Non-Resident Students Oversight

1. Is your district currently a host district for a 1306 facility?

Yes

24 P.S. §1306 facilities				
Facility Name	Facility Type	Facility Type: Other	Services Provided By	Total Students in Facility
Passavant Memorial Homes	Group Home		District	2

- Describe the host’s educational oversight to ensure students with disabilities are educated in the least restrictive environment while in the 1306 facility? (If not a host, answer as if you were.)
 School districts which have students residing in a children's institution located within their borders ("host" school districts) are responsible for educating the students in those children's institutions. Under Section 1306 of the School Code, the host school district is required to allow nonresident students in children's institutions, including detention homes, drug and alcohol treatment centers and others, located within their borders, to attend the public schools of the host school district. For some students living in these children's institutions this may not be appropriate because of the terms of the institutionalization or because of the particular educational needs of the student. In other cases, the host school district may contract with another educational entity, such as an Intermediate Unit, to provide an educational program for the students in the institution. Some children's institutions may wish to apply to PDE for approval to operate education programs as nonpublic schools. The RASD's geographical boundary includes Passavant Memorial Homes and related group homes. School aged residents in these homes have their educational services overseen by the host district, RASD.
- Describe the district’s procedures for communicating with 1306 facilities and how the district ensures a successful transition back to school?
 The following procedure is set forth in 24 P.S. §13-1308 to establish the residency of a student living in a children's institution but whose parents are not residents of the school district in which the institution is located. The officers of the institution submit to the board of school directors of the host school district a sworn statement listing the names, ages and school district of each resident of the institution. The host school district forwards a form PDE-4605, Determination of District of Residence for Students in Facilities or Institutions, by certified mail, to the school district in which the institution declares the student's parents reside (the resident school district). The secretary of that school district must sign the form to acknowledge or disclaim the residence of the student. If the resident school district does not return the form within fifteen days, the host school district shall send the form to the resident school district again. If the resident school district again does not return the form within fifteen days, the host school district may construe such neglect to be acknowledgment of the student's residence. The resident school district shall pay the tuition (and any applicable special education charge) billed by the host school district for its residents upon receipt of the bill. The resident school district may appeal the tuition bill to the Secretary of Education. The Secretary's decision as to the amount of the bill and/or which school district is responsible for the tuition is final. If the resident school district neglects or refuses to pay the amount billed or determined by the Secretary of Education if appealed, the Secretary has the authority to deduct the amount owed by the resident school district from funds due from the Commonwealth and pay that amount to the host school district. Any school-aged person living

in an institution in Pennsylvania whose parent(s) or legal guardian resides outside Pennsylvania is entitled, upon request, to PDE review of his or her place of residence. Procedures used by PDE to make such determination are described in BEC 24 P.S. Section 13-1308. Students from out-of-state must have a guarantee or actual tuition paid prior to the student enrolling in the school district program. See BEC 24 P.S. 13-Section 1308(1). For a student determined to be emancipated, use his or her last address to establish the school district of residence. Due to the brief institutionalization periods for some students in institutions, host school districts are encouraged to bill the resident school district on a regular and periodic basis.

Incarcerated Students Oversight

1. Does the district have an adult correctional facility that houses juveniles within its geographical boundaries?

No

1. Describe the system of oversight the District would implement to ensure that all incarcerated students who may be eligible for special education are located, identified, evaluated and when deemed eligible, are offered a free appropriate public education (FAPE).

Least Restrictive Environment

1. Review the district's data for Least Restrictive Environment. Highlight areas of improvement.

The LEA makes every attempt to include students with disabilities in the general education classroom curriculum with supplementary aids and services. Service delivery begins in the general education classroom and the IEP team's determination of the LRE. According to the 2021-2022 PennData report, Rochester is above the state average (61.8%) for students with IEPs included in the regular class 80% or more with a percentage of 69.2%. The district is above the state average for special education students in outside settings at 8.0% compared to 4.4%, however; this is a significant improvement from the 2017-2018 sy where the district's percentage was 15.8%. During that time frame, RASD has added an additional Life-Skills Support and Emotional Support classroom in the elementary school and an Emotional Support classroom in the middle school. Other additions have been a sensory room, an MTSS coordinator, a part-time behavior specialist, a social-emotional learning counselor, and a social worker.

