Catlin Gabel 2006, Philomath 2003  
Rogue River 1991

Teams with individuals who have won both gender races in the same year, 1974-2023

- 3 Summit 2014, 2013, 2011
- 1 St.Marys (Medford) 2000, Oakland 1984  
Siuslaw 2012, Newport 1996  
Glendale 1993, Rogue River 1987  
Klamath Union 1983

### Top-10 Individual Finishers

Any student-athlete who can place in the top-10 at the Oregon State Championships has achieved quite an accomplishment. What follows are the top teams which have placed the most representatives in the top-10 individually from 1960 (boys) or 1974 (girls) to 2023

(This is for each time a student-athlete places, so a single person might account for up to four potentially; if the field of State-competing teams numbered fewer than eight, then only the top four individuals - not ten - of that particular race were counted.)

#### Girls Teams

- 57 Summit
- 54 Catlin Gabel
- 43 Jesuit
- 38 Bend
- 35 Union, Philomath
- 34 Sunset
- 29 Rogue River
- 25 Lincoln
- 24 Siuslaw
- 23 Crater, Crescent Valley, Oakridge
- 22 South Eugene, La Grande
- 21 Klamath Union, Regis

#### Boys Teams

- 51 South Eugene
- 47 Central Catholic
- 46 Crater
- 39 Union
- 38 Siuslaw, Jesuit
- 32 Oakridge
- 30 Summit
- 29 Philomath
- 28 Phoenix
- 27 Ashland, Klamath Union, Rogue River
- 26 Canyonville
- 25 Bend

Of the girls teams which have NEVER qualified as a team for State, the following have had the most individual athletes in the top-10 (the number is for each top-10 individual finish)

- 5 Griswald, Camas Valley, Pilot Rock

Of the boys teams which have NEVER qualified as a team for State, the following have had the most individual athletes in the top-10 (the number is for each top-10 individual finish)

- 4 Weston-McEwan

## XC State Miscellaneous Statistics

The field of competition at the Oregon State Championships has steadily grown more competitive over the years. (1976, 1978 and 2019 are excluded from the below, as evidence suggests they were short courses; 2020c is also excluded as it was not on the Lane Community College course.)

Seasons with the most girls racing 5k in the 17-minute-range (or faster)

4 girls 2016, 2018 and 2021  
 3 girls 2012, 2015, 2017 and 2022  
 1 girl 2023

Seasons with the most girls racing 5k in the 18-minute-range

31 girls 2018  
 26 girls 2022  
 24 girls 2017  
 22 girls 2011  
 21 girls 2023  
 20 girls 2013, 2014, 2016 and 2021  
 18 girls 2015  
 17 girls 2012

Seasons with the most boys racing 5k in the 14-minute range

2 boys 2002  
 1 boy 2003, 2013, 2014 and 2022

Seasons with the most boys racing 5k in the 15-minute range

29 boys 2022  
 22 boys 2003  
 21 boys 2017  
 20 boys 2018  
 15 boys 2013, 2014 and 2016  
 14 boys 2023

*Why are the 1976 and 1978 5k courses suspect? Consider this: The seasons on either side of them (1975, 1977, 1979) average not a single runner in the 14:00 minute range, 5 running in the 15:00s and 49 in the 16:00s. The decade which follows show similar performance ranges. However, those numbers were abruptly improved in 1976 (2-14:00s, 26-15:00s, 62-16:00s) and 1978 (10-14:00s, 73-15:00s, 54-16:00s). Most athletes who ran consecutive States were unable to come close to their standout mark of 1976 or 1978, and the track times they ran following the questionable season are not consistent with the standout XC times. Even the race management of the time called the course accuracy into question. As for the 2019 season where 50 girls ran in the 18:00-range and 19 in the 17:00 range, and 54 boys in the 15:00-range, the meet director says the course was 70m-90m short.*

### Hypothetical State Meet

Here's where it gets fun! Looking at the all-time top-70 best performers on the Lane Community College 5k course at the Oregon State Championships, only three teams for each gender had at least five runners ranked to allow team scores to be determined.

What follows is a hypothetical meet scoring those teams athletes!

#### Girls Teams

25 Jesuit  
 35 Summit  
 73 Lincoln

#### Boys Teams

32 Central Catholic  
 42 Jesuit  
 42 Crater

Jesuit wins the tiebreaker over Crater by 1 second

Two girls teams (St.Marys Academy, Sunset) have four athletes in the rankings, one short of the requisite number necessary to have a team score. There are an additional six boys teams (Summit, Sunset, West Salem, Lincoln, Klamath Union, Ashland) and two girls teams (South Eugene, Crater) with three athletes in the rankings.

*In addition to these holistic Master Lists, there are also available rankings by school size and separated by public/private schools.*

## XC State 'Merged/Total 5k Times', by School Size

What follows is a ranking of State teams by total time at the Lane Community College course; that is, the finish time of their first five runners added together. This covers 5k races at State from 1993 (girls) and 1975 (boys) to 2023. (The three short courses in 1976, 1978 and 2019 are not included; nor is 2020c)

Due to space limitations and in consideration of shifting Classifications, rather than the usual 6A/5A/4A/3A/2A/1A lists, the public schools are grouped by student population as "Large" (1101+ students; 57 schools on this list), "Medium" (1100-451 students; 48 schools), and "Small" (450-5; 70+ schools), and there are also two separate lists (800 population cutoff) for private schools. This latter list is shorter only because there are considerably fewer private schools in the state.
