On Saturday, the Architecture team presented their design for Exhibit Columbus – Public by Design. This all-day event featured presentations by thirteen 2022–23 participants: the J. Irwin and Xenia S. Miller Prize Recipients, University Design Research Fellows, High School Design Team, and Communication Designer. Each participant presented their design concept for the 2023 Exhibition and sought feedback from the audience. This was a terrific way to learn how these creative designers approach their work and create a concept which will become a reality this fall.

Congratulations to C⁴ Welding Year 1 & 2 students who completed their Certification for Shielded Metal Arc Welding (SMAW). SMAW, informally known as stick welding, is a welding process that uses a flux-coated electrode to join metals. Way to go, Welding Students!

Many C⁴ students participate in FFA and had the opportunity to drive their tractor to school at Columbus East last Friday. It is a fun day for the FFA students and highlights agriculture in the community.
