**Zip Code Update:** The information we received from last year was altered for 2016 when we received the data from the Ohio Department of Health Vital Statistics this year. The live birth data last year was reported as 462 births and this year live births are 453. The 2017 live births are 513 births. Although the 2016 change is not real significant, the 2017 data is fairly significant with a change of 60 births in just one year. The significance of these numbers will become more clear with additional years of data.

#### **UA Students receiving educational services in alternative settings**

Upper Arlington has several resident students who attend educational services in a variety of alternative placements as noted within **Table 4**. There is a total of 212 students within these placements. It is possible that a number of out-of-district students may, at some point, return to the Upper Arlington district for their educational services which affects the total number of students enrolled within the Upper Arlington School District. It will be prudent for the administration to note any changes which may occur during the school year. We are aware that it is difficult to accurately account for these out of district students but it does provide for student information.
