We are at the mid point of our semester, good luck on mid-terms!

CCHS Senate Volunteers at the Roadrunner Food Bank

CCHS senate recently spent their Saturday morning volunteering at the Roadrunner Food Bank on February 18th. Eleven students joined CCHS Senate Sponsor, Andy Houser (pictured to the right), packed granola for food distribution.

“The best part about senate is getting to work with students outside of the traditional classroom. They are so creative and generally have tons of excitement to do non-academic activities,” Mr. Houser stated.

“We chose the Roadrunner Food Bank because we were inspired by their effort to feed families in need. We also understand that times can get tough for those who cannot afford meals. We wanted to help people in need, so this was the best option for us,” CCHS Senate President Audrey Paniagua said.

CCHS senate is planning to go to an APS elementary school in the spring as well to read to younger students and also complete an art project with them. Senate is also working hard to prepare for their prom, which will be held off campus this year.

“My favorite part about being in Senate is being a part of something bigger than me. Having the opportunity to help and encourage my peers is rewarding. Creating a welcoming and fun environment for our students has been my goal this year,” explained Paniagua.

STUDENT PROFILE OF THE MONTH: CALEB ARAGON

This month we are profiling 12th grader Caleb Aragon (pictured to the right), who is finishing up his Engineering Degree at CNM.

Why did you choose Engineering and what do you enjoy about that field?

“Engineering helps me understand how the world works. My passion is automotive engineering, I love cars and learning how they work.”

What are your plans after you graduate? “I plan to start at NM Tech in the Fall after finishing up my Associate’s Degree in the summer.”

What advice do you have for 9th and 10th graders at CCHS? “Don’t procrastinate! It makes you fall behind. I am finally learning this my senior year and guess what, I’m passing and not stressing about failing my classes. This also leads to more free time. Also, enjoy every day you have in life. Make memories and live life to the fullest potential.”
