

ELECTRONIC RESOURCES

The Mead School District Board of Directors recognizes that an effective public education system develops students who are globally aware, civically engaged and capable of managing their lives and careers. The Board also believes that students need to be proficient and safe users of information, media and technology to succeed in a digital world.

Therefore, Mead School District will use electronic resources as a powerful and compelling means for students to learn core subjects and applied skills in relevant and rigorous ways. It is our district's goal to provide students with rich and ample opportunities to use technology for important purposes in schools just as individuals in workplaces and other real-life settings use these tools. Our district's technology will enable educators and students to communicate, learn, share, collaborate and create; to think and solve problems; to manage their work; and to take ownership of their lives. The district-provided network is intended for the purpose of helping students to pursue, faculty to provide and non-teaching staff to support the District's educational mission.

CHILDREN'S INTERNET PROTECTION ACT (CIPA) UPDATE/To help ensure student safety and citizenship in online activities, all students will be provided information about appropriate behavior, including interacting with other individuals on social networking websites and in chat rooms, and cyber-bullying awareness and response.

The superintendent or designee will create strong electronic educational systems that support innovative teaching and learning, to provide appropriate staff development opportunities and to develop procedures to support this policy.
