

IMOVIE DOCUMENTARY 'QUICK START' GUIDE

*ADD APP TO YOUR DOCK FROM THE APPLICATIONS FOLDER *your file automatically saves to hard drive
 -FILE -NEW PROJECT -NO THEME -NAME (give a title to your project: i.e. Thearle G Wood Documentary)
 -ASPECT RATIO (16:9) -FRAME RATE: 30 fps NTSC *Check box: Automatically add: Cross dissolve

iMovie WORKSPACE

*drag your previously saved high-res photos into this area

PREVIEW WINDOW
allows you to see your film as it will appear in the end

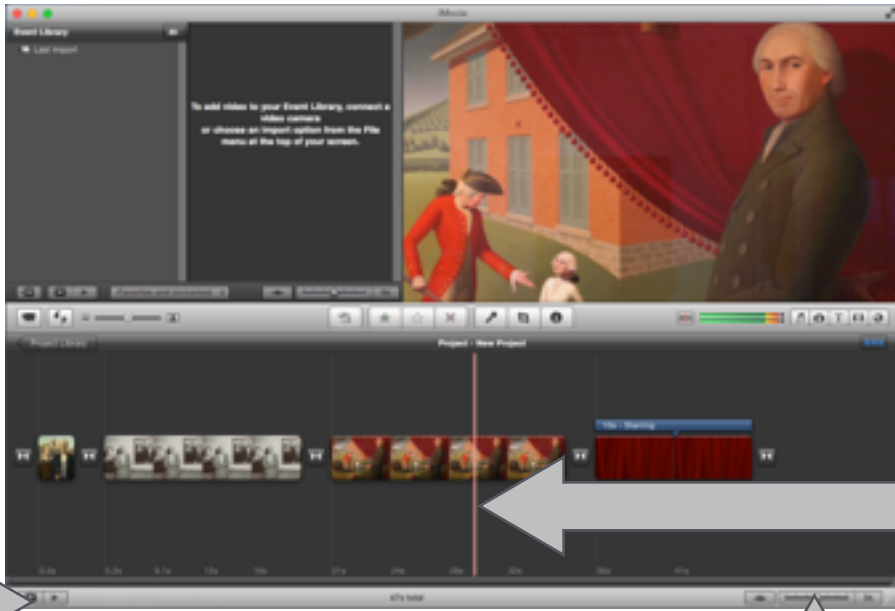

SWAP EVENTS
BUTTON

VIEW 1

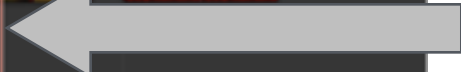

VIEW 2

PLAY:
FULL SCREEN &
IN WINDOW
MODE

"SCRUB"
to drag the playhead and advance rewind "film"

<p>MIC / RECORDING (When you are ready to read your script</p>		<p>INSPECTOR allows changes to clip: i.e. duration *the length of time that this image is on screen</p>
	<p>CROP / ROTATE IMAGE / KEN BURNS EFFECT (more on this later)</p>	

ZOOM IN / OUT
allows you to expand / contract your view of the film clips ***SLIDE L / R**

You can create the illusion of film by having your images “pan” side to side:
 This is known as the **KEN BURNS EFFECT** (named for the famous documentary film maker)
 *R click on image or select the Crop icon from the menu

PAN / PANNING

means swiveling a still or video camera horizontally from a fixed position

KEN BURNS EFFECT
 -crop to a starting point (green border)
 -crop to an end point (red border)
 *Click PLAY button for a preview of your pan

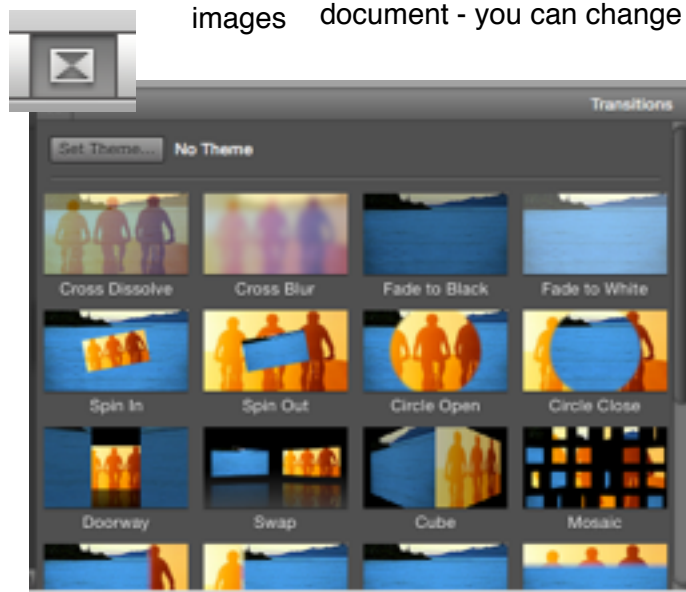

MULTIPLE TOOLS
 -select music from the iTunes / GarageBand
 -select images from file

