and teaching methods for this special population of students. Much of our Gifted curricular goals will be met through our social studies work, but we will also incorporate projects and activities during the year which will specifically address Gifted needs.

Physical Education - Full-Year Courses

All students are required to take one full-year Physical Education class. In 8th grade, students have the choice between the following classes.

M4600 PE/Health 8

Prerequisite: Physical Education 7

In this PE class, students will rotate through courses consisting of PE, fitness, and health. Students will experience a variety of activities that can be played throughout their life. Both individual and team sports/activities will be offered. This class will emphasize playing the game for enjoyment and to maintain a healthy body and lifestyle. Health is based on developing skills in relation to age-appropriate health topics.

M3601 Competitive PE/Health 8

Prerequisite: Physical Education 7

This PE class differs from the traditional PE/Health 8 class in that gameplay is more intense and strategies are more advanced. Students will experience gameplay with an emphasis on strategies and concepts that apply to specific sports. More intensive training techniques will also be incorporated and students should expect to work at a more vigorous level as compared to the other PE classes. In this PE class, students will rotate through courses consisting of PE, fitness, and health.

M3602 Lifetime Fitness/Health 8

Prerequisite: Physical Education 7

This PE class differs from the traditional PE/Health 8 class in that gameplay is intended for people with less interest, confidence, or experience. Strategies and gameplay are more fundamental. This class includes a mix of lower-intensity activities: walking for fitness, outdoor sports and games, mindfulness activities, community service, time to practice social skills, and time to practice stress reduction strategies. In this PE class, students will rotate through courses consisting of PE, fitness, and health.

ELECTIVE COURSES

Elective classes must have adequate registration requests to become part of this year's school schedule. Students requesting courses that are not offered due to low enrollment will be notified by their counselor and assigned their alternate elective choice.

Fine Arts - Semester Courses

M8410 Art 1

Prerequisite: None

This is a semester-long studio course where students learn to work and behave like artists. Students will make sketchbooks and learn basic skills in drawing, painting, ceramics, printmaking and sculpture. We practice a creating process that helps students go from developing an idea to completing original works of art. In addition to the creation of art, students will also learn to critique a work of art. By the end of the course, students will turn in a portfolio presentation to showcase their work.

M8420 Art 2

Prerequisite: Art 1

This is a semester-long studio course for students who have successfully completed Art 1. Students will make a new style of sketchbook and expand on what they learned in Art 1. We will work on developing skills in drawing, painting, printmaking, ceramics, and sculpture. More emphasis is made in mastering basic art skills and on good presentation of artwork. In addition to skill based work, students will develop their own original artworks of choice. Students will also learn to develop opinions around art controversies. By the end of the course, students will have a portfolio presentation that showcases their art.

M8430 Art 3

Prerequisite: Art 2

This class is designed for the serious art student who has successfully completed Art 2. Students will choose a specific genre, subject, or art medium to explore in depth. Students will be required to plan in a sketchbook, meet with the teacher to discuss plans and materials, and work independently as an artist. In addition to the creation of art, students will learn more about art history and the business side of being an artist. At the end of the course, students' work will be showcased in an art exhibit they design. This involves preparing the work for hanging, design signs, labels, and ads to promote the show, and attend an opening event to celebrate!

M8450 Drama 1

Prerequisite: None

Drama 1 is a course that explores several aspects of drama that will enhance or develop the foundational basics of theater including:

- scriptwriting,
- basic theater terminology,
- basic theater history,
- vocal and physical warm-ups,
- reflective writing,
- exploration of voice and body,
- ensemble building,
- pantomime,
- improvisation, and
- reader's theater.

M8460 Drama 2

Prerequisite: Drama 1

Drama 2 builds upon the theater skills learned in Drama 1. Students will further deepen their understanding and skill set exploring various aspects of drama, including:

- scene study,
- monologue and audition skills,
- script analysis,
- acting for the camera,
- character development, and
- introduction to Shakespeare and stage combat.

Music - Full Year Courses

M6904 Beginning Band

Beginning Band is a first-year band class offered to seventh and eighth grade students who have little to no experience playing a brass or woodwind instrument. Students start with the basics of becoming familiar with their musical instruments (assembly, proper finger placement, air flow and breathing). Students progress in their knowledge of reading music, beginning with basic note identification and ending with more complex compositions of music. Regular practice outside of class is required as homework.

M8000 Band 8

Prerequisite: Band 7

Eighth-grade Band is open to all students who have successfully completed seventh-grade Band. Students who are new to our school program may join the Band if they have had a comparable experience in another school and complete a brief audition for the Hixson Band Directors. Students will continue to develop

individual playing skills and will perform a variety of music. Students will also complete lessons in music theory, music history and music technology. The 8th grade Band will perform three concerts in addition to the 8th Grade Band tour during the school year.

