

Staff Safety

The board recognizes that safety and health standards should be incorporated into all aspects of the operation of the district. Rules for safety and prevention of accidents will be posted in compliance with OSHA and WISHA requirements. All hazardous chemicals will be identified and properly labeled. Staff members will be trained in the use of these chemicals specific to their respective jobs. Proper records will be maintained to verify that all of the preventive and safety measures are in place. Injuries and accidents will be reported to the district office.

The district will have at least one staff member at each school and work site in the district who holds a valid certificate of 1st Aid/CPR/AED training or equivalent training from an accredited 1st Aid/CPR/AED instruction provider. Each school and work site will have first aid supplies readily accessible and if the work site has more than fifty employees a first-aid station will be established.

The superintendent will develop necessary safety and health standards to comply with Department of Labor requirements.
