**Steve Sellers'** Automotive class looks under the hood of a Chevrolet S10 to check the oil, air filters, and perform other automotive maintenance.

**Veterinary** students created lab animal mazes and hyperactivity assessments for the class guinea pigs, Waddles and Bugsy.

Sports Nutrition teacher, **Sarah Fisher** presents a lesson on "mise en place," the French culinary term for having everything organized and prepped before starting a recipe. The recipe in question was Apple No-Bake Cookies.

**Sam Taylor** (Hauser) and **Evie Hipwood** (Columbus North) are learning how current moves through a parallel circuit by creating the circuit on a breadboard. Students used simulation software to measure voltage, current, and resistance before moving to a physical circuit.
