## 5003-AR - Purchasing

The School District must procure supplies, equipment, and services to carry out its educational mission. The Director of Finance is the School District administrator with primary responsibility for ensuring School District procurement is: consistent with the District's educational mission; as efficient and effective as possible, given the circumstances; and, consistent with all legal requirements and Board policies. The Assistant Superintendent for Business Services may recommend to the Superintendent revisions to these administrative regulations necessary to accomplish these goals.

**Procurement Using Federal Grants and Awards** The following procedures must be followed with respect to federal grants and awards.

**Cash Management.** Cash management procedures are governed by <u>2 CFR</u> <u>200.305</u>. The regulation permits the School District to make payments to vendors by electronic funds transfer, check, warrant, or other means that minimize the time that elapses between the transfer of federal funds to the School.

Disbursements to School District Vendors. Advance payments of federal grants and awards to the School District must be deposited and maintained in insured accounts, whenever possible. Advance payments of federal grants and awards to the School District must be deposited in interest bearing accounts, unless: the School District receives less than \$120,000 in federal awards and grants per year; the best reasonably available interest-bearing account would not be expected to earn interest in excess of \$500 per year on federal cash balances; the depository requires an average or minimum balance so high it would not be feasible given federal and non-federal case resources; or, a foreign government or banking system prohibits or precludes interest-bearing account. Interest earned amounts up to \$500 per year may be retained by the School District for administrative expense. Interest earned over \$500 must be returned according to the procedures described in the regulation.

**Allowability.** The allowability of costs posted against federal grants and awards is governed by the program legislation, pertinent federal agency regulations, including those referenced in <a href="https://example.com/2CFR/200.302(b)(7)">2CFR/200.302(b)(7)</a>, and the terms and conditions of the grant or award. School District personnel are also expected to comply with the December 2013 OMB Supercircular, entitled "Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards," applicable Michigan law, and applicable School District policies and administrative regulations.

The School District receives various federal grants and awards. The Director overseeing a particular federal grant is responsible for approving all costs posted against such federal grant. Payroll costs will be documented according to the December 2013 OMB Supercircular. When permitted by the grant or award, indirect costs will be charged using the rate approved by Michigan Department of Education.

**Conflicts of Interest.** Conflicts of interest are governed by <u>2 CFR 200.318</u>. School District Board members, employees, and agents engaged in the selection, award, or

administration of contracts paid for, in whole or in part, by federal grants and awards may not have a prohibited conflict of interest. A prohibited conflict of interest exists when a School District Board member, employee, or agent (or any members of his or her immediate family) has a financial interest in or has or would receive a tangible personal benefit from a firm considered for such a contract. A School District Board member who violates this administrative regulation is subject to discipline by the Board of Education or the Governor. A School District employee or agent who violates this administrative regulation is subject to discipline, up to and including discharge. This administrative regulation does not, and should not be interpreted to, supersede or diminish other laws, Board policies, or administrative procedures concerning prohibited conflicts of interest.

**Procurement Procedures.** School District procurement procedures are governed by **2 CFR 200.319**. School District procurement solicitations must: include a clear and accurate description of the technical requirements for the material, product, or service to be procured that does not, in competitive procurements, contain features that unduly restrict competition by prospective vendors; and, identify all requirements prospective vendors must fulfill and all other factors the School District will use in evaluating bids or proposals.

**Evaluations of Proposals.** Most, but not all, solicitations for supplies, materials and services paid for, in whole or in part, by federal grants and awards involve competitive bidding. **2 CFR 200.320**, **2 CFR 200.321**, and/or **2 CFR 200.323(a)** are applicable to such situations. Among other things, the regulation requires the School District to create a written description of the manner in which the School District will conduct its technical evaluation of proposals by prospective vendors.

**Travel.** See <u>2 CFR 200.474</u>. The travel costs (i.e., transportation, lodging, subsistence, and related costs) for School District Board members, employees, and agents may not be paid from federal grants and awards unless: they would be reimbursed pursuant to applicable School District policies and procedures; and, the individual's participation is necessary to the federal grant or award.

**Construction.** As reflected in the Board of Education Policies, the School District will construct new buildings and add to or renovate existing buildings through competitive bidding as required by law. The School District will also purchase materials, equipment, and supplies for School District operations on a competitive basis as required by law.