M8105 Choir

Prerequisite: None

Choir is open to all students who want to improve their singing. Students who have not gone through the Choir program are welcome to join and will receive learning aids to help them catch up. This class is designed to strengthen individual voices, as well as develop choral singing abilities. The class will focus on learning to sight read notes and rhythms, sing in 3-4 part harmony, and sing in different styles, languages, and genres. Students will perform one mandatory concert per semester. Students who are interested in performing with the WGHS choir in the future are strongly encouraged to take this class.

M6900 Beginning Orchestra

Prerequisite: None

Beginning Orchestra is a first year orchestra class offered to students who have little to no experience playing a stringed instrument. Students who are interested in playing violin, viola, cello, or stand-up bass will learn to read and play music on their instrument of choice at a beginner level. Students will be required to rent or purchase their own instrument and music book for the class. Students who choose violin or viola will bring their own instrument to class to use every day and take home for home practice. Students who choose cello or stand-up bass will use a school instrument for class and keep their personal instrument at home for home practice. Regular practice outside of class is required as homework. Orchestra students will work as a team to successfully perform three concerts a year. Students will learn how their performance literature relates to music theory, music history, and current global cultures.

M6901 Intermediate Orchestra

Prerequisite: District Placement Criteria

Intermediate Orchestra is a second level orchestra. It is open to all students who have successfully completed at least one year of experience on their instrument in an orchestra class or private lessons with a certified orchestra teacher. Students are required to audition for this class with approval from the Hixson orchestra director to register. New techniques and concepts will be introduced that build on the foundational skills and knowledge previously learned in the beginning stages. Students will be required to rent or purchase their own instrument and music book for the class. Students who play violin or viola will bring their own instrument to class to use every day and take home for home practice. Students who play cello or stand-up bass will use a school instrument for class and keep their personal instrument at home for home practice. Regular practice outside of class is required as homework. Orchestra students will work as a team to successfully perform three concerts a year. Students will learn how their performance literature relates to music theory, music history, and current global cultures. Orchestra members are also invited to audition for the Hixson Honors Orchestra, an after school group that collaborates with Wind Ensemble and Choir for two Sounds of Hixson concerts per year.

M6902 Advanced Orchestra

Prerequisite: District Placement Criteria

Advanced Orchestra is an upper level orchestra. It is open to all students who have successfully completed at least one year of experience on their instrument in an orchestra class or private lessons with a certified orchestra teacher. Students are required to audition for this class with approval from the Hixson orchestra director to register. New techniques and concepts will be introduced that continue to build on skills and knowledge previously learned at an intermediate playing level. Students will be required to rent or purchase their own instrument and music book for the class. Students who play violin or viola will bring their own instrument to class to use every day and take home for home practice. Students who play cello or stand-up bass will use a school instrument for class and keep their personal instrument at home for home practice. Regular practice outside of class is required as homework. Orchestra students will work as a team to successfully perform three concerts a year, in addition to an orchestra tour around the district. Students will learn how their performance literature relates to music theory, music history, and current global cultures. Orchestra members are also invited to audition for the Hixson Honors Orchestra, an after school group that collaborates with Wind Ensemble and Choir for two Sounds of Hixson concerts per year.

Practical Arts - Semester Courses

M8510 Family and Consumer Science 1

Prerequisite: None

FACS 1 is designed to give students an introduction to Family and Consumer Sciences. Topics covered include:

- Food Prep,
- Nutrition,
- Hand & Machine Sewing, and
- Child Development/Babysitting.

M8520 Family and Consumer Science 2

Prerequisite: FACS 1

FACS 2 is offered to students who have successfully completed FACS 1. Students will build upon knowledge gained in FACS 1 about food prep, nutrition, and hand and machine sewing as well as gain an introduction to interior design.

M0044 Gateway to Engineering

Prerequisite: None

Gateway to Engineering is a 7th and 8th grade experiential learning course covering a wide spectrum of Engineering disciplines including Civil, Electrical, and Mechanical. Topics include Design and Modeling, Automation and Robotics, Flight and Space, Magic of Electrons, and Medical Detectives.

