Committee Recommendations

This is a time when students can connect with each other and feel like they belong at school. It can also help them when they move up to a new grade.

This is a way of learning where students get to do hands-on activities that are interesting and relevant to them. It can help them learn better and feel more motivated.

Scheduling changes will be required to support implementation. The Teacher Teams prototype may be embedded in Advisory and PBL.

Where we currently are (2023-2024)

We formed two design teams representing educators, students and community members.

The Homeroom/Advisory and Problem-Based Learning design team have been designing prototypes for what each model can look like in BSD.
