- MS, Environmental Engineering, Lehigh University, Bethlehem, PA (1996)
- BS, Civil Engineering, Lehigh University, Bethlehem, PA (1994)
- High School, Manheim Central High School, Manheim, PA (1990)

Reason for Serving & Educational Philosophy

I believe the school board helps determine the vision for the school district and empowers the school leadership to execute on this vision. The board has an obligation to every student/family in the district to provide a path to optimize the abilities of our students; I want to ensure we care for everyone in a balanced manner and within our financial constraints. We need to attract/retain the best teachers, while providing opportunities for students to learn in various paths. Finally, the school curriculums should be representative of our community values and our Country's rich history; I believe we should foster community engagement in determining the school curriculum.