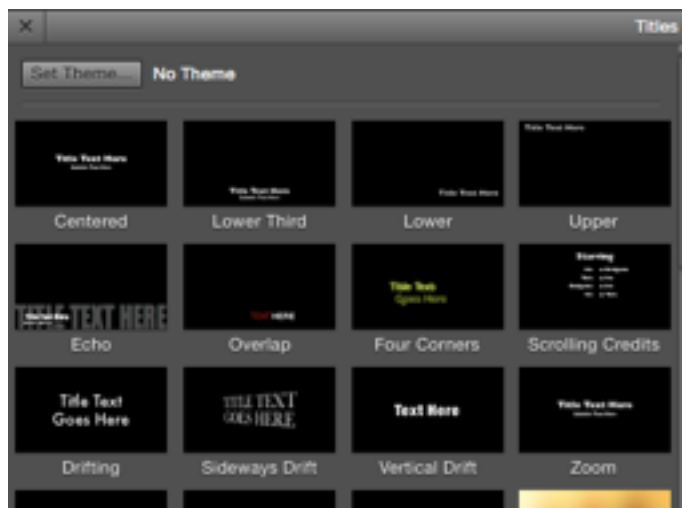

TRANSITIONS

*this is how one image / slide transitions to the next & can be changed between each image
 *drag transition to drop location between images

(I had you set the default transition as Cross Dissolve on setup of your document - you can change this)

TITLES
 -opens Titles menu
 -select one theme & drag into your project

*ideal for Title sequence / Intro & end credits
 *Edit type in the Preview window (top right)

You will add AUDIO to your documentary film in 2 ways:

- an instrumental (music, with no distracting vocals) **soundtrack** of your choice
 - you can find free downloadable audio files for your use at this site:
 - <http://freemusicarchive.org/genre/Instrumental/>
- an **audio** track of **YOU** reading your script (from your Q4:2) into the microphone
 - you can record this track in my studio (rm. 426) if you want a recording with no background noise
 - you will record this file in GarageBand and save it in your google drive (or flash drive) and then open the file on your machine in the ArtMacLab

SWAP EVENTS
BUTTON
TO FLIP MODES

DRAG FILE DIRECTLY INTO IMAGE

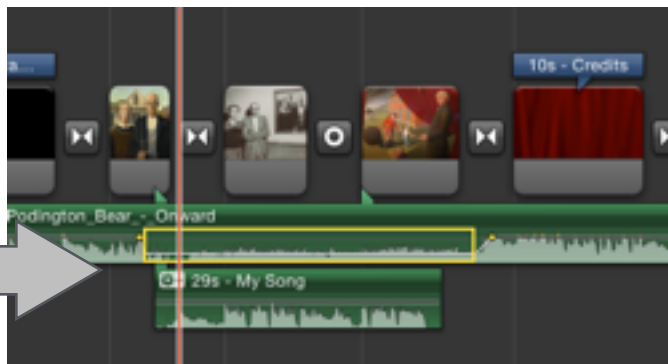

DRAGGING AUDIO IN

- select and download a free .mp3 file from freemusic.org
- this file should save to your downloads folder
- drag it from downloads to your film timeline

EDITING AUDIO

- there are at least 2 ways to edit audio levels / duration / etc.
- R click on the image to pull up inspector
- drag and drop a yellow box over the section of the audio you wish to edit & then drag the line down to lower audio

You can **RECORD A SEPARATE AUDIO TRACK** in GarageBand in 426/studio for a quiet environment ... OR You can simply record your audio file using the mic tool in iMovie (there will most likely be background chatter)

- Open GarageBand app: -New Project -Voice -Choose -Save As: (give it a title) -Desktop
- Read & Record your entire script (Q4:2) & press STOP (or spacebar at the end)
- Share -Export song to disk -MP3 encoder -High quality -Export -Save As: (give it a title)
- Where: Flash drive (So that you can save & take it back to your computer to drag in)

RECORD
BUTTON

*TAKE THE FLASH DRIVE BACK TO YOUR COMPUTER & DRAG THE FILE DIRECTLY INTO THE IMAGE AT THE POINT WHERE YOU WANT YOUR AUDIO TO BEGIN

*ONCE YOU ARE DONE WITH YOUR IMOVIE DOCUMENTARY SEND THE PROJECT TO ME:

-Share -Export Movie -Export as: yourname_artistname -Where: Desktop -HD 720p (will save as .mov file)

*You will then login to your student google account and upload this .mov file to your Drive

*Share the link with me (Share it to my pinerichland email account: vthearle@pinerichland.org) *FILL OUT RUBRIC