2. What universal practices does the district utilize to address the academic and social/emotional needs of all students in need of accommodations to their learning environments?

Rochester utilizes a comprehensive approach to meet the academic and social/emotional needs of all students. Our MTSS and SAP teams work to identify students in need of additional support, make intervention plans, monitor progress, and modify individual plans as needed. Academically, all students K-12 are monitored using several math and reading assessments in the fall, winter, and spring of each school year. Additionally, DIBELS assessments are administered to all students K-2, students in grades 3-5 are administered NWEA, and 6-10 are administered the CDTs. Staff are provided alternative measures including IXL. DORA and DOMA are used to assess students' in kindergarten through 12th grade who have an individualized education program. Based on the results of these benchmark assessments, students are identified for intervention services with our Title I reading specialist and intervention specialists. Students in need of enrichment are also identified by our academic specialists. Regarding social and emotional needs, the district is proud to have strong PBIS programs in each building. The elementary and middle school buildings have been recognized for implementing PBIS in tier 1 with fidelity. This school year, 2022-23, a new social-emotional learning counselor and a school social worker were hired. To address social/emotional needs, the district also implemented the PASS survey through out Student Assistance Program in each building to identify specific student needs. In 2017, the district established a partnership with Western PA Psych. We have a program, Positive Steps, located in our district. Positive Steps provides outpatient therapy available to all students and we have a focus area on our emotional support population. Services are continued throughout the summer and evening hours.

3. Describe the academic programming and training efforts the LEA utilizes to ensure meaningful participation of students with disabilities in the general education curriculum.

The district provides supplementary aids and services within the regular education setting and in extracurricular and non academic settings in order to maximize the extent to which students with disabilities participate with non-disabled peers. Removal from the regular education environment occurs only if the nature and severity of the disability is such that education in regular classes with the use of supplementary aids and services cannot be achieved satisfactorily. When considering the appropriate educational program for a student, the IEP team considers input from all members including parents, teachers, administrators, psychologists, counselors, and related service providers. The district provides specialized training for administrators, counselors and teachers based off of the yearly needs assessment and the self-identified needs every year.

4. Describe the supplementary aids and services the LEA utilizes to ensure meaningful participation of students with disabilities in extracurricular activities.

Rochester provides supplementary aids and services within the regular education setting and in extracurricular and nonacademic settings in order to maximize the extent to which students with disabilities participate with non-disabled peers. Removal from the regular education environment occurs only if the nature and severity of the disability are such that education in regular classes with the use of supplementary aids and services cannot be achieved satisfactorily. When considering the appropriate educational program for a student, the IEP team considers input from all members including parents, teachers, administrators, psychologists, counselors, and related service providers. Additionally, since 2014, the district is an active participant in Interscholastic Unified Sports through Special Olympics of Pennsylvania. This program creates an opportunity for people without intellectual disabilities to join in the sports experience by playing on a team with athletes with intellectual disabilities. Students with special needs have opportunity to participate in all activities with non disabled peers. If additional supports are found necessary, the school provides those supports.

5. Describe the District procedures, which ensure that, to the maximum extent appropriate, children with disabilities placed in private institutions are educated with non-disabled children and have the opportunity to participate in district lead extracurricular activities?

Rochester ensures that all district programs and practices are free from discrimination against all qualified students with disabilities. The district recognizes its responsibility to provide academic and nonacademic services and programs equally to students with and without disabilities. The district shall provide to each qualified student with a disability enrolled in the district, without cost to the student or parent/guardian, a free and appropriate public education (FAPE). This includes provision of education and related aids, services, or accommodations which are needed to afford each qualified student with a disability equal opportunity to participate in and obtain the benefits from educational programs and extracurricular activities without discrimination, to the same extent. The Director of Student Services attends all meetings for students with disabilities placed in private institutions, reviews the programming needs/options, and advocates for the students' educational and extracurricular opportunities in the Least Restrictive Environment.

