

PRESS RELEASE

Introducing Our Site Community Liaisons: Enhancing Family-School Connections

Encinitas, California — October 12, 2023 — Encinitas Union School District is excited to introduce an expanded initiative aimed at strengthening our commitment to serving the needs of our school communities and cultivating a sense of belonging in our vibrant community. We are pleased to announce the appointment of dedicated Site Community Liaisons, each assigned to a specific school site. This initiative is made possible through specialized state funding and is in direct response to feedback from our valued families.

The introduction of Site Community Liaisons represents a significant stride in bridging the gap between families and schools while elevating cultural awareness as a core value. These dedicated liaisons are equipped and ready to provide valuable support to students and families, acting as a vital resource for connecting with both our schools and essential community resources to ignite the limitless potential of all our students.

Key Roles of Our Community Liaisons

- **Language Assistance:** Our Liaisons are bilingual (English/Spanish) and support any language barriers. They can assist in finding interpretation services in other languages.
- **Community Building:** Our Liaisons lead community-building initiatives such as family workshops and events. They actively support the school's English Learner Advisory Committee (ELAC) and the District English Learner Advisory Committee (DELAC). These gatherings and meetings create opportunities for parents to connect with one another and with school staff, share experiences, and build a robust support network.
- **Resources / Advocacy:** Our Liaisons are innovative thinkers, exploring novel ideas within our school communities and collaborating with families and school staff to find effective solutions and resources.
- **Questions / Navigating the System:** Families new to our school or education system can rely on our Liaisons to answer questions, provide guidance on enrollment, school routines, and accessing educational resources.
