# PREFACE

## HYPERLINK FEATURE

The digital version of this report has been hyperlinked. Click on the title of a section or a table in the List of Tables and you will be automatically directed to the actual content section or table in the report.

This report provides the detailed results for each question from this school/districts 2018-19 *California School Parent Survey* (CSPS), presented in tables organized by topic. The CSPS is specifically designed to provide data to help foster better parental involvement, one of the required priorities of Local Control and Accountability Plans (LCAP), and to bring parent voice into the school improvement process. (Henceforth, the word parent is used to refer to any adult in a household with parental or guardianship responsibilities.)

The survey aims to raise awareness of how well the school is doing in its parent involvement efforts and what are the needs and concerns of parents that it should address. It is a means to confidentially obtain parent perceptions about learning and teaching conditions, school climate, and parent-school involvement and relationships, including whether the school environment is academically challenging, caring and welcoming, participatory, safe, and fair. More information about the survey is available on the CalSCHLS website ([calschls.org](http://calschls.org)).

## THE CALSCHLS SYSTEM AND LOCAL CONTROL AND ACCOUNTABILITY PLANNING

The CSPS, along with its two companion surveys—the *California Healthy Kids Survey* (CHKS) and the *California School Staff Survey* (CSSS) for staff—is a service of the California Department of Education (CDE). These three surveys form the *California School Climate, Health, and Learning Survey (CalSCHLS) System*. CalSCHLS is the largest, most comprehensive effort in the nation to assess students, staff, and parents at the local level on a regular basis to provide key data on school climate and safety, learning supports and barriers, and stakeholder engagement, as well as youth development, health, and well-being (see [calschls.org](http://calschls.org)). The surveys provide a wealth of information to guide school improvement efforts and meet LCAP requirements and goals.

These surveys grew out of CDE’s commitment to helping schools promote the successful cognitive, social, and emotional development of all students and create more positive, engaging school environments for students, staff, and parents.

In addition to providing data to meet the LCAP parent involvement priority, the CSPS, and CalSCHLS overall, are especially valuable for supporting LCAP efforts in other respects:

- Providing data to help meet three other LCAP priorities: enhancing academic achievement, school climate, and pupil engagement;
- Supporting the priority of fostering achievement among foster youth, low-income, English language learners, and other high-need subgroups, by enabling LEAs to determine how survey factors that affect achievement vary across population subgroups; and
- Serving as a data collection tool to identify or monitor other local needs by adding additional questions.

For more information, see *Helpful Resources for Local Control and Accountability Plans* ([calschls.org/docs/lcap\\_cal\\_schls.pdf](https://calschls.org/docs/lcap_cal_schls.pdf)).

## THE IMPORTANCE OF PARENTAL INVOLVEMENT

Parental involvement in the school and their children’s education is one of the important characteristics of a positive school climate and quality schooling. A large and growing body of evidence has linked school success to the manner and degree to which a school communicates with parents, engages them both in school activities and education, and fosters a school climate that parents perceive as warm, inviting, and helpful—all variables assessed by the CSPS.

Involving family members is absolutely essential to creating a safe, caring, challenging, participatory, and supportive school climate. Positive relationships or ties among students, parents, teachers, administrators, and the fostering of parental support for education, are key components of school improvement efforts and are a common characteristic of effective schools. Parent involvement at school and in education has positive effects on youth behavior, academic achievement and learning, school attendance, and graduation. Many studies show that parent and other family involvement in children’s learning is a critical element of student success.

## SURVEY CONTENT OVERVIEW

The CSPS serves two primary purposes. First, it addresses most of the key issues in regard to parental involvement in both the school and their own child’s education. Second, it provides feedback on how parents view school climate, their perspective on the degree to which positive conditions and supports exist in a school. It asks parents and guardians to rate their own experience as school partners through questions like: *This school keeps me well-informed, promptly responds [to me], encourages me to be an active partner*, etc. The survey content covers several key content areas:

- Characteristics of parent respondents and their children;
- Student supports and school conditions (learning environment, school discipline, cultural sensitivity, opportunities for meaningful student participation);
- How welcoming the school is to parents;
- The scope and nature of parental involvement in school activities and decision-making;
- The scope and nature of school communications to parents;
- Parental involvement in their children’s education; and
- Parental perceptions of student risk behaviors (how much of a problem at the school).

