

Vision

To engage, educate, and empower every student everyday

At Hopi we believe that:

- Learning is a continuous process that involves the entire community.
- Learning involves the whole child: academically, physically, emotionally, and socially.
- The academic learning environment is designed with high academic standards that meet the needs of all students.
- Effective communication is essential for the success of our school environment and the whole education process.
- Education should be a child-centered process that provides meaningful opportunities for critical thinking, problem solving, and risk taking.
- The learning environment will provide a safe caring atmosphere, which allows for and respects individual differences.
- Technology is an integral component of instruction and learning.

Norms