M0080 Sustainability: Helping Others and the Environment

Prerequisite: None

This experiential learning course will take an interdisciplinary approach in helping students understand inequities in our society relating to reducing environmental impact, food insecurity, and distribution of resources. Students will create environmentally sustainable solutions to community-based problems by auditing our environmental impact (ie: energy, waste, consumption etc), determining the needs of the community, and addressing those needs through community outreach. In addition, students will continue to develop the sustainable outdoor courtyard, build and maintain raised garden beds and engage in urban gardening to grow food that can be distributed within the Hixson community and/or donated to local organizations to support others in need.

M0074 Computer Science 1

Prerequisite: None

In this experiential learning class, students with little to no circuitry or programming experience necessary will explore the foundations of Computer Science. They will learn the basics of computer hardware, software and networking, data, user centered design, physical computing, and programming with artificial intelligence. Students will create websites, apps, games, and create electronic projects with micro computers. They will learn how to complete more advanced projects using HTML & CSS, Python, and JavaScript coding languages.

M0076 Computer Science 2

Prerequisite: Computer Science 1

Video games in school! In this experiential learning class, students with some programming experience will develop the fundamentals of game design using the technical skills of developing applications using Unity as a primary development tool. Students will create 2D and 3D cross-platform games for PCs, consoles, mobile devices, and the internet to gain a broader understanding of the design principles in developing video games and interactive applications. At the end of each semester students will host a hackathon where students will showcase their interactive applications for the community to experience.

M8610 Shop 1

Prerequisite: None

This semester course is designed to allow students to gain hands-on experiences with power tools as well as hand tools. In the lab setting, this course will involve drafting, measurement, safety, and constructing projects. Students must pass a safety final, with 70% proficiency, before working with power tools/equipment in the lab.

Project choices in this class may include:

- lettering,
- puzzle/scroll saw object,
- truss/bridge,
- catapult,
- cutting board,

- large cooking spoon or spatula,
- triangle game, and
- a paper towel rack.

M8620 Shop 2

Prerequisite: Shop 1

This semester course is offered to students who have successfully completed Industrial Technology 1. This class will build upon the knowledge gained on drafting, measurement, safety and constructing projects. Students will work with a variety of materials including metal, plastic, and wood. Students must pass a safety final, with 70% proficiency, before working with power tools/equipment in the lab.

Projects in this class may include:

- pencil tray,
- keychains,
- puzzle/scroll saw object,
- wooden mallet,
- large wood project,
- jewelry box,
- intarsia with frame,
- kitchen pegboard,
- bookends, and
- large cooking spoon or spatula.

M0048 Introduction to Robotics

Prerequisite: None

This experiential learning class uses a hands-on approach to introduce the basic concepts of robotics, focusing on the construction and programming of autonomous mobile robots. Course information will be tied to lab experiments; students will work in groups to build and test increasingly more complex mobile robots, culminating in an end-of-semester robot contest. We will be using LEGO® Education SPIKE™ Prime as our platform. This will allow students with both previous and no coding experience to access the curriculum. Students will be divided into groups and complete a variety of robot construction and programming activities within the confines of these groups.

M0091 Digital Multimedia Arts

Prerequisite: None

Digital Multimedia Arts is a project-based course that allows students to creatively express themselves through digital graphics, print media, computer animation, and other newly emerging forms of digital media. This experiential learning class will allow students to explore a wide range of programs while considering their audience, mode of expression, and editing skills. Students will also be given the ability to facilitate meetings, serve as team leaders, manage project timelines, and produce professional products like our weekly school show, the Hixson Happenings.

M0058 Thrive Jr

Prerequisite: None

This project-based course guides 7th and 8th grade students through the experience of becoming entrepreneurs to solve a problem. As students reach milestones throughout this experiential learning class, they create a portfolio that documents their journey from problem/solution ideation through evaluation of sales. Students evaluate the world around them, identify a problem to solve, create a product concept, sell this product in an e-commerce marketplace, evaluate the performance of their business idea, and iterate to incorporate learnings. With involvement of local mentors and volunteers, students experience authentic learning, providing them an opportunity to be entrepreneurs.

World Languages - Full Year Courses

Students who are interested in pursuing a foreign language in middle school may plan on a two-year course of study beginning in seventh grade with Level 1 and continuing with Level 2 in eighth grade. These two years count as the equivalent of Level 1 and 2 at the high school and allow a student the possibility to enroll in Level 3 as a freshman, depending on teacher recommendation. **Therefore, these classes are for students who are able to manage the pace and workload of high school courses.** Students may also begin a foreign language by taking Level 1 in eighth grade or high school.

