

# Math Olympiad

Join us for a specialized Math Olympiad program with MOEMS (Math Olympiads for Elementary and Middle Schools) member, Madhu Marathe! Students will receive premier instruction, explore real contest challenges, and will compete as a Math Olympiad team member. This class will sharpen critical thinking and problem solving skills. We'll explore a variety of creative problem solving strategies and techniques to solve challenging, non-routine Math Olympiad problems with ease and efficiency. Students' enthusiasm and passion for math will be stimulated, they will be motivated to take on and solve out of the box math problems, and above all students will experience the thrill of smart problem solving. We'll give you the tools for success!
