

## Health Science: Public Health Pathway

### OVERVIEW

The Public Health pathway prepares students for careers in **environmental health, community health and health education, epidemiology, disaster management, and geriatrics.**

### WHY PUBLIC HEALTH?

After the COVID-19 crisis, there has been much more emphasis on the importance of public health integrating into traditional medicine. In our public health pathway students explore the **high demand career options** in the field of public health.

### PUBLIC HEALTH DIVISIONS

The five core public health disciplines include :

- 1) biostatistics
- 2) epidemiology
- 3) health policy
- 4) the social and behavioral sciences
- 5) environmental health sciences

### PRE REQS

Intro to Healthcare & Essentials of Healthcare
