2nd Grade Activity #1

Found Object Color Wheel

We have talked about groups of colors (primary, secondary, warm and cool) this year as well as the color wheel. Go around your house/outdoors and find objects of each color of the rainbow and create your own color wheel. See examples below.

When finished if you have a camera/phone/tablet feel free to take a photo. You may even email it to me if you'd like. I would love to see it!
