Dear Roswell High School families,

At RHS, we are dedicated to helping all our students reach their highest potential and watching them succeed in their high school years and beyond. We strive to discover each student's unique set of talents, and understand how those talents will drive college major, career, and even life choices.

That's why we're excited to share with you that all Fulton County middle and high schools have partnered with YouScience, creator of the innovative program called the YouScience Inventory. With this inventory, students will discover their unique set of talents through a combination of their aptitudes and interests. This tool is a great way to understand where your child will succeed and allows us to deliver even more effective and accurate college and career guidance.

The online inventory takes students through a series of brain games and interest questions, designed to determine their results in the 9 key aptitudes utilized in the working world. The results include a review of the student's strengths, suggested environments where they will succeed, detailed information on possible careers that match those skills and interests, majors that map to those careers, and much more. If you would like more information about this unique inventory, please visit the YouScience website at <https://www.youscience.com/msparents/> or watch this video: <https://www.youtube.com/watch?v=n9mWOTOMfoA>.

This inventory is not an assessment, and you cannot study for it! It is not a measure of your child's knowledge or mastery of the curriculum and will not be used as a grade. The results are not used to compare your child to other students. In November, we will share the results with families and counselors will review the results with students. The goal is to help students make choices in high school and beyond that are aligned with their aptitudes and interests.

Based on the science behind the YouScience Inventory and our review of the program, we believe this tool will help students make more informed decisions when it comes to high school, college, and career-related choices. School counselors will help your child understand and use his or her results to select courses that he or she may be interested in. Your child's interests and aptitudes can also be used to help your him or her select colleges, majors, and or make career choices that are aligned to his or her aptitudes and interests.

If you have any additional questions, please contact your child's counselor.

Sincerely,

Roswell High School Student Services