The questions are aligned with the staff and student surveys so information obtained across these three stakeholder groups can be compared, as illustrated in Exhibit 1.

## SURVEY ADMINISTRATION AND SAMPLING

Surveys were administered using detailed instructions provided by the CalSCHLS Technical Assistance Center. A local survey coordinator plans, schedules, and monitors the CSPS. In keeping with the differences in the digital connectedness of parents in different districts, the surveys can be administered on paper forms, using an on-line format, or a mix of the two.

*Parent participation is completely voluntary, anonymous, and confidential.* The survey's target sample (those asked to take the survey) are generally all parents and guardians of students in all the schools that administer it, regardless of grade. Minimally, the survey's target sample should include the parents who have children in the grades in which students were surveyed. Table A1.1 gives the final number of parents who completed the survey. Because of the difficulty in external identification of the number of parents at any school, a participant response rate is not calculated, as it is with the student survey.

## THE REPORT

The tables in this report, organized by topic, provide the percentages responding to each question's response option for the whole district and by school levels in which the survey was administered (elementary, middle, high, and nontraditional). In the tables, the percentages are rounded to the nearest full percent. Depending on the number of respondents, individual school reports can also be provided.

## UNDERSTANDING THE DATA

The findings reflect the *perceptions* of parents. Some parents may have reasons to make their school look good; others, to paint an overly negative picture. The perceptions of the parents may be very different from those of students or staff or from an independent observer of the school. This is one reason why it is important to compare CSPS results to those in the CHKS and CSPS, as discussed below. Nevertheless, parent perceptions reflect a *reality* in themselves that is important and can influence both staff and student performance.

Care must be taken to understand the factors that can impact the quality, validity, and generalizability of the results. Many factors besides real changes in behavior, attitudes, or experiences among parents may account for changes in results from administration to administration. Changes may be due to differences over time in the characteristics or number of the respondents who completed the survey (see below), changes in the questions themselves, or differences between time periods in which the survey was administered (e.g., parental feedback may be more informed in transition grades later than earlier in the school year). A more detailed discussion of these topics can be found in the CHKS Guidebook to Data Use and Dissemination (download [data.calschls.org/resources/chks\\_guidebook\\_3\\_datause.pdf](http://data.calschls.org/resources/chks_guidebook_3_datause.pdf)).

## IMPROVING SURVEY PARTICIPATION

Among the most important factors affecting the quality of survey results is the level of parent participation. The higher the number of parents that completed the survey out of the total number you contacted, the more confidence you can have in the validity and representativeness of the results. Even if the response rate is low, the results provide an indication of the school-related feelings and experiences of those parents who did respond.

Strategies for improving parent participation are contained in the survey Administration Guide ([calschls.org/survey-administration/guidebook/](http://calschls.org/survey-administration/guidebook/)). The most important strategy over time may be to ensure that the results of the survey are communicated to parents and that parents are involved in the process of reviewing the data and determining how to improve the school (see Next Steps below).

## RESOURCES

The CHKS and CalSCHLS websites contain guidebooks and other tools for using and understanding survey results, including factsheets that show how data variables are related and offer suggestions for how data can be analyzed at the local level.

