MEMORANDUM

To: Mary Pat Cumming, Principal Fair School

From: Jason Karpe, Safety Specialist Environmental Health & Safety

Date: November 02, 2022

RE: Fair School
Lead In Water Testing

As part of the Minneapolis Public Schools (MPS) Lead in Water Safety Plan, EH&S sampled drinking water fixtures at Fair school on October 14, 2022. All water was collected on a first draw basis with a minimum of 6-hour system stagnation. This method represents the worst-case scenario for lead in water concentrations. Twenty-four (24) drinking sources were tested. All samples collected were none detected for lead in water (see attached laboratory report).

Based on the laboratory results, at Fair school is not required to perform MPS Daily Lead in Water Flushing Protocol. As a good practice, EH&S recommends and encourages that staff and students run drinking sources until cool before drinking.

This memorandum and the laboratory analysis report will be maintained available to the public on the MPS website:

<https://www.mpschools.org/departments/operations/environmental-health-safety>

If you have any questions, you may contact me at your convenience at 612-668-0307.

Attachment: Laboratory Analysis Report dated October 20, 2022

Approved methods used in analyzing the samples listed above have the following reporting levels:
 SM3113 - Lead, 2.0 µg / L
 Maximum contaminant level: Lead, 15.0 µg/L

Sample Collected by: X Client TCWC

Sample Temp.: 19° C

Notes: RR = restroom, DF = drinking fountain

Discussion:

Approved By:

Bill Van Arsdale
 Laboratory Manager

The results listed in this report apply only to the above listed samples. All routine quality assurance procedures were followed, unless otherwise noted. This analytical report must be reported in its entirety. All methods are certified by the Minnesota Department of Health, unless otherwise noted.