M8210 French 1

Prerequisite: None

In French 1, students will begin their journey towards proficiency in the French language through a communicative, comprehensible input approach that focuses on student understanding of written and spoken French, as well as an ability to communicate in French using simple words, phrases, and sentences. French input activities include discussions around student interests, story telling, music, picture and movie talks, games, vocabulary building, an exploration of grammar in context, and more! Discovery of Francophone cultures will be woven into topics including school, hobbies, family, home, food, and clothing. 7th graders who successfully complete French I have the opportunity to continue with French II in 8th grade. 8th graders who successfully complete French I can begin with French II in high school.

M8200 French 2

Prerequisite: French 1

In French 2, students will continue their journey towards proficiency in the French language through a communicative, comprehensible input approach that focuses on student understanding of written and spoken French, as well as an ability to communicate in French using simple words, phrases, and sentences. French input activities include discussions around student interests, story telling, music, picture and movie talks, games, vocabulary building, an exploration of grammar in context, and more! Discovery of Francophone cultures will be woven into topics including daily routines, travel, and more! 8th graders who successfully complete French II can begin with French III in high school.

M8400 German 1

Prerequisite: None

In German 1, students will begin their journey towards proficiency in the German language through a communicative, comprehensible input approach that focuses on student understanding of written and spoken German, as well as an ability to communicate in German using simple words, phrases, and sentences. German input activities include discussions around student interests, story telling, music, picture and movie talks, games, vocabulary building, an exploration of grammar in context, and more! Discovery of German speaking cultures will be woven into various topics. 7th graders who successfully complete German I have the opportunity to continue with German II in 8th grade. 8th graders who successfully complete German I can begin with German II in high school.

M8405 German 2

Prerequisite: German 1

In German 2, students will continue their journey towards proficiency in the German language through a communicative, comprehensible input approach that focuses on student understanding of written and spoken German, as well as an ability to communicate in German using simple words, phrases, and sentences. German input activities include discussions around student interests, story telling, music, picture and movie talks, games, vocabulary building, an exploration of grammar in context, and more! Discovery of German speaking cultures will be woven into a variety of topics! 8th graders who successfully complete German II can begin with German III in high school.

M8300 Spanish 1

Prerequisite: None

In Spanish 1, students will begin their journey towards proficiency in the Spanish language through a communicative, comprehensible input approach that focuses on student understanding of written and spoken Spanish, as well as an ability to communicate in Spanish using simple words, phrases, and sentences. Spanish input activities include discussions around student interests, story telling, music, picture and movie talks, games, vocabulary building, an exploration of grammar in context, and more! Discovery of Spanish speaking cultures will be woven into topics including school, hobbies, family, home, food, and clothing. 7th graders who successfully complete Spanish I have the opportunity to continue with Spanish II in 8th grade. 8th graders who successfully complete Spanish I may begin with Spanish II in high school.

M8304 Spanish 2

Prerequisite: Spanish 1

In Spanish 2, students will continue their journey towards proficiency in the Spanish language through a communicative, comprehensible input approach that focuses on student understanding of written and spoken Spanish, as well as an ability to communicate in Spanish using simple words, phrases, and sentences. Spanish input activities include discussions around student interests, story telling, music, picture and movie talks, games, vocabulary building, an exploration of grammar in context, and more! Discovery of Spanish

speaking cultures will be woven into topics including daily routines, travel, and more! 8th graders who successfully complete Spanish II may begin with Spanish III in high school.

Gifted Fine Arts - Semester Course

M8477 Gifted Fine Arts

Prerequisite: District Placement Criteria

This course offers eligible students the opportunity to explore fine arts in three areas: visual art, music and drama. Students develop skills in communication and perception, cultural and historical awareness, response and evaluation, creative expression and performance, and leadership. If electing to take GFA for a full-year, students will select the class twice when entering their elective requests into the Student Information System.

Algebra - Full Year Course

M7220 Algebra

Prerequisite: Math 7

Students who did not meet the placement criteria to enroll in Algebra may elect to take it in place of an elective course. (Students who enroll in Algebra as an elective will take two math classes.) This is the beginning course in a sequence of college preparatory courses. Topics covered include solving formulas, graphing functions, analysis of linear functions, analysis of quadratic functions, analysis of basic exponential functions, solving equations and inequalities, solving systems of equations, and sequences. It is highly recommended that students complete Math 8 prior to enrolling in Algebra.

OTHER COURSE OFFERINGS

Special Education

Prerequisite: District Placement Criteria

Special School District staff provide Special Education services for any student who currently has an Individualized Education Plan (IEP). Academic and/or behavioral services may be implemented in a variety of settings based upon the student's individual needs. Settings may include consultative monitoring, class-within-a-class or special education classes. Students who receive Special Education services may follow a modified schedule in order to maintain their individualized program. Scheduling is based upon each student's IEP.