- CDE's California Safe and Supportive Schools website ([CaliforniaS3.wested.org](http://CaliforniaS3.wested.org)) contains a wealth of information and tools related to school climate improvement and social-emotional learning. It includes factsheets analyzing CalSCHLS data and *What Works Briefs* that provide guidance on strategies to implement.
- The *School Climate Connection Newsletter* provides monthly announcements of resources, tools, webinars and workshops, and research. Sign up on [calschls.org/about](http://calschls.org/about).
- Among the tools available to help in understanding and using the survey results, especially for LCAP implementation and monitoring, *Making Sense of School Climate* provides a discussion of all the CalSCHLS survey items that relate to school climate (download [data.calschls.org/resources/S3\\_schoolclimateguidebook\\_final.pdf](http://data.calschls.org/resources/S3_schoolclimateguidebook_final.pdf)).
- *Helpful Resources for Local Control and Accountability Plans* ([calschls.org/docs/lcap\\_cal\\_schls.pdf](http://calschls.org/docs/lcap_cal_schls.pdf)) describes how survey items align with LCAP priorities and indicators. Also available is an LCAP-related PowerPoint presentation ([calschls.org/site/assets/files/1036/cal-schls-lcap\\_schoolclimatev6-1.pptx](http://calschls.org/site/assets/files/1036/cal-schls-lcap_schoolclimatev6-1.pptx)).

## NEXT STEPS

Receiving this report is just a beginning step in a data-driven decision-making process. The following next steps will help in fostering effective use of the results to support school and program improvement efforts and the LCAP process.

### Request School Reports

If the schools in the district vary significantly in demographics, programs, or other characteristics, consider requesting individual parent survey reports for each school.

### Request Disaggregated Report or Analyses

The staff of the CalSCHLS TA Center can produce reports that look at how results vary by the demographics of parents and/or their children, by the level of parent involvement in schools, by whether parents had positive experiences compared to those with negative, or by other characteristics.

### Compare Results with Student and Staff Surveys

Although the survey results should be useful to any school community when used alone, a more powerful view of the school can be obtained by comparing these findings with those from the California Healthy Kids Survey of students and the California School Staff Survey. As part of the data review process, it is important to determine how consistent are student, staff, and parent perceptions and experiences.

Exhibit 1 below summarizes the variables assessed across the surveys. The CalSCHLS Item Crosswalk showing similar survey questions across the three surveys (student, staff, and parent) is posted on the CalSCHLS website ([calschls.org/resources/#survey\\_resources\\_and\\_tools](http://calschls.org/resources/#survey_resources_and_tools)). To enhance both survey administration efficiency and data comparability, schools are encouraged to administer the surveys at the same time.

### Engage Parents in an Action Planning Process

It is very important to engage parents, along with staff and students, in reviewing and exploring the meaning of the results and obtain their input into how the school might better meet the needs identified and the development of a detailed action plan. This communicates to parents that you value their input into how to improve the school and gives them an opportunity for meaningful participation. This, in

itself, helps enhance parent involvement. It will also promote higher rates of survey participation, as parents will see how the data has been used for positive purposes.

To assist in this process, on request, CalSCHLS staff can conduct three workshops:

- A structured group *Student Listening Circle* in which parents (along with staff) can hear from students their perspectives on the meaning of survey results and how to improve the school and better meet the needs of students;
- A *Family Forum*, a semi-structured process that engages family members and school/district stakeholders in a dialogue and action planning for improving the school environment and fostering positive student-adult relationships. The Family Forum provides the opportunity for: (a) family members' voices to be heard on what can be done; (b) family members to be engaged and involved in school improvement efforts; and (c) family members to participate in a genuine parent-school-district partnership activity; and
- A *Data Use Action Planning Workshop* designed to identify local needs based on the survey results and engage stakeholders in developing a detailed plan and timetable for meeting those needs using evidence-based strategies.

### **Add Questions to Your Next Survey**

As part of your data-review process, determine what additional information is needed from parents to guide school improvement efforts and consider adding questions to your next CSPS. The survey was designed so that schools can add additional questions to help them conduct a more individualized and comprehensive assessment.

For more information about survey planning or technical assistance in understanding survey results and developing effective action plans to address identified needs, call the CalSCHLS helpline (888.841.7536) or email [calschls@wested.org](mailto:calschls@wested.org).
