SUPERINTENDENT'S REPORT:

1. New English Language Arts Curriculum for Grades K-8 - Beginning in the 2024-2025 school year, Lowellville will be using a new English Language Arts curriculum for grades K-8. The curriculums selected are aligned to the Science of Reading. CKLA Amplify will be the curriculum used in grades K-5 and Amplify ELA will be the literacy curriculum used in grades 6-8.

- Why is the district purchasing a new curriculum?
 - Districts and schools are required to use high-quality core curriculum and instructional materials and evidence-based reading intervention programs from the Department's (Ohio's Education Department) approved list, beginning not later than the 2024-2025 school year. The approved list will include prekindergarten materials, in addition to materials for kindergarten-grade 5.

Programs included on the approved list for kindergarten-grade 5 may be core comprehensive English language arts programs, core English language arts programs with no foundational skills, and supplemental foundational skills only programs. Districts and schools may use a combination of programs on the approved list to provide educators with a set of materials that meets local needs. In grades K-2 specifically, districts and community schools may choose to use a core comprehensive English language arts instructional program or pair a supplemental foundational skills program with a core comprehensive instructional program or core no foundational skills program.

- What is the Science of Reading?
 - Under [ORC 3313.6028\(A\)\(1\)](#), the [science of reading](#) is an interdisciplinary body of scientific evidence that:
 1. Informs how students learn to read and write proficiently;
 2. Explains why some students have difficulty with reading and writing;
 3. Indicates that all students benefit from explicit and systematic instruction in phonemic awareness, phonics, vocabulary, fluency, comprehension and writing to become effective readers;

MISSION

The Lowellville Local School District will educate, empower and challenge our students to reach their individual potentials by providing an environment where tradition, community and excellence create productive members of a global society.

4. Does not rely on any model of teaching students to read based on meaning, structure and syntax, and visual cues, including a three-cueing approach.
 - o More information on the science of reading is available in the Department's [Science of Reading toolkit](#).

6. Vape Detectors- As part of our ongoing commitment to creating a safe and healthy learning environment for all students, we are implementing a new measure to deter the use of tobacco and vape products within our school. After careful consideration and in response to the increasing concern over tobacco and vape use among students, we have decided to install vape detectors in our school's restrooms and locker rooms.

MISSION

The Lowellville Local School District will educate, empower and challenge our students to reach their individual potentials by providing an environment where tradition, community and excellence create productive members of a global society.

The primary purpose of these vape detectors is to serve as a deterrent against the use of tobacco, vapes, and similar products on school premises. This initiative is in line with our school policies and state laws regarding tobacco possession and use by minors. Our goal is not only to enforce these policies but also to encourage healthier choices among our students.

We understand that open communication and cooperation between the school and home are crucial in these efforts. As such, we encourage you to discuss the importance of making healthy choices and the consequences of substance use with your child. Together, we can support our students in making decisions that benefit their health and academic success.
