### HYPERLINK FEATURE

The digital version of this report has been hyperlinked. Click on the title of a section or a table in the List of Tables and you will be automatically directed to the actual content section or table in the report.

This report provides the detailed results, presented in tables organized by topic, for each question from the 2020-21 *California School Parent Survey* (CSPS). The CSPS is specifically designed to provide data to help foster better parental involvement, one of the required priorities of Local Control and Accountability Plans (LCAP), and to bring parent voice into the school improvement process. (Henceforth, the word parent is used to refer to any adult in a household with parental or guardianship responsibilities.)

The survey aims to raise awareness of how well the school is doing in its parent involvement efforts and what are the needs and concerns of parents that the school should address. It is a means to confidentially obtain parent perceptions about learning and teaching conditions, school climate, and parent-school involvement and relationships, including whether the school environment is academically challenging, caring and welcoming, participatory, safe, and fair. In response to the pandemic, the 2020-21 CSPS asks about experiences, perceptions, and concerns about students not being able to attend school in person and the district's remote learning program. More information about the survey is available on the CalSCHLS website ([calschls.org](https://calschls.org)).

The CSPS, along with its two companion surveys—the *California Healthy Kids Survey* (CHKS) and the *California School Staff Survey* (CSSS) for staff—is a service of the California Department of Education (CDE). These three surveys form the *California School Climate, Health, and Learning Survey (CalSCHLS) System*. CalSCHLS is the largest, most comprehensive effort in the nation to assess students, staff, and parents at the local level on a regular basis. The surveys provide key data on school climate and safety, learning supports and barriers, and stakeholder engagement, as well as youth development, health, and well-being (see [calschls.org](https://calschls.org)) to guide school improvement efforts.

### THE IMPORTANCE OF PARENT INVOLVEMENT

Parent involvement in the school and their own child's education is one of the important characteristics of a positive school climate and quality education. A large and growing body of evidence has linked school success to the manner and degree to which a school communicates with parents, engages them both in school activities and education, and fosters a school climate that parents perceive as warm, inviting, and helpful—all variables assessed by the CSPS.

Involving family members is absolutely essential to creating a safe, caring, challenging, participatory, and supportive school climate. Positive relationships or ties among students, parents, teachers, administrators, and the fostering of parental support for education, are key components of school improvement efforts and are a common characteristic of effective schools. Parent involvement at school and in education has positive effects on youth behavior, academic achievement and learning, school attendance, and graduation. Many studies show that parent and other family involvement in children's learning is a critical element of student success.

## **SURVEY CONTENT OVERVIEW**

In 2020-21 the CSPS was expanded to assess topics of particular concern due to the pandemic and the associated reduction in face-to-face learning in school buildings. Three sets of surveys are available to gather data among parents with students in different instructional models, In-School Learning, Remote Learning, and Hybrid Learning. Each survey directs parents to questions relevant to the instructional model used in their child's school based on skip logic. For example, questions asking about experiences in the school building are only available for parents who respond that their child participates in the In-School and Hybrid Learning models.

The CSPS serves three primary purposes. First, it addresses most of the key issues in regard to parent involvement in both the school and their own child's education. Second, it provides feedback on how parents view school climate, including their perspective on the degree to which positive conditions and supports exist at school. It asks parents and guardians to rate their own experience as school partners through questions like: *This school keeps me well-informed, promptly responds [to me], encourages me to be an active partner*, etc. Third, the CSPS assesses students' readiness to continue to learn from home. The survey content covers several key areas:

- Characteristics of parent respondents and their children;
- Student supports and school conditions (learning environment, school discipline, cultural sensitivity, opportunities for meaningful student participation);
- How welcoming the school is to parents;
- The scope and nature of parent involvement in school activities and decision-making;
- The scope and nature of school communications to parents;
- Parent involvement in their children's education; and
- Student risk behaviors (how much of a problem at the school);
- Experiences, perceptions, and concerns about students not being able to attend school in person; and
- Feedback on district's remote learning program.

The questions are aligned with the staff and student surveys so information obtained across these three stakeholder groups can be compared, as illustrated in Exhibit 1.

## **SURVEY ADMINISTRATION AND SAMPLING**

Surveys are administered using detailed instructions provided by CalSCHLS Regional Centers. A local survey coordinator plans, schedules, and monitors the CSPS. In 2020-21, the survey was only administered online.

*Parent participation is completely voluntary, anonymous, and confidential.* The survey's target sample (those asked to take the survey) are generally all parents and guardians of students in all the schools, regardless of grade. Minimally, the survey's target sample should include the parents who have children in the grades in which students completed the CHKS. Table A1.1 gives the final number of parents who completed the survey. Because of the difficulty of accurately identifying the number of parents at any given school that could have completed the survey, a participant response rate is not calculated, as it is with the student survey.

## THE REPORT

The tables in this report, organized by topic, provide the percentage of parents responding to each question's response option for the whole district and by school levels in which the survey was administered (elementary, middle, high, and nontraditional). In the tables, percentages are rounded to the nearest full percent. Depending on the number of respondents, individual school reports can also be provided.