6. Discuss the district's need to build capacity and expand programs and services in an effort to provide a continuum of services. (Consider the out of district placement chart)

As a district, we continue to add and grow the special education program. The number of students in outside placements has been cut in half over the past 8 years. The district has identified that developing a greater capacity in supporting students with behavioral and emotional needs is a priority. Measures already taken have included de-escalation training sessions provided by the BVIU TaC Team, hiring a full-time k-12 social worker and social-emotional learning counselor, a dean in both the elementary and secondary buildings, and a part-time BCBA Behavior Specialist, The district also partners with Western PA Psychological Services to provide out-patient therapy in the school.

BoardDocs® PL behavior support policy .pdf

1. How does the district support the emotional, social needs of students with disabilities?

Behavioral supports are provided through positive behavior support plans and classroom management techniques. The district uses a tiered model which begins with the implementation of a class-wide positive behavior techniques. If the student responds, an individual Positive Behavior Support Plan is not needed. The next step involves specific interventions designed for the individual student through consultation and specially designed instruction. These plans are developed through consultation with the IEP team, which includes parents, classroom teachers, building administrators, behavior specialist, related service providers, school psychologist, and school counselors as appropriate. If this is not sufficient to meet a student's needs, a formal Functional Behavior Assessment which includes a collection of baseline data through interviews with teachers, parents, and students, as well as classroom observations to document the frequency and intensity of behaviors of concern. This data is analyzed for patterns that assist in the development of a Positive Behavior Support Plan. The plan is implemented and periodically reviewed to determine effectiveness, and adjustments are made as needed. Identified social needs are addressed in small group and individual sessions. This occurs through the guidance office, social worker, social-emotional learning counselor or life skills/emotional support classrooms. The emotional support program at Rochester services students from grades K through 8. The program is intended for the needs of the itinerant and supplemental emotional support needs within the district. Housed within the program are an emotional support teacher, a behavioral specialist, and an emotional support paraprofessional. The emotional support teacher is utilized to not only provide individualized instruction within the emotional support classroom, but also to provide inclusive learning to our students in need. The emotional support teacher currently pushes in to four core subject areas and coteaches the content with a content specific certified teacher. The behavioral specialist is in the building 3 days a week which are dedicated to individual student data collection where the specialist enters the regular education classroom on a rotation and takes formal and informal observational data that is utilized for progress monitoring, FBA, PBSP and IEP input data tracking. The emotional support paraprofessional is utilized exclusively to assist in the individualized needs of the emotional support student population. The emotional support paraprofessional is tasked with providing one on one assistance to our student population in both emotional support class periods as well as inclusive classrooms where our students are being instructed by a regular education teacher.

2. Describe training provided to staff in the use of positive behavior supports, de-escalation techniques and responses to behavior that may require immediate intervention.

The BVIU TaC has trained staff in Crisis Prevention Intervention (CPI) Nonviolent Crisis Intervention. Currently, all 18 paraeducators are certified. All teachers in the Life-Skills and Emotional Support classrooms and administrators have also received the training.

3. Describe the district positive school wide support programs.

Each building in the district has implemented a School Wide Positive Behavioral Interventions and Supports (SWPBIS) program. The goal of the

SWPBIS program is to teach students to make responsible decisions, assist students in taking responsibility for actions when appropriate, teach students to learn to communicate positively, and help students work cooperatively with others. The SWPBIS program is a proactive approach to school-wide discipline and focuses on creating and maintaining an environment for achieving social and learning outcomes while preventing problem behaviors through a collaborative team approach. The SWPBIS team also analyzes discipline related behavioral patterns and will respond to them by teaching the positive behaviors expected by our students.

4. Describe the district school-based behavior health services.

Rochester employs two school counselors, a school social worker, a social-emotional learning counselor, and a school psychologist, and contracts one part-time BCBA behavior specialist. Additionally, the district partners with Western PA Psych Care to provide outpatient therapy in the school setting through the Positive Steps program. We also have a partnership with The Prevention Network to facilitate the Student Assistance Program (SAP).

