

OPEN DISCLOSURE

Cognitive Ability Testing 2024

This spring, ALL 2nd grade students will participate in a Cognitive Abilities Screener Test. Cognitive ability tests measure a student's overall ability across a broad range of mental capabilities. A Cognitive ability test is not an achievement test. Your child participated in a practice problems with the PACE Specialist in preparation for the screener. The screener will have questions in the following 3 categories: picture and word analogies, number analogies, and figure matrices. Another basis for using a cognitive ability test is to assess students' reasoning and problem-solving abilities to help guide appropriate placement into the district Program for Academic Achievement and Enrichment (PACE). For more information on the PACE program please visit the district web page.

Your school's testing date is between March 25 – March 29, 2024

If you would prefer your child, not be tested, please inform your child's teacher prior to the test date. No electronic devices such as apple watches or iPhone will be permitted during testing.

If you have additional questions, please contact Gina Mason at gmason@pcschoools.us or 645-5600 ext 3083.
