STUDENTS UNLEASH THEIR INNER ARTIST THROUGH LUNA LUNA-INSPIRED ART MASTERPIECES

LAWNDALE, CA (March 21, 2024) - Students at Lawndale Elementary School District's Jane Addams Middle School inspired by the Luna Luna Forgotten Fantasy Exhibit produced three-dimensional art pieces replicating loved carnival rides and games including the ferris wheel, merry-go-round, swing carousel, tic-tac-toe, slingshot, and more!

Led by art teacher Ms. Anne Marie D'Agostino, students designed pieces that blend art elements with science, technology, engineering, and math concepts creating interactive pieces that move and provide onlookers with a unique opportunity to engage with and experience the art.

Luna Luna by André Heller was the first-ever art amusement park bringing together renowned artists including Keith Haring, Jean-Michel Basquiat, and David Hockney, who put their artistic touch on common amusement attractions.

In D'Agostino's class, students from all ranges of skills and experiences are provided with the opportunity to experiment with innovative techniques and approaches to art, pushing the boundaries of traditional concepts. Through this unique project, students expanded their creativity, problem-solving, and collaboration skills, and learned the endless possibilities that our imaginations can create.

Jami Valentine, Principal at Jane Addams Middle School said, "This is really putting the A in STEAM." We invite you to experience the student art exhibit and cherish the creativity of the Jane Addams Middle School students. Please contact us for more information.

###

Lawndale Elementary School District is a Transitional Kindergarten through eighth-grade district in Lawndale, California, composed of six elementary schools and two middle schools, State Preschool, Lawndale Early Advantage Program, and the SWSELPA's Early Start Bright Beginnings Program. Lawndale strives to build brighter futures through a commitment to addressing individual student needs focusing on increasing academic achievement, ensuring access and equity, improving parent and student engagement, and providing 21st-century learning environments and tools to be successful.