5. Describe the district restraint procedure.

School District administrators, teachers, and paraprofessionals have been trained in Crisis Prevention Interventions (CPI). This training includes both de-escalation and restraint techniques. When an intervention is necessary to address problem behavior, the positive techniques and types of intervention chosen for a student shall be the least intrusive necessary. Use of Physical Restraints to control acute or episodic aggressive behavior may be used only when the student is acting in a manner that presents a clear and present danger to the student, other students, or employees, and only when less restrictive measures and techniques have proven to be or are less effective. An administrator or designee shall notify the parent/guardian as soon as practicable of the use of restraints to control the aggressive behavior of the student and shall convene a meeting of the IEP team within ten (10) school days of the use of restraints, unless the parent/guardian, after written notice, agrees in writing to waive the meeting. At this meeting, the IEP team shall consider whether the student needs a functional behavioral assessment, re-evaluation, a new or revised Positive Behavior Support Plan, or a change of placement to address the inappropriate behavior. The use of restraints shall not be included in the IEP for the convenience of staff, as a substitute for an educational program, or employed as punishment. Restraints may be included in an IEP with parental consent only if:- The restraint is used with specific component elements of a Positive Behavior Support Plan.- The restraint is used in conjunction with teaching socially appropriate alternative skills or behaviors.- Staff are authorized to use the restraint and have received appropriate training.- Positive Behavior Support Plan includes efforts to eliminate the use of restraints.

Intensive Interagency

Please address any areas of concern with students who are placed on Instruction Conducted in the Home or who are at a substantial risk of waiting more than 30 days for an appropriate educational placement.

Team members comprised of regular/special education teachers, school psychologist, counselors, principals, related service personnel, and parents and outside agencies collaborate in regard to student needs and services currently available to students with disabilities. The district has utilized Intensive Interagency staff from PaTTAN and IU 27 in the past to assist in the placement of students with disabilities. In order to initiate or expand the continuum of supports, services and educational placement options for students with disabilities, the District collaborates with agencies including but not limited to: Beaver County Behavioral Health, Office of Vocational Rehabilitation, Beaver Valley Intermediate Unit, PATTAN, ACHIEVA/ARC Beaver County Juvenile Probation, local police, Prevention Network, Beaver County Rehabilitation Center, Associated Occupational Therapist Inc, mental health providers, Homelessness Task Force, Career Links, and Children and Youth Services. To strengthen the existing partnerships, agency personnel are invited to participate in IEP meetings to ensure programming will provide FAPE in the least restrictive environment. The District has not experienced any difficulty placing students that require a specialized curriculum. The District collaborates with neighboring specialized Special Education Schools that are utilized for students that fit the criteria. This includes students with severe emotional disturbance, medically fragile students, students with significant cognitive disabilities, non-communicative students, and severely handicapped students.

- There are a full range of services, programs and alternative placements available to the school district for placement and implementation of the special education programs in the school district.
- The school district has adopted a child find system to locate, identify and evaluate young children and children who are thought to be a child with a disability eligible for special education residing within the school district's jurisdiction. Child find data is collected, maintained, and used in decision-making. Child find process and procedures are evaluated for its effectiveness. The school district implements mechanisms to disseminate child find information to the public, organizations, agencies, and individuals on at least an annual basis.
- The school district has adopted policies and procedures that assure that students with disabilities are included in general education programs and extracurricular and non-academic programs and activities to the maximum extent appropriate in accordance with an Individualized Education Program.
- The school district will comply with the PA Department of Education, Bureau of Special Education's revision notice process.
- The school district follows the state and federal guidelines for participation of students with disabilities in state and district-wide assessments including the determination of participation, the need for accommodations, and the methods of assessing students for whom regular assessment is not appropriate.
- The school district affirms the Pennsylvania Department of Education that funds received through participation in the medical assistance reimbursement program, ACCESS, will be used to enhance or expand the current level of services and programs provided to students with disabilities in this local education agency.
