One small step for man, one giant leap for El Mo! This year, the Class of 2027 blasted off into beyond, going "fresh outta space" where no vanguard has gone before.

The freshmen, led by class representatives **Halle Calderon**, **Payden Thibodeau**, **Chase Colbert**, **Trey Esperanza**, **Jenna Mason**, and **Vy Bonaventure** put a tremendous amount of work towards making their first Spirit Week one to remember. With the help of advisors **Ms. Cosman** and **Ms.**

**Mirise**, our freshies' interstellar Spirit Week dreams were realized, and their work certainly paid off.

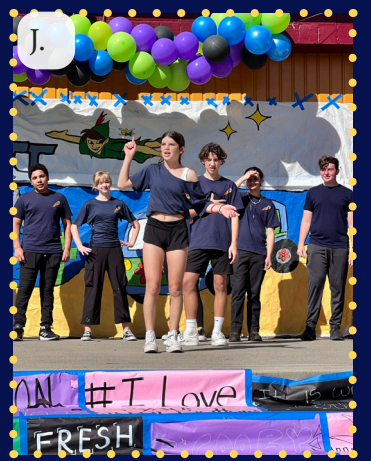

Their posters sprawled the 200s building facing the parking lot, making "Class of 2027" a sight to behold all the way from the softball portables. Although many of the banners were swept away by the wind, the posters were amazing while they lasted.

The entertaining freshman skit also elevated their Spirit Week performance, with the tale following a group of Vandards attempting to restore school spirit from a

squad of aliens.

Through skit practices, after-school workdays, and lunch games, Spirit Week offered every freshman a great opportunity to bond with one another, meet new people, and become a part of the El Mo community.

The remarkable spirit week allowed our Freshman class to shine amongst the stars and demonstrate what spirit means to them. Placing second in terms of points, the Freshman truly demonstrated their commitment to spirit. El Modena looks forward to what they have in store for the future.
