SUMNER HIGH SCHOOL

MASTER PLAN*

MASTER PLAN KEY FEATURES

Classrooms built with career-connected learning in mind

- Specialized, flexible classroom designs adapt to current and future student interests and industry needs
- Increased real-world learning experiences that connect students to meaningful and well-paying jobs
- Agricultural science spaces that include state-of-the-art, hands-on equipment

Increased safety and security

- Decreased points of entry
- Clear line of sight throughout the building axes
- Compact design for increased supervision
- Wider hallways for increased student circulation

POOL

- Replaces 50-year-old pool that has outlived its expected life
- Continued use by the District's swim and dive teams
- Open to the community for swimming lessons and other recreational activities

PAC

- Replaces the 40-year-old facility
- Tablet arm seating to accommodate school-wide testing and instruction
- Physical connection to performing arts classrooms and instruction

GYM

- Replaces undersized space, not designed for large events or accessible seating
- Larger size compatible for tournaments with increased seating to accommodate student body and sports spectators
- Built to meet ADA accessibility standards

*The full build-out of the Sumner High School Master Plan will be completed upon passage of capital funding.
