

POLICY ADOPTION

The Alexandria City School Board (Board) adopts policies for governing the school division. The power to enact policy cannot be delegated to an employee or agent such as the Superintendent or a single member of the Board.

Policy is a basic statement related to the conduct of the school division’s business. Policies provide overall guidance to the Superintendent and typically include but are not limited to content from the Code of Virginia as presented in the Virginia School Board Association (VSBA) model policies and optional belief statements developed by the Board. Policies are subject to revision by the Board.

Regulation is the manner or method of implementation of policy by the Superintendent and staff. Regulations are subject to revision by the Superintendent.

Policies may be developed and presented to the Board by the Superintendent or Superintendent’s designee. The final authority for adoption rests solely with the Board.

When a proposed action of the Board, initiated either by a Board Member or the administration affects existing Board policies, the existing policy and regulation, if any, should be referenced so that the effect of the new action will be clear.

Unless otherwise specified in the policy, a new or revised policy becomes effective upon adoption.

All regulations are developed by or through the Superintendent. They are presented to the Board as information items prior to approval by the Superintendent. The Board may provide feedback on draft regulations or inform the Superintendent that it wants to act on a specified regulation.