## UNDERSTANDING THE DATA

The findings reflect the *perceptions* of parents. Some parents may have reasons to make their school look good; others, to paint an overly negative picture. The perceptions of the parents may be very different from those of students or staff or from an independent observer of the school. This is one reason why it is important to compare CSPS results to those in the CHKS and CSSS. Nevertheless, parent perceptions reflect a *reality* that is important and can influence both staff and student performance.

Care must be taken to understand the factors that can impact the quality, validity, and generalizability of the results. Many factors besides real changes in behavior, attitudes, or experiences among parents may account for changes in results from administration to administration. Changes may be due to differences over time in the characteristics or number of the respondents who completed the survey (see below), changes in the questions themselves, or differences between time periods in which the survey was administered (e.g., parental feedback may be more informed in transition grades later than earlier in the school year).

## IMPROVING SURVEY PARTICIPATION

Among the most important factors affecting the quality of survey results is the level of parent participation. The higher the number of parents that completed the survey out of the total number contacted, the more likely the results are valid and represent the parents that had the opportunity to complete the survey. Even if the response rate is low, the results provide an indication of the school-related feelings and experiences of those parents who did respond.

The most important strategy for improving parent participation over time may be to ensure that the results of the survey are communicated to parents and that parents are involved in the process of reviewing the data and determining how to improve the school (see Next Steps below).

## RESOURCES

The CHKS and CalSCHLS websites contain guidebooks and other tools for using and understanding survey results, including factsheets that show how data variables are related and offer suggestions for how data can be analyzed at the local level.

- CDE's **California Safe and Supportive Schools** website ([ca-safe-supportive-schools.wested.org](https://ca-safe-supportive-schools.wested.org)) contains a wealth of information and tools related to school climate improvement and social-emotional learning. It includes factsheets analyzing CalSCHLS data, *What Works Briefs* that provide guidance on strategies to implement, and access to the *California Safe and Supportive Schools Newsletter*, which provides announcements of resources, tools, webinars and workshops, and research. Sign up on [ca-safe-supportive-schools.wested.org/subscribe/](https://ca-safe-supportive-schools.wested.org/subscribe/).

## NEXT STEPS

Receiving this report is just a beginning step in a data-driven decision-making process. The following next steps will help in fostering effective use of the results to support school and program improvement efforts.

### Request School Reports

If the schools in the district vary significantly in demographics, programs, or other characteristics, consider requesting individual parent survey reports for each school.

### Request Disaggregated Report or Analyses

The staff of the CalSCHLS Regional Center can produce reports that look at how results vary by the demographics of parents and/or their children, by the level of parent involvement in schools, by whether parents had positive experiences compared to those with negative, or by other characteristics.

### Compare Results with Student and Staff Surveys

Although the survey results should be useful to any school community when used alone, a more powerful view of the school can be obtained by comparing these findings with those from the California Healthy Kids Survey of students and the California School Staff Survey. As part of the data review process, it is important to determine how consistent are student, staff, and parent perceptions and experiences.

Exhibit 1 below summarizes the variables assessed across the surveys. The CalSCHLS Item Crosswalk showing similar survey questions across the three surveys (student, staff, and parent) is posted on the CalSCHLS website ([calschls.org/resources/#resources\\_and\\_tools](https://calschls.org/resources/#resources_and_tools)). To enhance both survey administration efficiency and data comparability, schools are encouraged to administer the surveys at the same time.

### Engage Parents in an Action Planning Process

It is very important to engage parents, along with staff and students, in reviewing and exploring the meaning of the results, obtaining their input into how the school might better meet the identified needs, and developing a detailed action plan. This communicates to parents that you value their input into how to improve the school and gives them an opportunity for meaningful participation. This, in itself, helps enhance parent involvement. It also promotes higher rates of survey participation, as parents see how data are used for positive purposes.

To assist in this process, on request, CalSCHLS staff can conduct three workshops:

- A structured group *Student Listening Circle* in which parents (along with staff) can hear from students their perspectives on the meaning of survey results and how to improve the school and better meet the needs of students;
- A *Family Forum*, a semi-structured process that engages family members and school/district stakeholders in a dialogue and action planning for improving the school environment and fostering positive student-adult relationships. The Family Forum provides the opportunity for: (a) family members' voices to be heard on what can be done; (b) family members to be engaged and involved in school improvement efforts; and (c) family members to participate in a genuine parent-school-district partnership activity; and

- A *Data Workshop* designed to identify local needs based on the survey results and engage stakeholders in developing a detailed plan and timetable for meeting those needs using evidence-based strategies.

### **Add Questions to Your Next Survey**

As part of your data-review process, determine what additional information is needed from parents to guide school improvement efforts and consider adding questions to your next CSPA. The survey was designed so that schools can add additional questions to help them conduct a more individualized and comprehensive assessment.

For more information about survey planning or technical assistance in understanding survey results and developing effective action plans to address identified needs, call the CalSCHLS helpline (888.841.7536) or email [calschls@wested.org](mailto:calschls@wested.org).
