Volume 19 Issue 6

C⁴ will connect community resources to provide career education for all students while laying the foundation for life-long learning.

In preparation for the annual Columbus Kiwanis Duck Splash event on October 13, the organization decided it was time to spruce up their supply trailer. With the help of students in C⁴ Graphic Design & Layout, and the Art Department's Visual Communications class, the group approved the design of a new wrap, shown at left. Special thanks to these community partners for their part in making the design a reality: The Tony London Company, Indiana Glass Coatings, and Otto Streetscape Solutions. See the C⁴ Facebook page for more info.

Slugs and dinos share space in the PLTW Engineering lab's 3D printer. Working from a file available online, the models include a layer which will later be removed in a weak acid bath, creating articulated movement.

Human Body Systems students in **Mrs. Behling's** class at Columbus East gathered data on bone length and width to assist in identifying a fictional "Jane Doe" earlier in the semester.

BNN students added many hours outside of class to plan, create and edit this year's CNHS "Lip Dub" video. If you'd like to see the results, turn up the volume and head over to:
