

Audio/Video Technology & Film

OVERVIEW

In AVTF, you will learn the process of film production from pre- to post through video projects. Operating cameras & microphones, setting up scenes, and editing video into a final product are some of the many skills you will learn.

KEY INFORMATION

The AVTF pathway includes AVTF-1, AVTF-2, and Applications of Film Production. At the end of the 3-year pathway, students may take an assessment to become Adobe Certified Professionals, graduating from high school with a professionally recognized certificate!

PROJECTS

- Foley project, recreating movie sounds
- 60-second horror film contest
- Parody promotional video / commercial
- News interviews
- Fulton Film Festival competition entry
- ... and more!

INTERESTED?

Join AVTF if you are interested in film production, directing, video editing, video content creation, and/or project-based learning! Collaborate with others as you learn to use state-of-the-art equipment and professional software.