### Procedures.

 Any construction of new buildings or additions or renovations of existing buildings will, to the extent required by law, be based on competitive bidding, typically through an RFP approved by the School District's Assistant Superintendent for Business Services, the School District's Superintendent and the Board of Education.

- All purchases of materials, equipment and supplies will be made through the issuance of a purchase order signed by the School District's Purchasing Supervisor.
- Materials, equipment, and supplies may be purchased cooperatively when it is in the best interest of the School District.
- Prior to issuing a purchase order, competitive pricing is to be pursued, as follows:
  - 1. *Competitive Bids.* The competitive bidding process will be followed, where required by law. The Director of Finance shall use discretion in deciding whether such purchases are made on the basis of requested quotations, through invitations for bid, or the use of approved cooperative contracts.
  - 2. Purchases Not Subject to Competitive Bidding. In all other instances, the School District shall use measures, considered reasonable under the particular circumstances, intended to secure the highest quality product at the lowest possible price.
- Generally, orders or contracts will be awarded to the lowest, responsible, qualified vendor, considering the following factors: price, quality, conformance to specifications, identified needs, service and maintenance, and vendor reliability.

**Procurement of Professional Services** Professional services, such as architectural, legal, engineering, consulting, and auditing services, frequently requires familiarity with School District personnel, practices, and facilities. The School District recognizes there are advantages in maintaining continuity in the provision of these services and does not require bidding or annual re-bidding, except in cases where the Superintendent or Board of Education considers it in the School District's best interest. Periodically, the School District may competitively bid such services to ensure that service and pricing are aligned with the School District's best interests and industry norms. The criteria for awarding contracts for professional services will be determined by the Board of Education, following recommendations from the Superintendent, on an *ad hoc* basis.

## 5000.10 - Meal Charge / Food Services

The School District has established this meal charge and food services policy to address the provision of food services for School District students, including: students who are eligible for reduced-price or full-price meal benefits, but and/or students who have insufficient funds to pay for school meals. This policy also addresses bad debt incurred due to the School District's inability to collect unpaid meal charges from its parents and students.

The Superintendent will develop and implement administrative regulations regarding meal charge procedures to provide consistent direction concerning students who do not have funds in their account or in hand to cover the cost of their meal at the time of service, and procedures for students entitled to reduced-price or full-price meal benefits. These regulations, and this policy, will be provided to all households in writing at the start of each school year, to households transferring to the School District during the school year, and to all School District staff and independent contractors and companies responsible for implementation.

## 5010-AR - Meal Charge / Food Services

This administrative regulation gives effect to the Board of Education's Meal Charge/Food Services Policy.

**Requests for Reduced-Price or Full-Price Meal Benefits**Parents may request reduced-price or full-price meal benefits by submitting the appropriate form found at <a href="http://www.troy.k12.mi.us/department/food-service">http://www.troy.k12.mi.us/department/food-service</a>, or by contacting the Food Service Office at 248-823-5089.

**Meal Account Balance** Payment for school meals is expected at the time of purchase. Parents are expected to regularly monitor their child's meal account balance online, at <a href="http://www.myschoolbucks.com">http://www.myschoolbucks.com</a>.

**Positive Balances.** Any unpaid meal charges or money remaining in a student's meal account balance will be carried over, one time, to the next consecutive school year. The School District will refund balances in excess of \$5.00. The District does not refund balances of \$5.00 or less due to the administrative costs associated with creating a refund.

**Insufficient Funds.** The School District recognizes that, at times, students may come to school without sufficient funds in their meal account. If so, students may charge up to five (5) lunches.

### Notification and Collection

**Low Account Balances.** The School District will notify the student's household, by email, when a student's meal account balance falls below \$10.00. The notification will include the current account balance. District personnel shall keep records of all such emails sent which will include the date and time of the email and the email address used.

Negative Account Balances. Students eligible for reduced-price or full-price meal who have money to pay for a meal at the time of service shall be provided a reimbursable meal, even if they have incurred a negative account balance. The School District will not use funds students have in-hand to repay a negative balance or other unpaid meal charge debts. Students who qualify for full-price meals will not be denied a reimbursable meal, even if they have incurred a negative meal charge balance from the purchase of additional cafeteria items, such as a la carte items. If students eligible for full-price meals have incurred a negative account balance, they will not be permitted to purchase additional cafeteria items above and beyond the reimbursable meal provided.

The School District expects all delinquent debts will be paid in full on the last day the student will be in attendance for the relevant school year. Before uncollectable/delinquent debt can be reclassified as bad debt, the Food Service Department must make reasonable efforts to collect on the debt and keep detailed records showing the efforts made, as follows:

- Once a student's meal account balance becomes negative for five (5) consecutive days, the Food Service Department will contact the household by email or, if the parent's email address is not known, by telephone to request payment. The Food Service Department will also inform the parent of the School District's reduced-price and full-price meal program. The Food Service Department will inform the parent that the matter will be turned over to the building principal if no payment is received within one week.
- If no payment on a student's negative meal account balance is received within one week, the Food Service Department will contact the building principal. The principal (or his or her designee) will contact the student's parents by email or, if the parent's email address is not known, by telephone, to determine an appropriate solution.
- The District may choose to use the following sample letter, or some variation thereof:

[<mark>Date</mark>]

## [Parents/Guardians´ Names and Address]

Dear [Parents/Guardian]:

The goal of the Troy School District lunch program is to provide healthy meals to children during the school day. In order to serve healthy, high-quality meals, we must make sure we are financially secure. You play a key role in this effort, and are responsible for purchases made by your child in our school cafeteria.

As of [date], your child has a negative account balance of \$[X]. We strongly encourage you to pay this amount as soon as possible. Your response to this request is important. Paying back this debt will help keep our food service program strong and ensures all children at our school have access to the healthy food they need to focus in the classroom. We understand that mistakes happen. But meal payments are important to our program, and we must collect your cafeteria debt.

Please contact the Food Service Department at 248-823-5089 if you have any questions. To review the Troy School District Meal Charge/Food Services Policy, please visit <a href="http://www.troy.k12.mi.us/departments/food-service">http://www.troy.k12.mi.us/departments/food-service</a>. We would be happy to work on a repayment plan with you.

You may pay your child's negative account balance at <a href="http://www.myschoolbucks.com">http://www.myschoolbucks.com</a> using a debit or credit card or by sending a check payable to Troy Schools Food Services at 4420 Livernois, Troy, MI 48098. If you think your child may qualify for a free or reduced-price meal, please submit the appropriate form found at <a href="http://www.troy.k12.mi.us/departments/food-service">http://www.troy.k12.mi.us/departments/food-service</a>. Thank you for your quick payment.

[Person, title]

Sincerely,

CC: [Name of teacher, principal, superintendent, as appropriate]

District personnel shall keep records of all such letters sent.

**Bad Debt** The School District defines bad debt as uncollectable/delinquent debt from inactive student meal accounts that has been determined to be uncollectable by

December 31st of the year in which the debt was incurred or, in the event the debt was transferred to the next consecutive school year, December 31st of the next fiscal year. Debt is considered uncollectable/delinquent if: (1) the District has exhausted its collection attempts, as described in the preceding section; and (2) by December 31st of the current or year after the debt was incurred, the student was inactive by June 30th. A student is inactive if s/he was no longer enrolled in the School District or had graduated by June 30th. If the uncollectable/delinquent debt cannot be recovered by the School Meals Program in the year when the debt was incurred, the debt is classified as bad debt. Bad debt shall be classified as an operating loss.

Once classified as bad debt, non-federal funding sources must reimburse the nonprofit school food service account (NSFSA) for the total amount of the bad debt. The funds may come from any non-federal funding, including: the School District's general fund, state or local funding, or school or community organizations such as the PTA. Bad debt also includes losses (whether actual or estimated) arising from uncollectable accounts, including costs associated with collection efforts or legal costs incurred prior to its classification as bad debt.

**Recordkeeping** Once uncollectable/delinquent debt charges are converted to bad debt, the School District shall maintain records relating to those charges.

Audits and Reviews. Upon request, the District must make accounts and records regarding its school food service available to the Michigan Department of Education and/or the United States Department of Agriculture, Food and Nutrition Service for audit or review. Such records shall be retained for a period of three years after the date of the final claim for federal reimbursement for the fiscal year in which the charges were incurred. The District may be required to keep such accounts and records for more than three years if the audit or review results in issues that require District correction, up until all such issues are resolved.
